SUPPLEMENTARY INFORMATION:

Background

Section 563 of the Fiscal Year 2008 Department of Homeland Security Appropriations Act amends the Homeland Security Act of 2002 and directs DHS to “regulate the sale and transfer of ammonium nitrate by an ammonium nitrate facility to prevent the misappropriation or use of ammonium nitrate in an act of terrorism.” See Pub. L. 110–161, Division E (2007). That statute also directs DHS to consult with appropriate private sector entities, State governments, heads of other Federal departments and agencies, and other appropriate stakeholders in developing and implementing ammonium nitrate regulations. See *id.*, 6 U.S.C. 488a(b); 488a(g); and 488a(i)(4)(B). The Department published an advance notice of proposed rulemaking on October 29, 2008 seeking public comment on a Secure Handling of Ammonium Nitrate Program, which was followed by the notice of proposed rulemaking for the Ammonium Nitrate Security Program published for public comment on August 3, 2011. See 73 FR 64280 (advance notice of proposed rulemaking); 76 FR 46908 (notice of proposed rulemaking).

Purpose

The National Protection and Programs Directorate of the Department of Homeland Security will hold public meetings to consult with the public and with other interested parties on the notice of proposed rulemaking (NPRM) for the Ammonium Nitrate Security Program. The agenda for the public meetings will consist of a presentation by the Department on the elements of the NPRM, followed by comments from the attending public concerning the proposed rulemaking.

Public Meeting Procedures and Participation

For those members of the public that cannot attend the scheduled public meetings, a copy of the Department’s presentation provided at the public meetings will be made available via the Department’s Ammonium Nitrate Security Program Web site in mid-October at <http://www.dhs.gov/files/>

programs/ammonium-nitrate-security-program.shtm.

Each meeting is open to the public and each is expected to last up to a total of four hours. Please note that a public meeting may adjourn early if all commenters present have had the opportunity to speak prior to the scheduled conclusion of the meeting. DHS will use sign-in sheets to voluntarily collect contact information from the attending public and to properly log oral comments received during the meetings. Providing contact information will be voluntary, and members of the public may also make anonymous oral comments. Seating may be limited, but session organizers will make every effort to suitably accommodate all participants. In order to allow as many members of the public as possible to speak, each speaker must limit his/her remarks to three minutes.

A transcript of each of these public meetings will be provided in the electronic docket for the Ammonium Nitrate Security Program rulemaking, docket number DHS-2008-0076, available at <http://www.regulations.gov>. Written comments on the proposed Ammonium Nitrate Security Program may also be submitted to the Department of Homeland Security. As specified in the NPRM, you may submit comments, identified by docket number DHS-2008-0076, by one of the following methods:

- *Federal eRulemaking Portal:* Follow the instructions at <http://www.regulations.gov> for submitting comments.

- *Mail:* U.S. Department of Homeland Security, National Protection and Programs Directorate, Infrastructure Security Compliance Division (NPPD/ISCD), 245 Murray Lane, SW., Mail Stop 0610, Arlington, VA 20598-0610.

To avoid duplication, please use only one of these methods to submit written comments.

Key Comments Solicited by the Department

The Department is soliciting comments on all aspects of the NPRM. Of particular interest are comments addressing the following major issues:

Ammonium Nitrate Use and Characteristics

1. The types, quantities, and concentrations of ammonium nitrate and ammonium nitrate mixtures produced, used, sold, and transferred in the United States.

2. The detonability of ammonium nitrate and ammonium nitrate mixtures of different quantities and concentrations.

Registration

1. The level of access to the Internet that potential registration applicants currently have and/or the level of access potential applicants anticipate having in the future.

2. How potential registration applicants who do not have readily-accessible Internet access could obtain the access necessary to register online.

3. How to best notify agents (AN Agents) when ammonium nitrate purchasers (AN Purchasers) submit those AN Agents' names to the Department prior to sale or transfer of ammonium nitrate.

4. The efficiency and sufficiency of notifying applicants of registration number (AN Registered User Number) approvals and denials via e-mail or other electronic means.

5. The proposed regulatory coverage of truck drivers and other ammonium nitrate transporters.

Verification

1. The proposed requirement that certain forms of identification should be acceptable for purposes of a visual identity verification check.

2. The advisability, costs, and benefits of enabling AN Agents to provide AN Purchasers' identity verification information directly to ammonium nitrate sellers (AN Sellers) when it is not possible for an AN Seller to verify the identity of the AN Purchaser in person.

3. Possible alternative methods that could be employed to verify AN Purchasers' identities in sales or transfers involving AN Agents.

Recordkeeping

1. The benefits and costs of maintaining records regarding the AN Purchaser (and, where applicable, AN Agent) verification process.

2. How ammonium nitrate facility (AN Facility) personnel should notify AN Purchasers and AN Agents that the information they provide may be shared with the Department.

Dated: October 3, 2011.

Penny Anderson,

Director, Infrastructure Security Compliance Division, Department of Homeland Security.
