

§ 12.4 [Amended]

■ 3. Amend § 12.4, in paragraph (d)(2), by removing the words “or highly erodible land” and adding, in their place, the words “on highly erodible land.”

■ 4. Amend § 12.5 as follows:

■ a. Revise paragraph (a)(5) to read as set forth below,

■ b. Add paragraph (a)(7) to read as set forth below,

■ c. Revise paragraph (b)(5)(i) to read as set forth below.

§ 12.5 Exemption.

(a) * * *

(5) *Good faith.* (i) No person will become ineligible under § 12.4 as a result of the failure of such person to apply a conservation system on highly erodible land if all of the following apply:

(A) FSA determines such person has acted in good faith and without the intent to violate the provisions of this part;

(B) NRCS determines that the person complies with paragraph (a)(5)(ii) of this section; and

(C) The good faith determination of the FSA county or State committee has been reviewed and approved by the applicable State Executive Director, with the technical concurrence of the State Conservationist; or district director, with the technical concurrence of the area conservationist.

(ii) A person who otherwise meets the requirements of paragraphs (a)(5)(i)(A) and (a)(5)(i)(C) of this section will be allowed a reasonable period of time, as determined by NRCS, but not to exceed one year, during which to implement the measures and practices necessary to be considered actively applying the person's conservation plan, as determined by USDA. If a person does not take the required corrective actions, the person may be determined to be ineligible for the crop year during which such actions were to be taken, as well as any subsequent crop year.

(iii) Notwithstanding the good-faith requirements of paragraph (a)(5)(i) of this section, if NRCS observes a possible compliance deficiency while providing on-site technical assistance, NRCS will provide to the responsible person, not later than 45 days after observing the possible violation, information regarding actions needed to comply with the plan and this subtitle. NRCS will provide this information in lieu of reporting the observation as a violation, if the responsible person attempts to correct the deficiencies as soon as practicable, as determined by NRCS, after receiving the information, but not

later than one year after receiving the information. If a person does not take the required corrective actions, the person may be determined to be ineligible for the crop year during which the compliance deficiencies occurred, as well as any subsequent crop year.

(iv) A person who meets the requirements of paragraphs (a)(5)(i) and (a)(5)(ii) of this section will, in lieu of the loss of all benefits specified under § 12.4(d) and (e) for such crop year, be subject to a reduction in benefits by an amount commensurate with the seriousness of the violation, as determined by FSA. The dollar amount of the reduction will be determined by FSA and may be based on the number of acres and the degree of erosion hazard for the area in violation, as determined by NRCS, or upon such other factors as FSA determines appropriate.

(v) Any person whose benefits are reduced in a crop year under paragraph (a)(5) of this section may be eligible for all of the benefits specified under § 12.4(d) and (e) for any subsequent crop year if, prior to the beginning of the subsequent crop year, NRCS determines that such person is actively applying a conservation plan according to the schedule specified in the plan on all highly erodible land planted to an agricultural commodity or designated as conservation use.

* * * * *

(7) *Technical and minor violations.* Notwithstanding any other provisions of this part, a reduction in benefits in an amount commensurate with the seriousness of the violation, as determined by FSA, and consistent with paragraph (a)(5)(iv) of this section, will be applied if NRCS determines that a violation involving highly erodible land that would otherwise lead to a loss of benefits is both of the following:

(i) Technical and minor in nature; and
(ii) Has a minimal effect on the erosion control purposes of the conservation plan applicable to the land on which the violation occurred.

(b) * * *

(5) *Good faith violations.* (i) A person who is determined under § 12.4 of this part to be ineligible for benefits as the result of the production of an agricultural commodity on a wetland converted after December 23, 1985, or as the result of the conversion of a wetland after November 28, 1990, may regain eligibility for benefits if all of the following apply:

(A) FSA determines that such person acted in good faith and without the intent to violate the wetland provisions of this part; and

(B) NRCS determines that the person is implementing all practices in a mitigation plan within an agreed-to period, not to exceed one year; and

(C) The good faith determination of the FSA county or State committee has been reviewed and approved by the applicable State Executive Director, with the technical concurrence of the State Conservationist; or district director, with the technical concurrence of the area conservationist.

■ 5. In addition to the amendments set forth above, in the following places in part 12 remove the words “functions and values” and add in their place the words “values, acreage, and functions”:

■ a. § 12.1(b)(4),

■ b. § 12.4(c) each time it appears,

■ c. § 12.5(b)(1)(iii)(D), (b)(1)(vi)(A), (b)(1)(vi)(B), and (b)(4)(i) introductory text, (b)(4)(i)(E), (b)(4)(i)(F), (b)(4)(ii), and (b)(4)(iii).

Food Ingredients and Sources of Radiation Listed or Approved for Use in the Production of Meat and Poultry Products; Technical Amendment

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Final rule; technical amendment.

SUMMARY: This document contains technical amendments to the final labeling regulations that were published in the **Federal Register** on December 23, 1999. The regulations related to harmonizing and improving the efficiency of the procedures used by the Food Safety and Inspection Service (FSIS) and the Food and Drug Administration (FDA) for reviewing and listing the food ingredients and sources of radiation listed or approved for use in the production of meat and poultry products.

DATES: December 30, 2011.

FOR FURTHER INFORMATION CONTACT: Victoria Levine, Program Analyst, Policy Issuance Division, Office of Policy and Program Development, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250; (202) 720-5627; Fax (202) 690-0486.

SUPPLEMENTARY INFORMATION:

Background

The regulations that are the subject of these technical amendments were published on December 23, 1999, in a final rule titled "Food Ingredients and Sources of Radiation Listed or Approved for Use in the Production of Meat and Poultry Products" (64 FR 72168). Among other things, this final rule consolidated various existing regulations on food ingredients and sources of radiation into a single new part, 9 CFR part 424, applicable to both meat and poultry establishments. Specifically, it combined the separate listings of food ingredients approved for use in meat and poultry products contained in 9 CFR 318.7 and 9 CFR 381.147 into a single table (9 CFR 424.21(c)). FSIS then removed §§ 318.7 and 381.147 from the meat and poultry products inspection regulations. The Agency did not, however, replace all of the references to §§ 318.7 and 381.147 contained in the meat and poultry product inspection regulations with a reference to § 424.21(c), the correct citation.

As published, the final regulations contain this error in several locations and thus needs to be corrected. Therefore, FSIS is replacing all references to §§ 318.7 and 381.147 contained in the meat and poultry product inspection regulations with a reference to the correct section, § 424.21(c).

AP1000 Design Certification Amendment

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC or Commission) is amending its regulations to certify an amendment to the AP1000 standard plant design. The amendment replaces the combined license (COL) information items and design acceptance criteria (DAC) with specific design information, addresses the effects of the impact of a large commercial aircraft, incorporates design improvements, and increases standardization of the design. This action is necessary so that applicants or licensees intending to construct and operate an AP1000 design may do so by referencing this regulation (AP1000 design certification rule (DCR)), and need not demonstrate in their applications the safety of the certified design as amended. The applicant for

this amendment to the AP1000 design is Westinghouse Electric Company, LLC (Westinghouse).

DATES: The effective date of this rule is December 30, 2011. The incorporation by reference of certain material specified in this regulation is approved by the Director of the Office of the Federal Register as of December 30, 2011. I. Background

Title 10 of the Code of Federal Regulations (10 CFR), Part 52, "Licenses, Certifications, and Approvals for Nuclear Power Plants," Subpart B, presents the process for obtaining standard design certifications. Section 52.63, "Finality of standard design certifications," provides criteria for determining when the Commission may amend the certification information for a previously certified standard design in response to a request for amendment from any person.

The NRC originally approved the AP1000 design certification in a final rule in 2006 (71 FR 4464; January 27, 2006). The final AP1000 DCR incorporates by reference Revision 15 of the design control document (DCD) (ADAMS Accession No. ML053460400), which describes the AP1000 certified design. During its initial certification of the AP1000 design, the NRC issued a final safety evaluation report (FSER) for the AP1000 as NUREG-1793, "Final Safety Evaluation Report Related to Certification of the AP1000 Standard Design," in September 2004 (ADAMS Accession No. ML043570339) and Supplement No. 1 to NUREG-1793 (ADAMS Accession No. ML053410203).

From March 2006 through May 2007, NuStart Energy Development, LLC (NuStart)¹ and Westinghouse provided the NRC with a number of technical reports (TRs) for pre-application review of a possible amendment to the approved AP1000 certified design, in order to: (1) close specific, generically applicable COL information items (information to be supplied by COL
