

practicable before the separated MSW is used as a feedstock for biofuel production. EPA has outlined registration requirements for producers of renewable fuel made from separated MSW in 80.1450(b)(1)(viii), including the requirement for submission of a separation plan. EPA has also developed supplemental questions to better understand where the recyclable materials will be diverted after separation, the recycle goals of the local community, and the existing recycling programs and infrastructure in the region. Fiberright provided responses to these supplemental questions in their plan (referenced in pages 13 to 16 of their plan). EPA solicits comments and information to assist EPA in evaluating the Fiberright separation plan for possible approval.

Although EPA's approval or disapproval of the Fiberright separation plan will not be conducted through rulemaking, and an opportunity for public comment is not legally required prior to EPA action on the plan, EPA is soliciting public comment at this time because the Fiberright separation plan is the first such plan to be submitted to EPA for approval. EPA believes that public comment on this first plan submission would be beneficial, but EPA may not seek public comment prior to approval or disapproval of future separation plan submissions.

The public is specifically invited to comment whether Fiberright's separation plan incorporates all of the elements required in the regulations and provides for the separation of recyclable cardboard, plastics, rubber, textiles, metals, and glass from MSW to the extent that is reasonably practicable.
