

ACTION: Notice of determination.

SUMMARY: Section 423(c) of the Tax Reform Act of 1986, as amended (19 U.S.C. 2703 note), requires the United States International Trade Commission to determine annually the amount (expressed in gallons) that is equal to 7 percent of the U.S. domestic market for fuel ethyl alcohol during the 12-month period ending on the preceding September 30. This determination is to be used to establish the “base quantity” of imports of fuel ethyl alcohol with a zero percent local feedstock requirement that can be imported from U.S. insular possessions or CBERA-beneficiary countries. The base quantity to be used by U.S. Customs and Border Protection in the administration of the law is the greater of 60 million gallons or 7 percent of U.S. consumption, as determined by the Commission.

For the 12-month period ending September 30, 2011, the Commission has determined the level of U.S. consumption of fuel ethyl alcohol to be 12.955 billion gallons; 7 percent of this amount is 906.9 million gallons (these figures have been rounded). Therefore, the base quantity for 2012 should be 906.9 million gallons. The Commission’s determination is based on official data of the U.S. Department of Energy.

ADDRESSES: All Commission offices, including the Commission’s hearing rooms, are located in the United States International Trade Commission Building, 500 E Street SW., Washington, DC. All written submissions should be addressed to the Secretary, United States International Trade Commission, 500 E Street SW., Washington, DC 20436. SUPPLEMENTARY INFORMATION: The information collected and compiled in the MLS program is used to satisfy the legislatively required reporting mandated by Clause (iii) of Section 309(2)(15)(a)(1)(A) of the Workforce Investment Act, which states that the Secretary of Labor shall oversee the development, maintenance, and continuous improvements of the program to measure the incidence of, industrial and geographical location of, and number of workers displaced by, permanent layoffs and plant closings. In addition to the BLS uses of MLS data, such data are used by Congress, the Executive Branch, the business, labor, and academic communities, SWAs, and the U.S. Department of Labor (DOL) for both macro- and microeconomic analysis, including specific labor market studies geared towards manpower assistance and development. Moreover, State agencies use the MLS data in various ways, including the identification of geographic areas in need of special manpower services; the identification of ailing or troubled industries; the identification of specific employers needing assistance; the targeting of outreach activities for the unemployed; and the determination of those workers in need of temporary health care services. Respondents consist of entirely private, for-profit and not-for-profit establishments.
