

Based on public comments and upon further internal review, it was determined that preparation of an EIS is necessary to address potentially significant effects of this proposed exchange. Information in the EA will be integrated into the Draft EIS.

Public scoping will help determine relevant issues that will influence the scope of the environmental analysis, including alternatives, and guide development of the EIS. At present, the BLM has identified potential effects of the proposed land exchange on cultural resources, Native American concerns, minerals, threatened and endangered species, invasive species, wild and scenic rivers, and non-motorized recreation access as preliminary issues for analysis.

All public comments submitted to the BLM about the EA released on July 27, 2010, will be retained, used to formulate alternatives and environmental analyses for the Draft EIS, and responded to in the Draft EIS. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can request that your personal identifying information be withheld from public review, there is no guarantee that we will be able to do so.
