SUPPLEMENTARY INFORMATION:**I. Abstract**

In an effort to remain relevant to the marketplace and optimize our respective operations, the Commercial Service (CS), Manufacturing Extension Partnership (MEP), Census Bureau (Census), and Export-Import Bank (Ex-Im) have formed a project team to conduct market segmentation research and analysis. The market segmentation is a systematic approach for identifying clusters of companies with similar needs and behavior, and developing service offerings and sales/marketing approaches targeted at segments with the greatest return of investment. The purpose of this initiative is to gain market knowledge and generate statistically valid characterizations about the needs and buying behavior of exporting companies, with a particular focus on moderate exporters (those U.S. firms that currently export, but on a limited or reactive basis and whose international sales comprise less than 10% of total sales or whose international sales growth is less than 10% per year). From this research,

services, pricing, and messaging may be repositioned to address the exporting needs of small and medium-sized businesses.

A telephone survey was chosen over a web survey for the following reasons: (1) Since no databases of current or potential exporters is available from a governmental agency, the third party vendor will purchase a list from Dun and Bradstreet. The list contains contact information including phone numbers but not email addresses; (2) Firms do not offer email address databases, to obtain email addresses, the addresses must be manually extracted from a firm's Web site; (3) While web surveys are easier to administer and provide a convenient option for the respondent, they do not have as high a completion rate as phone surveys. This is especially true when there is no incentive for the respondent to complete the survey; and (4) The web survey has more potential to be completed by a respondent other than the targeted respondent, i.e. there is no way to verify who completed the survey.

II. Method of Collection

The CS will contract with a third party vendor (TBD) to conduct surveys to gain insight into the attitudes, needs, and behaviors of moderate exporters.

The third party vendor will recruit firms over the phone using lists obtained from other third party vendors. Data collection will be conducted during a telephone survey.
