

Quality; associations, such as Leading Age (formerly the American Association of Homes and Services for the Aging), National Center for Assisted Living, American Seniors Housing Association, and Assisted Living Federation of

America; universities; foundations; and other private sector organizations. Burden is estimated at 2 hours and 35 minutes per state, including time to verify contact information, to respond to a semi-structured telephone protocol,

and to develop the facility listing in an electronic format. One year clearance is requested. There is no cost to respondents other than their time to participate. The total estimated annual burden hours are 132.

ESTIMATED ANNUALIZED BURDEN TABLE

Type of respondent	Form name	Number of respondents	Number of responses/respondent	Average burden/response (in hours)
State Government Representatives .....	Contact info verification .....	51	1	5/60
State Government Representatives .....	Telephone protocol .....	51	1	30/60
State Government Representatives .....	Electronic file development .....	51	1	2

Date: November 30, 2011.

**Proposed Data Collections Submitted for Public Comment and Recommendations**

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call (404) 639-5960 and send comments to Daniel Holcomb, CDC Reports Clearance Officer, 1600 Clifton Road, MS-D74, Atlanta, GA 30333 or send an email to *omb@cdc.gov*.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and

clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Written comments should be received within 60 days of this notice.

**Proposed Project**

The National Health and Nutrition Examination Survey (NHANES) 1999-2010 Birth Certificate Linkage Study—Pregnant Women—New—National Center for Health Statistics (NCHS), Centers for Disease Control and Prevention (CDC).

*Background and Brief Description*

Section 306 of the Public Health Service (PHS) Act (42 U.S.C. 242k), as amended, authorizes that the Secretary of Health and Human Services (DHHS), acting through NCHS, shall collect statistics on the extent and nature of illness and disability; environmental, social and other health hazards; and determinants of health of the population of the United States.

Division of Health and Nutrition Examination Surveys (DHANES) proposes to re-contact women who were pregnant at the time of their participation in NHANES in 1999-2010 and ask permission to link their data to the child's birth certificate data, for the birth that resulted after the survey. This study is funded in collaboration with CDC's National Center for Chronic Disease Prevention and Health Promotion, Division of Reproductive Health (DRH). Participation is completely voluntary and confidential.

NHANES was conducted periodically between 1970 and 1994, and continuously since 1999 by the NCHS. A supplemental sample of pregnant women was selected in NHANES from 1999-2006. This resulted in a total of 1,350 pregnant women. Although this supplemental sample was discontinued after 2006, there are an estimated 150 pregnant women in the NHANES sample for the years 2007-10. This results in a total estimate of 1,500 women for this project.

The NHANES only collected information about the pregnant women at the time of interview. Having information on their children's birth certificates and birth outcomes could provide insight into issues related to maternal and child health. No other survey has the physical examination and nutritional data that NHANES collects on pregnant women.

Consents for these projects will be sent to the appropriate U.S. states, local areas, or territories, where the birth certificate retrievals will then be conducted. Electronic retrieval per records is estimated at five minutes.

NHANES data users include the U.S. Congress; the World Health Organization; numerous Federal agencies such as the National Institutes of Health, the Environmental Protection Agency, and the United States Department of Agriculture; private groups such as the American Heart Association; schools of public health; private businesses; individual practitioners; and administrators. This submission requests approval for two years. There is no cost to respondents other than their time. The total estimated annual burden is 312 hours.

## ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden hours
Women who were pregnant during NHANES 1999–2010.	Health Questionnaire/Consent Form	750	1	20/60	250
State/local vital statistics staff (one per U.S. State or Territory).	Locate and transmit birth certificates	57	13	5/60	62
Total .....	.....	.....	.....	.....	312

November 30, 2011.

**Agency Forms Undergoing Paperwork Reduction Act Review**

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 639–5960 or send an email to [omb@cdc.gov](mailto:omb@cdc.gov). Send written comments to CDC Desk Officer, Office of Management and Budget, Washington, DC 20503 or by fax to (202) 395–5806. Written comments should be received within 30 days of this notice.

**Proposed Project**

Data Collection for Evaluation of Education, Communication, and Training Activities—New—National Center for Emerging and Zoonotic Infectious Diseases (NCEZID), Division of Global Migration and Quarantine (DGMQ), Centers for Disease Control and Prevention (CDC).

*Background and Brief Description*

The Centers for Disease Control and Prevention (CDC) Division of Global Migration and Quarantine (DGMQ) is requesting a three year approval for a generic clearance to conduct evaluation research in order to plan and implement health communication, education, and training activities to improve health and prevent the spread of disease. These

activities include communicating with international travelers and other mobile populations, training healthcare providers, and educating public health departments and other federal partners.

The information collection for which approval is sought is in accordance with DGMQ's mission to reduce morbidity and mortality among immigrants, refugees, travelers, expatriates, and other globally mobile populations, and to prevent the introduction, transmission, or spread of communicable diseases from foreign countries into the United States. This mission is supported by delegated legal authorities.

First, section 361 of the Public Health Service (PHS) Act (42 U.S.C. 264) (Attachment A) authorizes the Secretary of Health and Human Services (HHS) to make and enforce regulations necessary to prevent the introduction, transmission or spread of communicable diseases from foreign countries or possessions into the United States and from one state or possession into any other state or possession. These regulations are codified in 42 *Code of Federal Regulations* (CFR) parts 70 and 71.

In addition, the Secretary of Health and Human Services also has the legal authority to establish regulations outlining the requirements for the medical examination of aliens before they may be admitted into the United States. This authority is provided under Section 212(a)(1)(A) of the Immigration and Nationality Act (8 U.S.C. 1182(a)(1)(A)) (Attachment B) and Section 325 of the Public Health Service Act (Attachment C). These regulations are codified in 42 CFR part 34, which establish requirements that determine whether aliens can be admitted into the United States.

Successful implementation of DGMQ's regulatory authority and public health mission as outlined above requires a variety of communication, training and educational activities involving staff, partners, mobile populations and the general public.

DGMQ conducts these activities in order to inform, educate and empower key audiences with respect to important public health issues.

This generic OMB clearance will allow DGMQ to quickly collect information about the knowledge, attitudes, and behaviors of key audiences (such as refugees, immigrants, migrants, international travelers, travel industry partners, healthcare providers, non-profit agencies, customs brokers and forwarders, schools, state and local health departments) to help improve and inform these activities during both routine and emergency public health events. This generic OMB clearance will help DGMQ continue to refine these efforts in a timely manner, and will be especially valuable for communication activities that must occur quickly in response to public health emergencies.

DGMQ staff will use a variety of data collection methods for this proposed project: interviews, focus groups, group discussions, surveys, and pre-post tests. Depending on the research questions and audiences involved, data may be gathered in-person, by telephone, online, or using some combination of these formats. Data may be collected in quantitative and/or qualitative forms. Numerous audience variables will be assessed under the auspices of this generic OMB clearance. These include, but are not limited to, knowledge, attitudes, beliefs, behavioral intentions, practices, behaviors, skills, self-efficacy, and information needs and sources. Insights gained from evaluation research will assist in the development, refinement, implementation, and demonstration of outcomes and impact of communication, education, and training activities.

The information being collected will not impose a cost burden on the respondents beyond that associated with their time to provide the required data. The total estimated annual burden is 22,166 hours.
