1:25 p.m. Panel I: Identifying Priorities
for NERC Activities

Presentations: NERC will be invited to provide an update on its priorities as identified in the February 8, 2011 Reliability Technical Conference. Panelists will be invited to express their general views on how NERC's prioritization tool has been working. Has NERC addressed concerns raised at the February 8, 2011 Reliability Technical Conference. Panelists will be asked to address some or all of the following:

a. What are the most critical reliability issues and/or standards development initiatives that needed to be addressed in 2011 and 2012? What is the status of the priorities identified by NERC at the

February technical conference? Has NERC's prioritization tool been useful?

b. One of the priorities was improving the compliance and enforcement process. How is that being addressed?

c. What are the biggest challenges to addressing these priorities and/or completing these initiatives in an effective and timely manner? What next steps are appropriate to timely and effectively address the priorities discussed?

d. How do NERC and reliability standards development teams incorporate in new or re-ordered priorities regarding reliability standards into their work plans? How are emerging issues considered and are any becoming high priorities?

Panelists

- Gerry W. Cauley, President and Chief Executive Officer, North American Electric Reliability Corporation (NERC)
- Kevin Burke, Chairman, President and CEO, Consolidated Edison Inc., on behalf of Consolidated Edison and the Edison Electric Institute (EEI)

3:30 p.m. Panel II: Incorporating Lessons Learned into a More Reliable Grid

Presentations: Panelists will address how lessons learned are incorporated into NERC priorities. Panelists will be asked to address some or all of the following:

a. How do lessons learned from events analysis get disseminated to industry?

b. How do NERC's non-standards processes such as the Industry Alerts, Recommendations, Event Analysis, Essential Actions, Lessons Learned and Compliance Application Notices interact with the reliability standards? To what extent do these processes aid

in identifying important reliability matters that are not addressed under the existing Reliability Standards?

c. Is the alerts process getting the message out on issues of immediate importance?

d. How do you gauge whether industry is appropriately implementing NERC alerts or lessons learned from an event analysis?

e. Is there a feedback loop into the Reliability Standards development process to determine if there is a gap in the standards? If so, how has that been working? If not, should there be?
