

does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified this proposed rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle 1, section 106, describes the authority for the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in subtitle VII, part A, subpart I, section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it modifies controlled airspace at Show Low Regional Airport, Show Low, AZ.

SUPPLEMENTARY INFORMATION: In the *Federal Register* of July 26, 2011 (76 FR 44506), we published a notice, stating that the Commission had received a submission from John L. Branum, Attorney at Law, on behalf of Bettys Bumpas (“petitioner”), dated May 9, 2011, requesting that we initiate rulemaking to require torch fuel and lamp oil to be packaged in containers that are not see-through. The notice explained that we were docketing the request as a petition under the Poison Prevention Packaging Act (“PPPA”). 15 U.S.C. 1471–1477.

The PPPA authorizes the Commission to issue requirements that certain household substances must be sold in child-resistant containers. 15 U.S.C. 1471–1477. Child-resistant packaging requirements currently apply to torch fuel and lamp oil. (More specifically, the child-resistant packaging requirements apply to “kindling and/or illuminating preparations,” which includes “cigarette lighter fuel, charcoal lighter fuel, camping equipment fuel, torch fuel, and fuel for decorative and functional lanterns, which contain 10 percent or more by weight of petroleum distillates and have a viscosity of less than 100 Saybolt universal seconds at 100[deg] Fahrenheit.” 16 CFR 1700.14(7)). The PPPA does not authorize the Commission to prescribe specific packaging designs for household substances. 15 U.S.C. 1472(d). However, in the case of a

household substance for which special packaging (*i.e.*, child-resistant packaging), is required, the Commission may prohibit the packaging of such substance in packages that it determines are unnecessarily attractive to children. *Id.* Therefore, in order to issue a rule requiring that torch fuel and lamp oil not be sold in see-through containers, the Commission would need to determine that the packaging is “unnecessarily attractive” to children.

The petitioner asserts that certain petroleum distillates, including torch fuel and lamp oil, as currently packaged, resemble juice. The petitioner notes that because young children enjoy the taste of juice and are accustomed to drinking it regularly, packaging petroleum distillates in clear plastic bottles causes needless danger, as children may mistake it for juice.

The petitioner states that “the New Jersey Poison Information and Education System stated in June 2008 that four people were hospitalized, one was critically ill, and one killed due to torch oil being mistaken for apple juice.” The petitioner also states that “from 2002 through 2009 the Annual Report of the American Association of Poison Control Centers’ National Data System has chronicled the exposure of many young children to lamp oils, which includes torch fuels.” The petitioner’s son died after ingesting torch fuel from a clear plastic bottle.

While torch fuel and lamp oil already are subject to child-resistant packaging and labeling requirements under the PPPA and the Federal Hazardous Substances Act, the petitioner asserts that additional special packaging is necessary. Specifically, the petitioner requests that the CPSC initiate rulemaking “that would require manufacturers of [torch fuel and lamp oils] to package the product in containers that make it impossible to see the product when in the container.” The petitioner notes that this could be accomplished “by packaging the fuel in a solid container or opaque plastic child-resistant container or a metal container.”

The notice that we published in the **Federal Register** of July 26, 2011 (76 FR 44506) stated that we invited comments on the petition, and it informed interested parties how to obtain a copy of the petition. The notice indicated that the comment period would close on September 26, 2011.

Recently, counsel representing the petitioner contacted the Commission to request an extension of the comment period. We note that the docket for this proceeding, as of September 28, 2011, contains nearly 260 comments. Thus,

given the interest in this subject, we are reopening the comment period for any interested parties until November 16, 2011.

Interested parties may obtain a copy of the petition by writing or calling the Office of the Secretary, U.S. Consumer Product Safety Commission, Room 820, 4330 East West Highway, Bethesda, MD 20814; telephone (301) 504-7923.

Copies of the petition are also available for inspection from 8:30 a.m. to 5 p.m., Monday through Friday, in the Commission’s Public Reading Room, Room 419, 4330 East West Highway, Bethesda, MD, or from our Web site at: <http://www.cpsc.gov>.

Dated: October 11, 2011.

Todd A. Stevenson,

Secretary, U.S. Consumer Product Safety Commission.
