Electronic Access

This proposed rule is accessible via the Internet at the Office of the Federal Register's Web site at <http://www.gpoaccess.gov/index.html>. Background information and documents are available at the NMFS Office of Science and Technology Web site at <http://www.countmyfish.noaa.gov/index.html>.

Background

The proposed action is to amend regulations at 50 CFR 600.1400 that implement the National Saltwater

Angler Registry and State Exemption Program (NSAR). The rule established the requirements and procedures for anglers, spear fishers and for-hire fishing vessels to register with NMFS unless exempt from the registration requirement. The NSAR regulations also established the requirements and procedures whereby states may be designated as Exempted States. The anglers and for-hire fishing vessels licensed or registered by Exempted States, and those anglers and vessels that are not required to be licensed or registered under the laws of such states, are not required to register with NMFS.

Based on its experience with administering NSAR and input from states, NMFS has determined that minor revisions to the final rule are needed to clarify and update certain provisions in order to address the following objectives: (1) Eliminate duplicative permitting and registration requirements for holders of Main Hawaiian Islands Non-commercial Bottomfish Permits; (2) allow states that exempt minors under the age of 17 from the state license or registration requirements to be eligible for Exempted State designation; (3) allow the U.S. Virgin Islands to be designated as an Exempted State under the qualifying regional survey option of the rule; and (4) clarify and update various provisions of the rule.

A summary of the proposed changes and supporting statements follows:

Objective 1: Amend § 600.1405(b)(8) to provide that holders of Main Hawaiian Islands (MHI) Non-commercial Bottomfish Permits do not need to register under NSAR. The NMFS permit database already includes holders of MHI non-commercial bottomfish permits. This permit data can be added to the registry database without requiring the bottomfish permit holders to also register under NSAR. This would eliminate duplicative registration and fee payment by the approximately 50 holders of MHI Non-commercial bottom fish permits.

Objective 2: Amend § 600.1416(b)(1) to allow a state to be eligible for Exempted State designation even if its licensing program excludes anglers under age 17. During development of the original rule for NSAR, NMFS determined that it is not necessary to require that minors be included in the lists of persons that must be registered. This is because surveys that sample from angler registry lists will contact the households of registrants and can request information regarding the fishing activity of minors residing in the same households. All states have exceptions to state license or registration requirements for minors,
