Proposed Project

The National Science Foundation (NSF) is an independent Federal agency created by the National Science Foundation Act of 1950, as amended (42 U.S.C. 1861–75). The Act states the purpose of the NSF is "to promote the progress of science; [and] to advance the national health, prosperity, and welfare by supporting research and education in all fields of science and engineering."

NSF has had a unique place in the Federal Government: It is responsible for the overall health of science and engineering across all disciplines. In contrast, other Federal agencies support research focused on specific missions such as health or defense. The Foundation also is committed to ensuring the nation's supply of scientists, engineers, and science and engineering educators. NSF funds research and education in most fields of science and engineering. It does this through grants and cooperative agreements to more than 2,000 colleges, universities, K–12 school systems, businesses, informal science organizations and other research organizations throughout the U.S. The Foundation accounts for about onefourth of Federal support to academic institutions for basic research.

NSF proposes to conduct a survey to determinate how NSF grantees identify, oversee, and manage financial conflicts of interest in research funded by NSF. This survey focuses on NSF's grantee's conflict of interest policies and procedures, and on any conflicts of interest that were identified and managed from April 1, 2007, through March 31, 2010.

By examining how NSF grantees have identified and managed their financial conflicts of interest, this survey will help the Foundation determine whether there are any areas for improvement in NSF's policies and guidelines.

Use of the Information

Analysis of the responses is necessary to determine whether there are any areas for improvement in NSF's policies and guidelines.

Respondents

Burden on the Public

The Foundation estimates about 175 responses at approximately 15 hours per response; this computes to approximately 2,625 burden hours annually.

NUCLEAR REGULATORY COMMISSION

[NRC-2011-0256]

Aging Management of Stainless Steel Structures and Components in Treated Borated Water

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft interim staff guidance; extension of comment period.

SUMMARY: On November 8, 2011 (76 FR 69292) the U.S. Nuclear Regulatory Commission (NRC) published in the Federal Register a request for public comment on Draft License Renewal Interim Staff Guidance (LR-ISG), LR-ISG-2011-01, "Aging Management of Stainless Steel Structures and Components in Treated Borated Water." This LR-ISG revises the guidance in the Standard Review Plan for Review of License Renewal Applications for Nuclear Power Plants (SRP-LR) and Generic Aging Lessons Learned (GALL) Report for the aging management of stainless steel structures and components exposed to treated borated water. In response to a request from the Nuclear Energy Institute (NEI), the NRC is extending the public comment period until December 17, 2011.

DATES: The comment period has been extended and expires on December 17, 2011. Comments received after this date will be considered, if it is practical to do so, but the NRC staff is able to ensure consideration only for comments received on or before this date.

ADDRESSES: Please include Docket ID NRC–2011–0256 in the subject line of

your comments. The draft LR-ISG–2011–01 is available electronically under ADAMS Accession Number ML112360626. The GALL Report and SRP–LR are available under ADAMS Accession Nos. ML103490041 and ML103490036, respectively.

• Federal Rulemaking Web site: Public comments and supporting materials related to this notice can be found at http://www.regulations.gov by searching on Docket ID NRC-2011-0256.

• NRC's Interim Staff Guidance Web site: The LR–ISG documents are also available online under the "License Renewal" heading at http:// www.nrc.gov/reading-rm/doccollections/#int.

Background

The NRC issues LR-ISGs to communicate insights and lessons learned and to address emergent issues not covered in license renewal guidance documents, such as the GALL Report and SRP–LR. In this way, the NRC staff and stakeholders may use the guidance in an LR-ISG document before it is incorporated into a formal license renewal guidance document revision. The NRC staff issues LR-ISG in accordance with the LR-ISG Process, Revision 2 (ADAMS Accession No. ML100920158), for which a notice of availability was published in the Federal Register on June 22, 2010 (75 FR 35510).

The NRC staff has determined that existing guidance in the SRP-LR and GALL Report may not adequately address aging management of stainless steel structures and components exposed to treated borated water. Specifically, for pressurized water reactors, the guidance inappropriately credits boron as a corrosion inhibitor in place of other aging management activities. As a result, aging effects such as loss of material, cracking, and reduction of heat transfer may not be adequately managed. The staff has proposed to revise the SRP-LR and GALL Report to align the guidance for treated borated water with that for treated (non-borated) water. The

revisions include adding the One-Time Inspection Program to verify the effectiveness of the Water Chemistry Program to manage loss of material and cracking of stainless steel structures and components exposed to treated borated water and adding reduction of heat transfer due to fouling as an aging effect requiring management for stainless steel heat exchanger tubes exposed to treated borated water.

On November 8, 2011 (ADAMS Accession No. ML11325A119), the NRC requested public comments on draft LR– ISG–2011–01. By letter dated November 14, 2011, NEI requested a 15-day extension to the comment period. The NRC staff is granting NEI's request for an extension. The NRC staff believes that granting this extension will allow stakeholders a chance to better prepare their responses to LR–ISG–2011–01.

Proposed Action

By this action, the NRC is requesting public comments on draft LR–ISG– 2011–01. This LR–ISG proposes certain revisions to NRC guidance in the SRP– LR and GALL Report. The NRC staff will make a final determination regarding issuance of the LR–ISG after it considers any public comments received in response to this request.

Dated at Rockville, Maryland, this 22nd day of November, 2011.

For the Nuclear Regulatory Commission.

Melanie A. Galloway,

Acting Director, Division of License Renewal, Office of Nuclear Reactor Regulation. [FR Doc. 2011–30903 Filed 11–30–11; 8:45 am]
