SUPPLEMENTARY INFORMATION: PHMSA will be holding two public meetings designed to provide an open forum for exchanging information on the challenges associated with LDS and automatic/remote control valves. Specifically, these public meetings will facilitate individual panel discussions for the following objectives:

March 27

Improving Pipeline Leak Detection System Effectiveness

1. Inform the public, Federal and state regulatory agencies and legislators in Congress on state-of-the-art leak detection systems and the practical considerations involved with deploying and maintaining these systems.

2. Identify the constraints and issues with deploying systems on existing and new construction pipelines.

3. Collect public input that will help guide a PHMSA study investigating and documenting detection system challenges and considerations.

Information from that study will help craft a future report to Congress.

March 28

Understanding the Application of Automatic Control and Remote Control Valves

1. Gather and disseminate information on the state-of-the-art of automatic/remote control valve operations on the practical considerations involved with installing, operating and maintaining these valves.

2. Identify the constraints with deploying systems on existing versus new construction pipelines.

3. Collect public input that will help guide a PHMSA study investigating and documenting automatic control and remote control valve challenges and considerations. Information from that final report will help craft a future report to Congress.
