Administrative Procedure Act Statement

This Notice of Funds Availability (NOFA) is being issued without advance rulemaking or public comment. The Administrative Procedure Act ("APA", 5 U.S.C. 553), has several exemptions to rulemaking requirements. Among them is an exemption for matters relating to federal benefits, but under the provisions of the "Statement of Policy of the Secretary of Agriculture effective July 24, 1971," issued by Secretary Hardin in 1971 (36 FR 13804 (the "Hardin Memorandum")), the Department will normally engage in rulemaking related to federal benefits despite that exemption. However, the Hardin Memorandum does not waive certain other APA-contained exemptions, in particular the "good cause" exemption found at 5 U.S.C. 553(b)(3)(B), which allows effective government action without rulemaking procedures where withholding the action would be "impracticable, unnecessary, or contrary to the public interest." The Hardin memorandum specifically provides for the use of the "good cause" exemption, albeit sparingly, when a substantial basis for so doing exists, and where, as will be described more fully below, that substantial basis is explained.

USDA has determined, consistent with the APA and the Hardin Memorandum, that making these funds available under this Notice to support farmworker training activities is in the public interest. Withholding this NOFA to provide for public notice and comment would unduly delay the provision of benefits associated with this program and be contrary to the public interest. Should the actual practice of the program produce reasons for program modifications, those modifications can be brought to the attention of the Department and changes made in the future rulemaking process.

I. Funding Opportunity Description

A. Background

Section 14204, of the Food Conservation and Energy Act of 2008, Public Law 110-246 (June 18th, 2008) 2008 Farm Bill, 7 U.S.C. 2008q-1 authorizes the Secretary of Agriculture

to make grants to assist agricultural employers and farmworkers by improving the supply, stability, safety, and training of the agricultural labor force. Such grants may be made to eligible entities for use in providing services to assist farmworkers who are citizens or otherwise legally present in the United States in securing, retaining, upgrading, or returning from agricultural jobs. The 2010 Appropriations Act included an appropriation of \$4 million to the USDA's Rural Housing Service (RHS) for this program, and the delegation of authority and funding for the program has since been transferred to OAO, within Departmental Management of USDA. OAO has designated the program the Agricultural Career and Employment (ACE) Grants Program and it will be referred to as such hereafter.

Purpose of the "ACE" Grants Program

As the title of Section 14204 of the 2008 Farm Bill suggests—"Grants to Improve the Supply, Stability, Safety, and Training of Agricultural Labor Force"—the ACE grants program is designed to address the needs of both agricultural employers and farmworkers with respect to the supply of skilled labor in American agriculture and the stability of employment in that sector. About 800,000 hired farmworkers are employed in U.S. agriculture, with hired workers making up an estimated one-third of the total agricultural labor force. Particularly critical for labor-intensive sectors of agriculture, such as fruits and vegetables, the hired agricultural labor force in the United States is characterized by considerable instability. Among the hired workforce are large numbers of migrant and seasonal farmworkers, many of whom travel long distances to obtain employment, and often move from crop to crop as conditions warrant. See Profile of Hired Farmworkers, A 2008 Update, by William Kandel, U.S. Department of Agriculture, Economic Research Service. This study can be found at <http://www.ers.usda.gov/Publications/ERR60/>.

Despite this regular flow of workers, regional differences in crops, variations in harvest times, and unpredictable weather conditions mean that many farm owners complain of chronic labor shortages, while farmworkers frequently report it is difficult to locate

employment or obtain sufficient hours of work to earn a living. Unemployment rates among farmworkers generally are double those of other wage and salaried workers and those working in field crops have twice the unemployment rate of livestock workers. Historically, the uncertainty farmworkers have faced as to the availability or duration of work, along with the low wages generally earned by hired farm laborers, have led to many employed in the agricultural labor sector to leave agriculture for employment in other industries. Because of high turnover rates in agricultural employment, it is estimated that 2.0 to 2.5 individual farmworkers fill each job slot in the course of a year. This phenomenon has led to chronic instability in the labor market and a shortage of skilled and experienced workers.

B. Scope of Work

The ACE grants program is intended to improve the supply of skilled agricultural workers and bring greater stability to the workforce in this sector. This stability will be realized through services specifically designed to assist farmworkers in securing, retaining, upgrading or returning from agricultural jobs. Such services include the following:

- Agricultural labor skills development;
- The provision of agricultural labor market information;
- Transportation;
- Short-term housing while in transit to an agricultural worksite;
- Workplace literacy and assistance with English as a second language;
- Health and safety instruction, including ways of safeguarding the food supply of the United States; and
- Other such services the Secretary deems appropriate.

C. Anticipated Outputs/Outcomes

1. *Outputs.* The term “output” means the creation or provision of services to assist farmworkers in securing, retaining, upgrading or returning from agricultural jobs. Outputs may be quantitative or qualitative but must be measurable during an assistance agreement funding period.

Examples of outputs from the projects to be funded under this announcement may include, but are not limited to, the following: Number of farmworkers served; number of farmworkers who attended conferences or trainings; number of conferences or training sessions held; or number of farmworkers completing labor skills programs or health and safety training programs.

2. *Outcomes.* The term “outcome” means the result, effect, or consequence that will occur from carrying out an outreach or assistance program or activity that is related to a programmatic goal or objective. Outcomes may be agricultural, behavioral, social, economic, or programmatic in nature. They may not necessarily be achievable within an assistance agreement funding period. Projects to be funded under this announcement are required to document anticipated outcomes, including but not limited to: Improvements in the supply, stability, safety and/or training of the agricultural labor force in a given geographic area or a given sector of the agricultural industry; an increase in the numbers of farmworkers in a given geographic area or agricultural sector who obtain skill-based certifications, licenses, or demonstrated competencies qualifying them for enhanced employment opportunities; the number of farmworkers in a given area who, as a result of program activities, advance to a position in agricultural employment which offers more hours of work and/or better terms and conditions of employment and/or an increase in wages; the number of farmworkers for whom English is not their first language who achieve, as a result of program activities, demonstrable improvements in workplace literacy in English; the establishment of new programs of health and safety instruction for farmworkers which, among other things, address ways of safeguarding the U.S. food supply; the establishment of new partnerships, networks or community support for services designed to assist farmworkers in securing, retaining, upgrading or returning from agricultural jobs, with the ultimate goal of improving the supply, stability, safety and training of the agricultural labor force.

3. *Performance Measures.* To be eligible for consideration for funding the applicant must develop performance measures they expect to achieve through the proposed activities. These performance measures will help gather insights and will be the mechanism to track progress concerning success process and outcome strategies and will provide the basis for developing lessons to inform future awardees. It is expected that the description of performance measures will include an estimate of the number of farmworkers served by the activities of the project including the assumptions used to make those estimates.

The following are questions to consider when developing output and

outcome measures of quantitative and qualitative results:

- What are the measurable short term and longer term results the project will achieve?
- How does the plan measure progress in achieving the expected results (including outputs and outcomes) and how will the approach use resources effectively and efficiently?
- How will the results be achieved in the proposed timeline?

SUPPLEMENTARY INFORMATION:

Title: Importation of Peppers From the Republic of Korea.

OMB Number: 0579-0282.

Type of Request: Extension of approval of an information collection.

Abstract: The Plant Protection Act (PPA, 7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to restrict the importation, entry, or interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests into the United States or their dissemination within the United States. Regulations authorized by the PPA concerning the importation of fruits and vegetables into the United States from certain parts of the world are contained in "Subpart—Fruits and Vegetables" (7 CFR 319.56-1 through 319.56-51).

Under these regulations, peppers from the Republic of Korea are subject to certain conditions before entering the United States to prevent the introduction of plant pests into the United States. The regulations include requirements for greenhouse inspections by South Korean national plant
