Thus, DOL is performing a pilot study to investigate the efficacy of different data collection methods and to develop a survey instrument that is appropriate for the mining community. The primary research question is “What measures of voice and perceived non-compliance, combined with what modes of data collection, could be best used to track MSHA’s worker protection outreach activity?” This submission covers a set of 2-3 small-scale pilot data collections.

Data collection for this effort will employ 2-3 strategies: (1) Submission of
