

Systems (GPS), time, and maintenance activity.

5. The Blue Force Tracker (BFT 1) System is used to denote a GPS enabled system that provides military commanders and forces with location information about military forces. The BFT is a subsystem of the Force XXI Battlefield Command Brigade and Below (FBCB2). The C-27J FBCB2 and BFT is integrated on other Ground and Aviation platforms such as the UH-60H, V-22, E-8, and AH-64D weapon systems. The FBCB2 BFT system consists of four subsystems: Mobile Tracking and Messaging, GPS, Network and Digital Group, and Electronic Data Manager (EDM). The system displays the location of the host vehicle on the computer's terrain-map display, along with the locations of other platforms in their respective locations. It can also be used to send and receive simple text and imagery messages. FBCB2 BFT has a mechanism for reporting the locations of enemy forces and other battlefield conditions.

6. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.
