**SUPPLEMENTARY INFORMATION:**  
**Title:** Generic Clearance for Consumer Complaint and Information Collection Systems.

**OMB Control Number:** 3710–XXX.

**Abstract:** Over the next three years, the CFPB anticipates undertaking a variety of service delivery-focused activities under the Dodd-Frank Act. These activities, which include consumer complaint and inquiry processing, information-sharing with stakeholders, and complaint monitoring,

require interrelated processes, or systems, that are responsive to stakeholders’ needs, sensitive to changes in the consumer market, and subject to iterative testing. Since these systems will use similar methods for information collection or otherwise share common elements, the CFPB is proposing a generic clearance for intake forms, response forms and feedback collections. The streamlined process of the generic clearance will allow the CFPB to implement these systems and meet the obligations of the PRA without the delays of the normal clearance process. The CFPB’s Consumer Complaint and Information Collection Systems’ generic information collection burden estimates will consist of the burden attributable to: (1) Consumer complaint and inquiry intake, (2) stakeholder feedback collection, (3) consumer complaint and inquiry tracking, and (4) consumer complaint referral programming. An approved set of collection questions and fields associated with the pilot intake form (OMB Control No. 1505–0236) and a proposed set associated with the standard Consumer Response Intake Form (76 FR 38,458 (June 30, 2011)) will serve as the initial models for the collections proposed under a generic information collection request. The CFPB will only undertake a new collection under this generic clearance if the OMB does not object to the CFPB’s proposal.

**Type of Review:** Generic Clearance Request.

**Affected Public:** Individuals and Households, Businesses and Organizations, State, Local or Tribal governments.

**Respondent’s Obligation:** Voluntary.

**Estimated Number of Respondents:** A preliminary estimate of aggregate burden for this generic clearance follows. As the statutory mandate behind the CFPB’s consumer complaint and information collection activities is largely unprecedented, the projections of the number of respondents have a high level of uncertainty.

Proposed individual collections	Estimated number of respondents	Average burden per response (minutes)	Estimated total annual burden hours requested
Web Complaint and Inquiry Intake .....	2,500,000	7	291,600
Paper/Telephone Complaint and Inquiry Intake .....	750,000	10	125,000

Complaint Tracking and Referral System .....	10,000	5	830
<b>Total</b> .....	<b>3,270,000</b>	<b>8</b>	<b>418,300</b>

*Request for Comments:* Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the CFPB, including whether the information will have practical utility; (b) the accuracy of the above estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology, such as, permitting electronic submissions of responses.

### National Agricultural Statistics Service

*Title:* Agricultural Resource Management, Chemical Use, and Post-harvest Chemical Use Surveys.

*OMB Control Number:* 0535-0218.

*Summary of Collection:* The primary objectives of the National Agricultural Statistics Service (NASS) are to provide the public with timely and reliable agricultural production and economic statistics, as well as environmental and specialty agricultural related statistics. Three surveys—the Agricultural Resource Management Study, the Fruit and Vegetable Chemical Use Surveys, and the Post-harvest Chemical Use Survey—are critical to NASS' ability to fulfill these objectives and to build the Congressionally mandated database on agricultural chemical use and related farm practices. NASS uses a variety of survey instruments to collect the

information in conjunction with these studies.

*Need and Use of the Information:* The Agricultural Resource Management Study provides a robust data base of information to address varied needs of policy makers. There are many uses for the information from this study including an evaluation of the safety of the Nation's food supply; input to the farm sector portion of the gross domestic product; and to provide a barometer on the financial condition of farm businesses. Data from the Fruit and Vegetable Chemical Use Surveys is used to assess the environmental and economic implications of various program and policies and the impact on agricultural producers and consumers. The results of the Post-harvest Chemical Use Survey are used by the Environmental Protection Agency (EPA) to develop Food Quality Protection Act risk assessments. Other organizations use this data to make sound regulatory decisions.

*Description of Respondents:* Farms.

*Number of Respondents:* 135,583.

*Frequency of Responses:* Reporting: Annually.

*Total Burden Hours:* 79,731.
