SUPPLEMENTARY INFORMATION: On December 16, 2011, The U.S. Department of Energy (DOE) published a request for information (RFI) in the **Federal Register** (76 FR 71874) to initiate a rulemaking and data collection process to develop a potential test procedure and energy conservation standard for set-top boxes and network equipment. The RFI requested public comment from interested parties regarding specific as well as general questions and provided for the

submission of comments by February 14, 2012. Thereafter, AT&T Inc., on behalf of itself and its affiliates, requested an extension of the public comment period by a minimum of 30 days. AT&T stated that the additional time is necessary in order to fully evaluate and prepare the information requested in the RFI. AT&T noted that the information requested is complex and requires significant and essential input from AT&T engineering, product and technical personnel. Thus, AT&T asserted additional time is warranted to ensure quality responses to DOE's requests.

Based on AT&T's request, DOE believes that extending the comment period to allow additional time for interested parties to submit comments is appropriate. Therefore, DOE is extending the comment period until March 15, 2012 to provide interested parties additional time to prepare and submit comments. Accordingly, DOE will consider any comments received by March 15, 2012 to be timely submitted.

Issued in Washington, DC, on January 25, 2012.

Kathleen B. Hogan,

Deputy Assistant Secretary for Energy Efficiency, Energy Efficiency and Renewable Energy.

Persons interested in being placed on a mailing list for future NPRMs should contact the FAA’s Office of Rulemaking (202) 267–9677, to request a copy of

Advisory Circular No. 11–2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

The Proposal

This action proposes to amend Title 14, Code of Federal Regulations (14 CFR), Part 71 by establishing Class E airspace extending upward from 700 feet above the surface for new standard instrument approach procedures at Seven C’s Ranch Airport, Freer, TX. Controlled airspace is needed for the safety and management of IFR operations at the airport.

Class E airspace areas are published in Paragraph 6005 of FAA Order 7400.9V, dated August 9, 2011 and effective September 15, 2011, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA’s authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle 1, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency’s authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would establish controlled airspace at Seven C’s Ranch Airport, Freer, TX.
