Comment Sought on Potential Data for Connect America Fund Phase One Incremental Support

AGENCY: Federal Communications Commission.

ACTION: Notice; solicitation of comments.

SUMMARY: In this document, the Wireline Competition Bureau begins the process of implementing CAF Phase I by seeking comment on potential data that can be used as inputs to the equation

that will be used to determine distribution of the \$300 million, and on a proposed list of wire centers that would be eligible to receive CAF Phase I incremental support.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Public Notice in WC Docket Nos. 10-90 and 05-337; DA 12-137, released February 6, 2012. The complete text of this document is available for inspection and copying during normal business hours in the FCC Reference Information Center, Portals II, 445 12th Street SW, Room CY-A257, Washington, DC 20554. The document may also be purchased from the Commission's duplicating contractor, Best Copy and Printing, Inc., 445 12th Street, SW., Room CY-B402, Washington, DC 20554, telephone (800) 378-3160 or (202) 863-2893, facsimile (202) 863-2898, or via the Internet at <http://www.bcpibw.com>.

1. On November 18, 2011, the Commission released the *USF/ICC Transformation Order and FNPRM*, 76 FR 76623, December 8, 2011, which comprehensively reforms and modernizes the universal service and

intercarrier compensation systems. Among other things, the Commission established a transitional mechanism to distribute high cost universal service support to price cap carriers, known as the Connect America Fund Phase I ("CAF Phase I"). CAF Phase I incremental support is designed to provide an immediate boost to broadband deployment in areas that are unserved by any broadband provider.

2. In particular, in CAF Phase I, the Commission allocated up to \$300 million of additional, incremental universal service support to price cap carriers to be distributed using cost estimates based on the cost model the Commission used to determine High Cost Model Support previously. In adopting CAF Phase I, the Commission specified the process by which such support would be distributed, including the equation to be used to generate cost estimates, and delegated to the Wireline Competition Bureau (Bureau) the task of performing the calculations necessary to determine support amounts and selecting the necessary data.

3. In the Public Notice, the Bureau begins the process of implementing CAF Phase I by seeking comment on potential data that can be used as inputs to the equation that will be used to determine distribution of the \$300 million, and on a proposed list of wire centers that would be eligible to receive CAF Phase I incremental support.

4. First, Windstream Communications submitted, pursuant to our protective order, data, on a wire center basis, for each of the input variables used in the equation adopted by the Commission. Windstream proposes that we use these data to calculate support amounts. We seek comment on the data submitted by Windstream. Should we use these data as a basis for determining eligible support amounts in CAF Phase I? Should we use an alternate source? We encourage commenters with concerns about the data Windstream submitted to provide alternate data along with an explanation of how those data were derived, or to explain how we could obtain more appropriate data. We observe that Windstream's submission does not purport to provide data for all wire centers. For example, Windstream has not provided data for Alaska or the U.S. Territories. Although the Bureau has delegated authority to exclude such areas from the analysis for CAF Phase I incremental support if we conclude that we do not have appropriate data available, we invite commenters to provide appropriate data for such areas. We note that it might be possible for the Commission to develop input variables for some portion of the areas for which

Windstream did not provide data by, for example, applying statistical methods to estimate the number of business locations in a wire center given information about the number of residential locations and area of the wire center. We seek comment on the use of such an approach and whether we should use such derived data, provided that we are able to do so consistent with the Commission's expectation that the Bureau complete our work and announce support amounts on or before March 31, and that we believe that such data are sufficiently reliable.

5. Second, because the Commission limited CAF Phase I incremental support to price cap carriers, the Bureau must therefore exclude from our analysis the wire centers of non-price cap carriers. The Bureau, after conducting its own analysis based on the Telcordia LERG Routing Guide and Commission data for carriers' common control names, has developed a list of wire centers for price cap carriers, identified by the eight-digit Common Language Location Identifier (CLLI) code, which is available through EDOCS at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-12-137A2.xls. We seek comment on this proposed list. Are all wire centers of price cap carriers and rate-of-return areas affiliated with price cap carriers included? Are there any wire centers listed that should not be? We encourage commenters identifying errors or omissions in our proposed list to provide correct information along with an explanation of where those data were obtained, or explaining how we could obtain correct data.

6. Interested parties may file comments on or before March 19, 2012. All pleadings are to reference WC Docket Nos. 10-90 and 05-337. Comments may be filed using the Commission's Electronic Comment Filing System (ECFS), or by filing paper copies.

- *Electronic Filers:* Comments may be filed electronically using the Internet by accessing the ECFS: <http://fjallfoss.fcc.gov/ecfs2/>.

1. The Wireless Telecommunications and Wireline Competition Bureaus (the Bureaus) announce the availability of an

updated list, based on January 2012 American Roamer data, of census blocks potentially eligible for Mobility Fund Phase I support to be offered in Auction 901, as well as other updated information consistent with the revised list.

2. The Bureaus scheduled Auction 901 for September 27, 2012, and sought comment on procedures for the auction and certain program requirements in the *Auction 901* (Mobility Fund Phase I) *Comment Public Notice*, 77 FR 7152, February 10, 2012. The Bureaus concluded that they would identify census blocks eligible for the Mobility Fund Phase I support to be offered in Auction 901 based on an analysis of the most recent available American Roamer data, from January 2012. The Bureaus described the methodology for identifying potentially eligible blocks and provided a preliminary list of such blocks based on their analysis of October 2011 American Roamer data, in electronic format as Attachment A files, as well as certain summary information (based on the same data) in Attachments A and B released with the *Auction 901 Comment Public Notice*. Further, the Bureaus stated that upon completion of their analysis of the January 2012 American Roamer data they would provide an updated list of potentially eligible census blocks and related updated information for Attachments A and B.

3. The Bureaus have finished that analysis and are now providing the updated information. The updated list of potentially eligible blocks based on January 2012 American Roamer data is available in electronic format only, as separate Attachment A files at <http://wireless.fcc.gov/auctions/901/>. For each potentially eligible block, individually identified by its Federal Information Processing Series (FIPS) code, these files provide the population and area of the block; the associated state, county, tract, and block group; any associated Tribe and Tribal land; and the number of road miles in each road mile category.

4. Attachment A to the *Public Notice* provides a summary of the updated list of potentially eligible census blocks based on January 2012 American Roamer data. For each state and territory, Attachment A provides the total number of potentially eligible census blocks (unserved census blocks with road miles), the total number of block groups with such blocks, the total number of tracts with such blocks, the total number of counties with such blocks, and the number of cellular market areas (CMAs) with such blocks. For each state and territory, Attachment A also provides the total population and
