

Frequency of Response: Annual and biennial reporting requirements.

Obligation to Respond: Mandatory. Statutory authority for this collection of information is contained in 47 U.S.C. sections 201, 202, 203 and 204 of the Communications Act of 1934, as amended.

Total Annual Burden: 4,600 hours.

Annual Cost Burden: N/A.

Privacy Act Impact Assessment: N/A.

Nature and Extent of Confidentiality:

Respondents are not being asked to submit confidential information to the Commission. If the Commission requests respondents to submit information which respondents believe are confidential, respondents may request confidential treatment of such information under 47 CFR 0.459 of the Commission's rules.

Needs and Uses: The Commission is seeking Office of Management and Budget (OMB) approval for an extension of this information collection (no change in the reporting requirements). The Commission will submit this expiring information collection to the OMB after this 60 day comment period in order to obtain the three year clearance from them. There is an adjustment to the Commission's previous burden estimates. The Commission is now reporting 92 respondents and responses with an estimated time of 4,600 burden hours, which is an increase of 1,733 hours since the last time this was submitted to the OMB in 2009 for review and approval. The increase adjustment is a result of the increase in the number of respondents/responses, an increase in the number of respondents filing separately and an increase in the resulting total annual burden hours. The total number of respondents has increased by 45; from 47 to 92, which is a result of an increase in the number of price cap carriers as well as an increase in the number of respondents filing separately.

Sections 201, 202 and 203 of the Communications Act of 1934, as amended, require common carriers to establish just and reasonable charges, practices and regulations for their interstate telecommunications services they provide.

For services that are still covered under Section 203, tariff schedules containing charges, rates, rules and regulations must be filed with the Commission. If the FCC takes no action within the notice period, then the filing becomes effective. The Commission is granted broad authority to require the submission of data showing the value of the property used to provide the services, some of which are

automatically required by its rules and some of which can be required through individual requests. All filings that become effective are considered legal but only those filed pursuant to Section 204(a)(3) of the Act are deemed lawful.

For services that are detariffed, no tariffs are filed at the FCC and determination of reasonableness and any unreasonable discrimination is generally addressed through the complaint process. Incumbent local exchange carriers (ILECs) can make a voluntary tariff filing at any time, but are required to update rates annually or biennially. See 47 CFR 69.3 of the Commission's rules.

The Commission has developed standardized Tariff Review Plans (TRPs) which set forth the summary material ILECs file to support revisions to the rates in their interstate access service tariffs. The TRPs display basic data on rate development in a consistent manner, thereby facilitating review of the ILEC rate revisions by the Commission and interested parties. The TRPs have served this purpose effectively in the past years.

Incentive-based regulation (price caps) was developed by the Commission to simplify the process of determining the reasonableness of rates or rate restructures for those ILECs subject to price caps. Supporting material requirements for price cap ILECs qualifying for pricing flexibility have been eliminated. In addition, ILECs having 50,000 or fewer access lines do not have to file any supporting material unless requested to do so.

opportunity to comment on the following information collection(s). The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number.

DATES: Persons wishing to comment on this information collection should submit comments January 3, 2012. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

Section 90.176 requires each Private Land Mobile frequency coordinator to provide, within one business day, a listing of their frequency recommendations to all other frequency coordinators in their respective pool, and if requested, an engineering analysis. Any method can be used to ensure this compliance with the "one business day requirement" and must provide, at a minimum, the name of the applicant; frequency or frequencies recommended; antenna locations and heights; the effective radiated power; the type(s) of emissions; the description of the service area; and the date and time of the recommendation. If a conflict in recommendations arises, the affected coordinators are jointly responsible for taking action to resolve the conflict, up to and including notifying the Commission that an application may have to be returned.

This requirement seeks to avoid situations where harmful interference is created because two or more coordinators recommend the same frequency in the same area at approximately the same time to different applicants.
