SUPPLEMENTARY INFORMATION:

Title: Importation of Animal and Poultry Products (Milk and Eggs) Into the United States.

OMB Number: 0579–xxxx.

Type of Request: Approval of an information collection.

Abstract: Under the authority of the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), the Animal and Plant Health Inspection Service (APHIS) regulates the importation of certain animal and poultry products and byproducts to prevent the introduction of pests and diseases of livestock and poultry into the United States. These regulations are found at 9 CFR parts 94, 95, 96, and 122.

The regulations require a number of information collection activities to prevent the introduction of livestock and poultry diseases and pests via the importation of animal and poultry products and byproducts, including milk and eggs, into the United States. For milk and eggs, these include applications for approval/report of inspection of establishments to handle restricted animal byproducts or controlled materials; agreements for handling restricted imports of animal byproducts and controlled materials; certifications for eggs (other than hatching eggs); applications for the importation of eggs (other than hatching eggs) in specific cases; applications for the importation of small amounts of milk/milk products for analysis, testing, or examination; certificates of origin for milk and milk products from regions free of foot-and-mouth disease and rinderpest; and marking requirements for eggs from regions with exotic Newcastle disease.

These activities are currently approved by the Office of Management and Budget (OMB) under OMB control number 0579–0015, which also covers information collection activities for a variety of other animal and poultry products imported into the United States. We are proposing to separate the commodities previously approved under OMB control number 0579–0015 into individual collections to better reflect the commodities' specific collection activities and account for the information APHIS collects. Once approved by OMB, only information collection activities associated with the importation of nonfood animal and poultry products and byproducts will be under OMB control number 0579–0015. Information collection activities for milk and eggs and other commodities now covered under OMB control number 0579–0015 will receive new numbers when approved.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities related to the importation of milk and eggs for 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

- (3) Enhance the quality, utility, and clarity of the information to be collected; and

- (4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 1.998316334 hours per response.

Respondents: Processing operators; foreign national governments; foreign veterinarians; and importers and exporters.

Estimated annual number of respondents: 227.

Estimated annual number of responses per respondent: 900.0704846.
Estimated annual number of responses: 204,316.

Estimated total annual burden on respondents: 408,288 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 30th day of January 2012.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

SUPPLEMENTARY INFORMATION:

Title: Special Need Request Under the Plant Protection Act.

OMB Number: 0579-0291.

Type of Request: Extension of approval of an information collection.

Abstract: The Plant Protection Act (PPA, 7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to restrict the importation, entry, or interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests into the United States or their dissemination within the United States. This authority has been delegated to the Animal and Plant Health Inspection Service (APHIS), which administers regulations to implement the PPA. Regulations governing the interstate movement of plants, plant products, and other articles are contained in 7 CFR part 301, "Domestic Quarantine Notices."

The regulations in "Subpart-Preemption and Special Need Requests" allow States or political subdivisions of States to request approval from APHIS to impose prohibitions or restrictions on the movement in interstate commerce of specific articles that pose a plant health risk that are in addition to the prohibitions and restrictions imposed by APHIS. This process requires information collection activities, including a pest data detection survey with a pest risk analysis showing that a pest is not present in a State, or, if already present, the current distribution in the State, and that the pest would harm or injure the environment and/or agricultural resources of the State or political subdivision.

We are asking the Office of Management and Budget (OMB) to

approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 160 hours per response.

Respondents: State Governments.

Estimated annual number of respondents: 1.

Estimated annual number of responses per respondent: 1.

Estimated annual number of responses: 1.

Estimated total annual burden on respondents: 160 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.
