

changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR draft supporting statement available in the public docket provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

- Estimated total number of potential respondents: 1143.

- Frequency of response:

—Producers, importers, exporters of methyl bromide, laboratory suppliers, and distributors of QPS methyl bromide (Class I, Group VI substances) are to report to EPA quarterly (45 days after the end of each quarter).

—Exporters (of non-methyl bromide Class I substances), and persons that destroy and transform Class I controlled ODS are to report to EPA annually (45 days after the end of the control period).

—Persons wanting to transfer CFCs or who petition to import used Class I controlled substances are to submit reports to EPA on a transactional basis.

—All entities may be required to provide other such information that the Administrator may reasonably require to comply with requests from the Ozone Secretariat seeking information required by decisions taken by the Parties to the Montreal Protocol.

- Estimated total annual burden hours: 2583 hours.

- Estimated total annual costs: \$277,130. This includes an estimated burden cost of \$71,550 and an estimated cost of \$5,580 for capital investment or maintenance and operational costs.

Are there changes in the estimates from the last approval?

There is a decrease of 227 hours in the total estimated respondent burden compared with that identified in the EPA ICR 1432.29 which is currently approved by OMB. This decrease is due to the continued phaseout and decreased use of Class I controlled substances which subsequently reduces reporting obligations. For example, the exemption under the Montreal Protocol allowing for production and export of Class I controlled substances to developing countries for basic domestic needs expired in 2010. The burden and cost estimates for the Agency decreased due to revisions to the managerial review of reporting forms. Most reviews are done at the technical staff level. EPA

also now offers electronic reporting via the Agency's central data exchange (CDX) to the regulated community which has contributed to the reduction in burden for both the Agency as well as the regulated community.

What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Clean Water Act Section 303(d): Availability of List Decisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: This notice announces the availability of EPA's action identifying water quality limited segments and associated pollutants in Louisiana to be listed pursuant to Clean Water Act Section 303(d), and request for public comment. Section 303(d) requires that States submit and EPA approve or disapprove lists of waters for which existing technology-based pollution controls are not stringent enough to attain or maintain State water quality standards and for which total maximum daily loads (TMDLs) must be prepared.

On November 17, 2011, EPA partially approved and proposed to partially disapprove Louisiana's 2010 Section 303(d) submittal. Specifically, EPA approved Louisiana's listing of 410 waterbody pollutant combinations, and associated priority rankings. EPA proposed to disapprove Louisiana's decisions not to list three waterbodies. These three waterbodies were added by EPA because the applicable numeric water quality standards marine criterion

for dissolved oxygen was not attained in these segments.

EPA is providing the public the opportunity to review its proposed decisions to add the three waters to Louisiana's 2010 Section 303(d) List. EPA will consider public comments and if necessary amend its proposed action on the additional waterbodies identified for inclusion on Louisiana's Final 2010 Section 303(d) List.

DATES: Comments must be submitted in writing to EPA on or before December 30, 2011.

ADDRESSES: Comments on the decisions should be sent to Diane Smith, Environmental Protection Specialist, Water Quality Protection Division, U.S. Environmental Protection Agency Region 6, 1445 Ross Ave., Dallas, TX 75202-2733, telephone (214) 665-2145, facsimile (214) 665-6490, or email: smith.diane@epa.gov. Oral comments will not be considered. Copies of the documents which explain the rationale for EPA's decisions and a list of the 3 water quality limited segments for which EPA proposed disapproval of Louisiana's decisions not to list can be obtained at EPA Region 6's web site at <http://www.epa.gov/region6/water/npdes/tmdl/index.htm>, or by writing or calling Ms. Smith at the above address. Underlying documents from the administrative record for these decisions are available for public inspection at the above address. Please contact Ms. Smith to schedule an inspection.

FOR FURTHER INFORMATION CONTACT: Diane Smith at (214) 665-2145.

SUPPLEMENTARY INFORMATION: Section 303(d) of the Clean Water Act (CWA) requires that each State identify those waters for which existing technology-based pollution controls are not stringent enough to attain or maintain State water quality standards. For those waters, States are required to establish Total Maximum Daily Loads (TMDLs) according to a priority ranking. EPA's Water Quality Planning and Management regulations include requirements related to the implementation of Section 303(d) of the CWA (40 CFR 130.7). The regulations require States to identify water quality limited waters still requiring TMDLs every two years. The list of waters still needing TMDLs must also include priority rankings and must identify the waters targeted for TMDL development during the next two years (40 CFR 130.7). On March 31, 2000, EPA promulgated a revision to this regulation that waived the requirement for States to submit Section 303(d) lists in 2000 except in cases where a court

order, consent decree, or settlement agreement required EPA to take action on a list in 2000 (65 FR 17170).

Consistent with EPA's regulations, Louisiana submitted to EPA its listing decisions under Section 303(d) on January 13, 2011. On November 17, 2011, EPA approved Louisiana's listing of 410 water body-pollutant combinations and associated priority rankings. EPA proposed to disapprove Louisiana's decisions not to list three waterbodies. These three waterbodies were proposed for addition by EPA because the applicable numeric water quality standards marine criterion for dissolved oxygen was not attained in these segments. EPA solicits public comment on its identification of three additional waters for inclusion on Louisiana's 2010 Section 303(d) List.

Dated: November 17, 2011.

William K. (Bill) Honker,

Acting Director, Water Quality Protection Division.
