Locational Exchanges of Wholesale Electric Power; Notice Terminating Proceeding

1. On February 17, 2011, the Commission issued a Notice of Inquiry (NOI) concerning the regulatory treatment of locational exchanges of wholesale electric power. The Commission sought guidance as to the circumstances under which locational exchanges of wholesale electric power should be permitted generically and circumstances under which the Commission should consider locational exchanges of wholesale electric power on a case-by-case basis. The Commission received 17 comments from interested parties addressing various issues presented in the NOI. The Commission has determined that there is no basis for continuing this proceeding through the initiation of a rulemaking process and, instead, addresses related issues in an order issued contemporaneously with this order.¹ Therefore, the Commission is terminating this proceeding.

The Commission orders:

The Notice of Inquiry issued by the Commission in this proceeding is hereby terminated.

By direction of the Commission.

Issued: February 16, 2012.

ICR Status: This ICR is scheduled to expire on February 29, 2012. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Petroleum Refineries (40 CFR part 63, subpart CC) were proposed on July 15, 1994, promulgated on August 18, 1995, and most recently amended on October 28, 2009. These regulations apply to the following existing and new petroleum refining process units and emission points located at refineries that are major sources of hazardous air pollutants (HAPs): Miscellaneous process vents, storage vessels, wastewater streams and treatment operations, equipment leaks, gasoline loading racks, and marine vessel loading operations. These regulations also apply to storage vessels and equipment leaks associated with bulk gasoline terminals or pipeline breakout stations that are related to an affected petroleum refinery. New facilities include those that commenced construction or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart CC.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all sources subject to NESHAP. In addition,
