Proposed Information Collection Activity; Comment Request

Title: Understanding the Dynamics of Disconnection from Employment and Assistance.

OMB No.: New Collection.
Description: The Administration for Children and Families (ACF), U.S. Department of Health and Human Services (HHS), is proposing a data collection activity as part of the “Understanding the Dynamics of Disconnection from Employment and Assistance” research project. The purpose of this study is to improve understanding of low-income

individuals and families who are disconnected from employment and from public assistance and particularly those not receiving cash assistance through the Temporary Assistance for Needy Families (TANF) program. ACF is proposing to use a discussion guide to collect qualitative information from respondents who are low-income and disconnected from employment and public assistance. The guide will be used to interview respondents in order to learn about their experiences with disconnection. Topics will include recent employment and reasons for not working; use of public benefit programs and reasons for using or not using specific benefits; their financial circumstances and material well-being including the stability and sources of income, housing and living arrangements; their coping strategies for addressing their circumstances; and their views on potential pathways out of disconnectedness.

Respondents: Individuals who are low-income, disconnected from employment and public assistance, and living in low-income areas targeted by the study.
