

study (an in vivo fasting study) to demonstrate BE of generic nitroglycerin metered spray/sublingual products and generic nitroglycerin metered aerosol/sublingual products. In both of the revised draft guidances, FDA notes that even though we have not requested comparative in vitro studies, in vitro studies outlined in the 2002 guidance for industry, "Nasal Spray and Inhalation Solution, Suspension, and Spray Drug Products—Chemistry, Manufacturing, and Controls Documentation," should still be submitted for chemistry, manufacturing, and controls evaluation.

In December 2010, G. Pohl-Boskamp GmbH and Company KG (Pohl), manufacturer of the RLD Nitrolingual Pumpspray, filed a citizen petition challenging FDA's Draft Nitroglycerin Spray BE Recommendations of February 2010 (Docket No. FDA-2010-P-0648). FDA is reviewing the issues raised in the petition and will consider any comments on the Revised Draft Nitroglycerin Spray BE Recommendations before responding to Pohl's citizen petition and finalizing its BE recommendation for nitroglycerin metered spray/sublingual products.

These draft guidances are being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidances, when finalized, will represent the Agency's current thinking on the design of BE studies to support ANDAs for nitroglycerin metered spray/sublingual products and nitroglycerin metered aerosol/sublingual products. They do not create or confer any rights for or on any person and do not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statutes and regulations.
