**DEPARTMENT OF ENERGY**

**Privacy Act of 1974; Notice To Amend an Existing System of Records**

**AGENCY:** U.S. Department of Energy.

**ACTION:** Notice.

**SUMMARY:** As required by the Privacy Act of 1974, 5 U.S.C. 552a, and the Office of Management and Budget (OMB) Circular A-130, the Department of Energy (DOE) is publishing notice of a proposed amendment to an existing system of records. DOE proposes to amend the system of records DOE-43 "Personnel Security Files." This notice will create a new routine use to permit the disclosure of certain information to federal agencies for studies and analyses in support of evaluating and improving the effectiveness and efficiency of the agencies' investigative and adjudicative methodologies.

**DATES:** The proposed amendment to this existing system of records will become effective without further notice on

December 12, 2011 unless DOE receives adverse comments and determines that this amendment should not become effective on that date. Comments regarding this amendment must be received on or before November 28, 2011.

**ADDRESSES:** Written comments should be directed to Mr. James L. Packett, Field Assistance Program Manager, Office of Departmental Personnel Security (HS-53), Office of Health, Safety and Security, U.S. Department of Energy, 1000 Independence Ave., SW., Washington, DC 20585.

**FOR FURTHER INFORMATION CONTACT:** Mr. James L. Packett, Field Assistance Program Manager, Office of Departmental Personnel Security (HS-53), Office of Health, Safety and Security, U.S. Department of Energy, 1000 Independence Ave., SW., Washington, DC 20585, (202) 586-3249 or Isiah Smith, Deputy Assistant General Counsel for Administrative Litigation and Information Law (GC-77), U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-1522.

**SUPPLEMENTARY INFORMATION:** This notice proposes one amendment to DOE-43 Personnel Security Files. This amendment creates a new Routine Use # 9, which will permit DOE to disclose to the Department of Defense (DOD) and other Federal agencies certain Privacy Act information contained in an employee's personnel security file (PSF). DOE will analyze the information in the PSFs and use the results to decide whether to adopt DOD's Case Adjudication Tracking System (CATS).

The CATS is an electronic adjudicative case management and tracking system developed jointly by the U.S. Army Central Clearance Facility (CCF) and the Department of Defense Business Transformation Agency (BTA). Sharing the aforementioned files with DOD would permit the DOE to evaluate whether the CATS provides accurate analyses. If so, it may be more efficient to replace DOE's manual system for evaluating the information the Department gathers during Personnel Security Investigations (PSIs). Because the CATS analyses are potentially more efficient in analyzing data, the DOE may adopt the electronic adjudication system for personnel security investigations for all future PSF analyses.

DOE is submitting the report required by OMB Circular A-130 concurrently with the publication of this notice. The text of this notice contains information required by the Privacy Act, 5 U.S.C. 552a(e)(4).

Issued in Washington, DC, on September 30, 2011.

**SUPPLEMENTARY INFORMATION:** The information collected under the requirements of *FERC-549*, "*Gas Pipeline Rates: NGPA Title III and NGA Blanket Certificate Transactions*" (OMB Control No. 1902-0086), is used by the Commission to implement the statutory provisions of sections 311 and 312 of the Natural Gas Policy Act (NGPA) and section 7 of the Natural Gas Act (NGA). The Commission implements these statutes in 18 CFR 284.

**Semi-Annual Storage Report for Interstate Pipelines<sup>1</sup>**

18 CFR 284.13(e) requires each interstate pipeline to file with the Commission a report of storage activity. The Commission adopted the existing semi-annual storage reporting requirements for interstate pipelines in their current form in 1992 as part of Order No. 636, and there have been only minor modifications in the semi-annual storage reporting requirements since that date.

Natural gas production is relatively constant throughout the year, while many uses of natural gas, residential space heating for example, are seasonal. Natural gas storage plays a critical role in balancing the seasonal demand with relatively constant supply, and the data collected in the semi-annual storage report provides important information about natural gas pipelines' ability to affect the prices shippers can obtain from consumers.

Improved storage technology and the increased use of natural gas in industry and electric generation have helped transform the storage market since 1992. There has been a sharp increase in demand for natural gas outside of the traditional winter months. Withdrawals and injections, instead of occurring on a uniform annual schedule based on heating needs, now occur dynamically year-round in response to market forces.

**Transportation by Interstate Pipelines**

In 18 CFR 284.102(e) the Commission requires interstate pipelines to obtain proper certification in order to ship natural gas on behalf of intrastate pipelines and local distribution

<sup>1</sup> On September 15, 2011 the Commission issued a Notice of Proposed Rulemaking in docket no. RM11-4 proposing to delete the semi-annual storage report for interstate and intrastate pipelines. OMB has reviewed the proposal and is withholding final approval until the final rule. Because the FERC-549 collection (including the semi-annual storage report for interstate pipelines) has an expiration date of 12/31/2011 the Commission seeking for renewal of the collection expecting that this collection will likely be modified by a final rule at a later date.
