**Title:** Final Authorization for Hazardous Waste Management Programs (Renewal) .

**ICR numbers:** EPA ICR No. 0969.09, OMB Control No. 2050-0041.

**ICR Status:** This ICR is scheduled to expire on February 29, 2012. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

**Abstract:** In order for a State to obtain final authorization for a State hazardous waste program or to revise its previously authorized program, it must submit an official application to the EPA Regional office for approval. The purpose of the application is to enable EPA to properly determine whether the State's program meets the requirements of § 3006 of RCRA.

A State with an approved program may voluntarily transfer program responsibilities to EPA by notifying EPA of the proposed transfer, as required by section 271.23. Further, EPA may withdraw a State's authorized program under section 271.23.

State program revision may be necessary when the controlling Federal or State statutory or regulatory authority is modified or supplemented. In the event that the State is revising its program by adopting new Federal requirements, the State shall prepare and submit modified revisions of the program description, Attorney General's statement, Memorandum of Agreement, or such other documents as EPA determines to be necessary. The State

shall inform EPA of any proposed modifications to its basic statutory or regulatory authority in accordance with section 271.21. If a State is proposing to transfer all or any part of any program from the approved State agency to any other agency, it must notify EPA in accordance with section 271.21 and submit revised organizational charts as required under section 271.6, in accordance with section 271.21. These paperwork requirements are mandatory under § 3006(a). EPA will use the information submitted by the State in order to determine whether the State's program meets the statutory and regulatory requirements for authorization.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 399 hours per response. For a State developing and revising a base program under RCRA and conducting public participation activities, EPA estimates that the reporting burden, with no associated recordkeeping burden, averages 0 hours per respondent. EPA does not expect any States to develop a program application or to submit a base program application over the three year period covered in this ICR. The reporting burden includes the time for developing each program component, allowing for public approval, and subsequently modifying and submitting the program to EPA. For a State submitting a revised program to EPA, the reporting burden is estimated to be 1,009 hours per year, with no associated recordkeeping burden. For a State whose program is being withdrawn, the reporting burden is estimated to average 207 hours, with no associated recordkeeping burden. EPA, however, does not expect that any State program will be withdrawn during the next three years.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

**Respondents/Affected Entities:** States.  
**Estimated Number of Respondents:**

58.

**Frequency of Response:** Annual.  
**Estimated Total Annual Hour Burden:** 19,968 hours.

**Estimated Total Annual Cost:** \$680,790, which includes \$680,790 annualized labor costs and \$0 annualized capital or O&M costs.

**Changes in the Estimates:** There is no change in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens.

**Title:** Requirements for Generators, Transporters, and Waste Management Facilities Under the RCRA Hazardous Waste Manifest System (Renewal).

**ICR numbers:** EPA ICR No. 0801.18, OMB Control No. 2050-0039.

**ICR Status:** This ICR is scheduled to expire on February 29, 2012. Under OMB regulations, the Agency may continue to conduct or sponsor the

collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

**Abstract:** This ICR 0801.18 renews the existing information collection (ICR No. 0801.16) for a three-year extension, thereby superseding and replacing the existing ICR. This ICR covers recordkeeping and reporting activities for the hazardous waste manifest paper system, under the Resource Conservation and Recovery Act (RCRA). EPA's authority to require use of a manifest system stems primarily from RCRA 3002(a)(5) (also RCRA Sections 3003(a)(3) and 3004.) Regulations are found in 40 CFR part 262 (registrant organizations and generators), part 263 (transporters), and parts 264 and 265 Treatment, Storage, or Disposal Facility (TSDFs). The manifest lists the wastes that are being shipped and the treatment, storage, or disposal facility (TSDF) to which the wastes are bound. Generators, transporters, and TSDFs handling hazardous waste are required to complete the data requirements for manifests and other reports primarily to: (1) Track each shipment of hazardous waste from the generator to a designated facility; (2) provide information requirements sufficient to allow the use of a manifest in lieu of a Department of Transportation (DOT) shipping paper or bill of lading, thereby reducing the duplication of paperwork to the regulated community; (3) provide information to transporters and waste management facility workers on the hazardous nature of the waste; (4) inform emergency response teams of the waste's hazard in the event of an accident, spill, or leak; and (5) ensure that shipments of hazardous waste are managed properly and delivered to their designated facilities.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average about 2 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or

for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

**Respondents/Affected Entities:** Registrant organizations (manifest printer registry), hazardous waste generators which ship hazardous waste off-site, hazardous waste transporters, and hazardous waste TSDFs (treatment, storage, disposal facilities).

**Estimated Number of Respondents:** 161,720.

**Frequency of Response:** Once (each shipment).

**Estimated Total Annual Hour Burden:** 3,472,218.

**Estimated Total Annual Cost:** \$105,221,281, which includes \$102,154,527 labor costs, \$974,463 annualized capital costs and \$2,092,291 annualized Operations & Maintenance (O&M) costs.

**Changes in the Estimates:** There is a decrease of 270,904 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is due to adjustments to the entities affected by the respondent activities required for each information collection element discussed in the Information Collection Request supporting document. The number of entities affected decreased for this ICR renewal cycle.
