SUPPLEMENTARY INFORMATION: The purpose of the Proposed Project is to construct a 350 megawatt (MW) solar generation facility and associated infrastructure on the Reservation, including the development of a 12 kV transmission line and water line along with obtaining a grant of easement on BLM lands for an up to 500 kV transmission line and access roads. The primary need for the Proposed Project is to provide land lease income, sustainable renewable resources, new jobs and other benefits for the Tribe by using solar resources from Reservation lands where exposure to levels of high solar radiation exists. A secondary need for the Proposed Project is to assist utilities in meeting their renewable energy goals by providing electricity generated from solar resources from tribal lands that may be efficiently connected to existing transmission lines in a manner that minimizes adverse site impacts.

The proposed Federal action is the BIA approval of a solar energy ground lease and agreements entered into by the Tribe with KRoad Moapa Solar LLC (KRoad), and approval of rights-of-way (ROW) and easements for KRoad to construct, operate and maintain an up-to 350 MW solar photovoltaic electricity generating facility on the Reservation. The proposed Federal action also includes the BLM approval of the up-to 500 kV transmission line and access road ROW's within an existing utility corridor, of which 5.0 miles are located on the Reservation and 0.5 miles are located on BLM land just south of the Reservation boundary. The BIA and BLM will use the EIS to make decisions on the land lease and ROW applications under their respective jurisdiction while the EPA and USACE may use the document to make decisions under their authorities. The Tribe may also use the EIS to make decisions under their Tribal Environmental Policy Ordinance and the U.S. Fish and Wildlife Service may use the EIS to support its decision under the Endangered Species Act.
