Nature and Extent of Confidentiality: An assurance of confidentiality is not offered because this information collection does not require the collection of personally identifiable information (PII) from individuals by the Commission.

Privacy Impact Assessment: This information collection affects individuals or households, and thus there are impacts under the Privacy Act. However, a third party, the individual or household's VRS or IP Relay provider, collects the information that is related to individuals or households; and the Commission has no direct involvement in this collection. As such, the Commission is not required to complete a privacy impact assessment. Further, VRS and IP Relay providers generally have written privacy policies governing the treatment of information collected from their users, and the Commission expects that much of the information collected here would fall under those policies.

Needs and Uses: On August 4, 2011 the Commission released *Report and*

Order FCC 11–123, published at 76 FR 59551, September 27, 2011, adopting final rules—containing information collection requirements—designed to improve assignment of telephone numbers associated with Internet-based Telecommunications Relay Service (iTRS). Specifically, the final rules, described below are designed to promote the use of geographically appropriate local numbers, while ensuring that the deaf and hard-of-hearing community has access to toll free telephone numbers that is equivalent to access enjoyed by the hearing community.

Below are the new and revised information collection requirements contained in the *Report and Order*:

A. Provision of Routing Information

In addition to provisioning their registered users' routing information to the TRS Numbering Directory and maintaining such information in the database, the VRS and IP relay providers must: (1) Remove from the Internet-based TRS Numbering Directory any toll free number that has not been transferred to a subscription with a toll free service provider and for which the user is the subscriber of record, and (2) ensure that the toll free number of a user that is associated with a geographically appropriate NANP number will be associated with the same Uniform Resource Identifier URI as that geographically appropriate NANP telephone number.

B. User Notification

In addition to the information that the Commission previously instructed VRS and IP Relay providers to include in the consumer advisories, VRS and IP Relay providers must also include certain additional information in their consumer advisories under the *Report and Order*. Specifically, the consumer advisories must explain: (1) The process by which a VRS or IP Relay user may acquire a toll free number from a toll free service provider, or transfer control of a toll free number from a VRS or IP Relay provider to the user; and (2) the process by which persons holding a toll free number may have that number linked to their ten-digit telephone number in the TRS Numbering Directory.

C. Transferring Toll Free Numbers

VRS and IP Relay providers that have already assigned or provided a toll free number to a VRS or IP Relay user must, at the VRS or IP Relay user's request, facilitate the transfer of the toll free number to a toll free subscription with

a toll free service provider that is under the direct control of the user.

Federal Communications Commission.

SUPPLEMENTARY INFORMATION:

Background

On June 10, 2005, the U.S. Food and Drug Administration (FDA) requested that NMFS close an area of Federal waters off the coasts of New Hampshire and Massachusetts to fishing for bivalve shellfish intended for human consumption due to the presence in those waters of toxins (saxotoxins) that cause PSP. These toxins are produced by the alga *Alexandrium fundyense*,
