In 1955, human remains representing, at minimum, fifteen individuals were recovered from site 21–SB–1, High Island Mound site/Black Tortoise Mound in Sibley County, MN, during archeological excavations conducted by L.A. Wilford of the University of Minnesota (UM395). No known individuals were identified. No associated funerary objects were present

Site 21–SB–1 consists of 52 mounds. In 1955, L.A. Wilford excavated Mound 32, which contained both an Oneota burial (intrusive to the Woodland mound) and Woodland burials. The Oneota burial was reported as ancestral to the present-day Otoe and Iowa tribes (64 FR 40040, Friday, July 23, 1999) and repatriated and reburied in 2001. These human remains are associated with the Woodland Tradition, a broad archeological classification which cannot be associated with any present-day Indian tribe.

At an unknown date, human remains representing, at minimum, one individual were recovered from Traverse County, MN, by unknown person(s). In 1999, Dave Nystuen of the Minnesota Historical Society transferred these remains to the Minnesota Office of the State Archaeologist. In 1999, the Minnesota Office of the State Archaeologist transferred these remains to the MIAC (H371). No known individual was identified. No associated funerary objects are present.

The condition of the human remains and dental patterns of attrition suggest an ancient pre-contact time period. Cranial morphology identifies the human remains as American Indian. These human remains have no archeological classification and cannot be associated with any present-day Indian tribe.

In 1937, human remains representing, at minimum, one individual were recovered from site 21–WR–19, the Waverly Lake site, Wright County, MN, by unknown person(s). In 1996, the human remains were donated to the Minnesota Office of the State Archaeologist and in 1997 transferred to the MIAC (H321). No known individual was identified. No associated funerary objects are present.

Site 21–WR–19 represents a group of mounds mapped by T.H. Lewis in 1881. In 1978, the Minnesota Statewide Archaeological Survey identified possible mound features in the area of site 21–WR–19, which suggest these human remains may be associated with the Woodland Tradition, a broad archeological classification which cannot be associated with any present-day Indian tribe.

In 1999, human remains representing, at minimum, one individual were discovered in a gravel pit in Dayton, Wright County, MN by unknown person(s). The Wright County Sheriff's Department recovered the human remains and transferred them to the Anoka County Coroner's Office/ Midwest Forensic Pathology. In 2000, the remains were transferred to the Minnesota Office of the State Archaeologist and site number 21–WR– 130, Dayton Quarry Burial was assigned to the location to document the presence of a burial site. In 2002, the human remains were transferred to the MIAC (H377). No known individual was identified. No associated funerary objects are present.

The context and condition of the human remains suggest a pre-contact archeological association. Residents of the land parcel report the presence of aboriginal habitation debris in the area of recovery. These human remains have no archeological classification and cannot be associated with any present-day Indian tribe.

Determinations Made by the Minnesota Indian Affairs Council

Officials of the Minnesota Indian Affairs Council have determined that:

- Based on non-destructive physical analysis and catalogue records, the human remains are Native American.
- Pursuant to 25 U.S.C. 3001(2), a relationship of shared group identity cannot be reasonably traced between the Native American human remains and any present-day Indian tribe.
- According to final judgments of the Indian Claims Commission, the land from which the Native American human remains and associated funerary objects were removed is the aboriginal land of The Tribes.
- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of 102 individuals of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(3)(A), the 41 objects described above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- Pursuant to 43 CFR 10.11(c)(1), the disposition of the human remains is to The Tribes.

Additional Requestors and Disposition

Representatives of any Indian tribe that believes itself to be culturally affiliated with the human remains or any other Indian tribe that believes it satisfies the criteria in 43 CFR 10.11(c)(1) should contact James L. (Jim) Jones, Cultural Resource Director, Minnesota Indian Affairs Council, 3801 Bemidji Avenue NW., Suite 5, Bemidji, MN 56601, telephone (218) 755–3223, before January 4, 2012. Disposition of the human remains to The Tribes may proceed after that date if no additional requestors come forward.

The Minnesota Indian Affairs Council is responsible for notifying The Tribes that this notice has been published.

Dated: November 29, 2011.

DEPARTMENT OF THE INTERIOR

National Park Service

[2253-665]

Notice of Inventory Completion: Minnesota Indian Affairs Council, Bemidji, MN

AGENCY: National Park Service, Interior. **ACTION:** Notice.

SUMMARY: The Minnesota Indian Affairs Council has completed an inventory of human remains in consultation with the appropriate Indian tribes, and has determined that there is no cultural affiliation between the remains and any present-day Indian tribe.

Representatives of any Indian tribe that believes itself to be culturally affiliated with the human remains may contact the Minnesota Indian Affairs Council. Disposition of the human remains to the Indian tribes stated below may occur if no additional requestors come forward.

DATES: Representatives of any Indian tribe that believes it has a cultural affiliation with the human remains should contact the Minnesota Indian Affairs Council at the address below by January 4, 2012.

ADDRESSES: James L. (Jim) Jones, Cultural Resource Director, Minnesota Indian Affairs Council, 3801 Bemidji Avenue NW., Suite 5, Bemidji, MN 56601, telephone (218) 755–3223.

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains in the possession of the Minnesota Indian Affairs Council (MIAC). The human remains were removed from Ramsey County, MN.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3) and 43 CFR 10.11(d).

The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains was made by the MIAC professional staff in consultation with representatives of the Flandreau Santee Sioux Tribe of South Dakota; Lower Sioux Indian Community in the State of Minnesota; Prairie Island Indian Community in the State of Minnesota; Santee Sioux Nation, Nebraska; Spirit Lake Tribe, North Dakota; and the Upper Sioux Community, Minnesota (hereinafter referred to as "The Tribes").

History and Description of the Remains

At an unknown date, human remains representing, at minimum, one individual were removed from Manitou/Spirit Island, White Bear Lake, in Ramsey County, MN, and donated to the Minnesota Historical Society by Capt. E. Bell (MHS ORR#48). The human remains were transferred to the MIAC in 1987. No known individuals were identified. No associated funerary objects are present.

The condition of the remains and the location of discovery suggest precontact/ancient American Indian affiliation. These human remains have no archeological classification and cannot be associated with any present-day Indian tribe.

In 1997, human remains representing, at minimum, one individual were recovered from site 21–RA–44, at the base of a bluff along the Mississippi River by hikers. The human remains were recovered by the Saint Paul Police Department and turned over to the Ramsey County Medical Examiner's Office (RCMEO 97–1359) for identification. In 1997, the human remains were transferred to the MIAC (H335). No known individuals were identified. No associated funerary objects are present.

The condition of the remains and dental patterns of attrition identify these human remains as pre-contact American Indian affiliation. These human remains have no archeological classification and cannot be associated with any present-day Indian tribe.

Determinations Made by the Minnesota Indian Affairs Council

Officials of the MIAC have determined that:

- Based on non-destructive physical analysis and catalogue records, the human remains are Native American.
- Pursuant to 25 U.S.C. 3001(2), a relationship of shared group identity cannot be reasonably traced between the Native American human remains and any present-day Indian tribe.
- According to final judgments of the Indian Claims Commission, the land from which the Native American human remains were removed is the aboriginal land of The Tribes
- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of two individuals of Native American ancestry.
- Pursuant to 43 CFR 10.11(c)(1), the disposition of the human remains is to The Tribes.

Additional Requestors and Disposition

Representatives of any Indian tribe that believes itself to be culturally affiliated with the human remains or any other Indian tribe that believes it satisfies the criteria in 43 CFR 10.11(c)(1) should contact James L. (Jim) Jones, Cultural Resource Director, Minnesota Indian Affairs Council, 3801 Bemidji Avenue NW., Suite 5, Bemidji, MN 56601, telephone (218) 755–3223, before January 4, 2012. Disposition of the human remains to The Tribes may proceed after that date if no additional requestors come forward.

The Minnesota Indian Affairs Council is responsible for notifying The Tribes that this notice has been published.

Dated: November 29, 2011.

The human remains were removed from Itasca County, MN.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3) and 43 CFR 10.11(d). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains was made by the MIAC professional staff in consultation with representatives of the Bois Forte Band (Nett Lake) of the Minnesota Chippewa Tribe, Minnesota; Leech Lake Band of the Minnesota Chippewa Tribe, Minnesota; Mille Lacs Band of the Minnesota Chippewa Tribe, Minnesota; Minnesota Chippewa Tribe, Minnesota; and the White Earth Band of Minnesota Chippewa Tribe, Minnesota (hereinafter referred to as "The Tribes").

History and Description of the Remains

At an unknown date, human remains representing, at minimum, one individual were recovered from the Big Fork River in Itasca County, MN. At an unknown date, Itasca County Sheriff John Muhar transferred the human remains to the Itasca County Historical Society. In 1985, the human remains were transferred to the MIAC (H108–1). No known individuals were identified. No associated funerary objects are present.

The condition of the remains and cranial morphology identify these human remains as pre-contact American Indian affiliation. These human remains
