

expand from a single focus on lead poisoning prevention to a coordinated, comprehensive, and systematic approach to eliminating multiple housing-related health hazards.

HHLPSS builds upon previous efforts by the NBLSS. While the earlier NBLSS was focused on homes of children less

than six years old, the new HHLPSS, upon approval, will replace the NBLSS and will enable flexibility to evaluate all homes, regardless of the presence of children < age 6 years. In addition, replacement of NBLSS with HHLPSS instead of a modification is necessary because the scope and methods of data

collection by the funded state and local programs can be much different (e.g., housing inspections vs. report of blood lead levels from a laboratory).

There is no cost to respondents other than their time. The total estimated annual burden hours equals 640.

ESTIMATED ANNUALIZED BURDEN TABLE

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
State and Local Health Departments	Healthy Homes and Lead Poisoning Surveillance Variables (HHLPSS).	40	4	4

Dated: November 4, 2011.

Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 639-5960 or send an email to omb@cdc.gov. Send written comments to CDC Desk Officer, Office of Management and Budget, Washington, DC or by fax to (202) 359-5806. Written comments should be received within 30 days of this notice.

Proposed Project

Evaluation of Enhanced Implementation of the “Learn the Signs. Act Early.” Campaign in 4 Target Sites.—New—National Center on Birth Defects and Developmental Disabilities (NCBDDD), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

CDC’s most recent data show that an average of one in 110 children has an autism spectrum disorder in 2006. Today, autism is recognized in many circles as an “epidemic” or “crisis” that is directly impacting the lives of many

millions of Americans. All the communities participating in both the 2002 and 2006 studies observed an increase in identified ASD prevalence ranging from 27 percent to 95 percent, with an average increase of 57 percent. No single factor explains the changes in identified ASD prevalence over the time period studied. Although some of the increases are due to better detection, a true increase in risk cannot be ruled out.

Evidence has shown that early treatment can have a significant positive impact on the long-term outcome for children with an autism spectrum disorder. Early treatment, however, generally relies on the age at which a diagnosis can be made, thus pushing early identification research into a category of high public health priority (Pierce, *et al*, 2010).

To address this important health issue, the CDC has launched the “Learn the Signs. Act Early.” national campaign and developed partnerships with national autism and health care professional organizations to promote awareness of early childhood developmental milestones and increase early action on developmental concerns.

This request for data collection is for the evaluation of the “Learn the Signs. Act Early.” campaign implemented at a local level among four grantees. The proposed evaluation will assess the reach and awareness to determine if the proposed strategies and activities are effectively reaching the target populations. The evaluation will be accomplished by a pre-implementation survey and a post-implementation survey of parents of children ages 0–60 months in the target areas for each of the four grantees.

The surveys will capture information from the program’s target audience to determine campaign reach and exposure among this group, as well as identify changes in knowledge, awareness, and

behavior related to the campaign and monitoring early child development. The project aims to collect 250 completed parent surveys from each of the 4 sites prior to campaign implementation and after campaign implementation (for a total of 1,000 completed surveys). It is estimated that 1200 respondents will have to be screened in order to recruit 1000 total survey participants.

Participants will be recruited to participate in one of two surveys that will be conducted in the following four target areas:

- *Washington*: Yakima, Benton, Franklin, and Walla Walla counties
- *Missouri*: St. Louis City
- *Utah*: Salt Lake County
- *Alaska*: Anchorage, Palmer, Wasilla, Homer, Kenai

The information collected from the surveys is not intended to provide statistical data for publication. The purpose of this activity is solely to assess the impact of the “Learn the Signs. Act Early.” campaign in four target areas. The data collection will use a consistent format and comply with requirements under the Public Health Service Act, Executive Order 12862, and GPRA.

Without this information collection, CDC will be hampered in successfully carrying out its mission of providing high quality programs and services to populations served. Failure to collect this data would compromise efforts to reduce the impact of ASDs and other developmental disabilities on the U.S. population.

Data collection materials will be available in both English and Spanish. This request is being submitted to obtain OMB clearance for two years. There is no cost to the respondents other than their time to participate. The total annualized burden for this project is 454 hours.

ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Screener	1200	1	3/60	60
Pre-Implementation Survey	1000	1	10/60	167
Screener	1200	1	3/60	60
Post-Implementation Survey	1000	1	10/60	167
Total				454

DEPARTMENT OF HOMELAND SECURITY

[Docket No. DHS-2011-0112]

The Critical Infrastructure Partnership Advisory Council (CIPAC)

AGENCY: National Protection and Programs Directorate, DHS.
ACTION: Quarterly CIPAC membership update.

SUMMARY: The Department of Homeland Security (DHS) announced the establishment of the Critical Infrastructure Partnership Advisory Council (CIPAC) by notice published in the **Federal Register** Notice (71 FR 14930-14933) dated March 24, 2006. That notice identified the purpose of CIPAC as well as its membership. This notice provides: (i) The quarterly CIPAC membership update; (ii) instructions on how the public can obtain the CIPAC membership roster and other information on the Council; and, (iii) information on recently completed CIPAC meetings.

FOR FURTHER INFORMATION CONTACT: Nancy J. Wong, Director, Partnership Programs and Information Sharing Office, Partnership and Outreach Division, Office of Infrastructure Protection, National Protection and Programs Directorate, U.S. Department of Homeland Security, 245 Murray Lane, Mail Stop 0607, Arlington, VA 20598-0607, by telephone (703) 235-3999 or via email at CIPAC@dhs.gov.

Responsible DHS Official: Nancy J. Wong, Director Partnership Programs and Information Sharing Office, Partnership and Outreach Division, Office of Infrastructure Protection, National Protection and Programs Directorate, U.S. Department of

Homeland Security, 245 Murray Lane, Mail Stop 0607, Arlington, VA 20598-0607, by telephone (703) 235-3999 or via email at CIPAC@dhs.gov.

SUPPLEMENTARY INFORMATION:
Purpose and Activity: The CIPAC facilitates interaction between government officials and representatives of the community of owners and/or operators for each of the critical infrastructure sectors defined by Homeland Security Presidential Directive 7 (HSPD-7) and identified in the National Infrastructure Protection Plan (NIPP). The scope of activities covered by the CIPAC includes planning; coordinating among government and critical infrastructure owner/operator security partners; implementing security program initiatives; conducting operational activities related to critical infrastructure protection security measures, incident response, recovery, infrastructure resilience, reconstituting critical infrastructure assets and systems for both man-made as well as naturally occurring events; and sharing threat, vulnerability, risk mitigation, and infrastructure continuity information.

Organizational Structure: CIPAC members are organized into eighteen (18) critical infrastructure sectors. Within all of the sectors containing critical infrastructure owners/operators, there generally exists a Sector Coordinating Council (SCC) that includes critical infrastructure owners and/or operators or their representative trade associations. Each of the sectors also has a Government Coordinating Council (GCC) whose membership includes a lead Federal agency that is defined as the Sector Specific Agency (SSA), and all relevant Federal, state, local, Tribal, and/or territorial government agencies (or their representative bodies) whose mission interests also involve the scope of the CIPAC activities for that particular sector.

CIPAC Membership: CIPAC Membership may include:
 (i) Critical infrastructure owner and/or operator members of an SCC;

(ii) Trade association members who are members of an SCC representing the interests of critical infrastructure owners and/or operators;
 (iii) Each sector's Government Coordinating Council (GCC) members; and,
 (iv) State, local, Tribal, and territorial governmental officials comprising the DHS State, Local, Tribal, and Territorial GCC.

CIPAC Membership Roster and Council Information: The current roster of CIPAC membership is published on the CIPAC Web site (<http://www.dhs.gov/cipac>) and is updated as the CIPAC membership changes. Members of the public may visit the CIPAC Web site at any time to obtain current CIPAC membership as well as the current and historic list of CIPAC meetings and agendas.

Dated: November 4, 2011.
Nancy Wong,
Designated Federal Officer for the CIPAC.
