Proposed Project: Teen Pregnancy Prevention Replication Evaluation Study: Baseline Data Collection—OMB No. OS-0990-NEW—The Office of Adolescent Health.

Abstract

The Office of Adolescent Health (OAH), Office of the Assistant Secretary for Health (OASH), U.S. Department of Health and Human Services (HHS), is overseeing and coordinating adolescent pregnancy prevention evaluation efforts as part of the Teen Pregnancy Prevention Initiative. OAH is working collaboratively with the Office of the Assistant Secretary for Planning and Evaluation (ASPE), the Centers for Disease Control and Prevention (CDC), and the Administration for Children and Families (ACF) on adolescent pregnancy prevention evaluation activities.

OAH will jointly oversee with ASPE the Teen Pregnancy Prevention Replication Evaluation Study (TPP Replication Study). The TPP Replication Study will be a random assignment evaluation which will determine the extent to which evidence-based program models that have been shown to be effective in an earlier trial, demonstrate effects on adolescent sexual risk

behavior and teenage pregnancy when they are replicated in similar and in different settings and for different populations.

The findings from this evaluation will be of interest to the general public, to policy-makers, and to organizations interested in teen pregnancy prevention.

OAH and ASPE are proposing baseline data collection activity as part of the TPP Replication Evaluation. Respondents will be asked to answer carefully selected questions about demographics and risk and protective factors related to teen pregnancy. Information from this data collection will be used to perform meaningful analysis to determine significant program effects.

Respondents: The survey data will be collected through private, self-administered questionnaires completed by study participants, i.e. adolescents assigned to a select school or community teen pregnancy prevention program or a control group. Surveys will be distributed and collected by trained professional staff.

Proposed Project

Fellowship Management System, OMB No. 0920-0765—Revision—Scientific Education and Professional Development Program Office (SEPDPO), Office of Surveillance, Epidemiology and Laboratory Services (OSELs), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

SEPDPO is requesting approval to revise and extend for three years; CDC's use of the online Fellowship Management System (FMS) to allow public health agencies and organizations to submit fellowship assignment proposals electronically, using FMS. The FMS system will continue to be used for its electronic

application and directory processes that allow individuals to apply to fellowships online, track applicant and alumni information.

The mission of SEPDPO is to provide leadership in public health training and education, and manage innovative, evidence-based programs to prepare the health workforce to meet public health challenges of the 21st century. Professionals in public health, epidemiology, medicine, economics, information science, veterinary medicine, nursing, public policy, and other related professions seek opportunities, through CDC fellowships, to broaden their knowledge, skills, and experience to improve the science and practice of public health. CDC fellows are assigned to state, tribal, local and territorial public health agencies; federal government agencies, including CDC, and HHS operational divisions, such as Indian Health Service; and to nongovernmental organizations, including academic institutions, tribal
