

EIS and the issues and alternatives that should be analyzed. Scoping meetings will be held for Pueblo members at or near each of the four Pueblos. In addition, public scoping meetings will be held in multiple locations in northern New Mexico. Additional information regarding specific dates and times for the upcoming meetings and identification of relevant comment periods will be provided in a future **Federal Register** notice, in the local news media, and through direct contact with interested parties.

Purpose and Need for Action

The purpose is to provide safe and reliable potable water to the residents of the Pojoaque Basin. The need is to reduce reliance on groundwater and to allow the Pueblos to obtain the water rights provided under the Settlement Act.

Proposed Federal Action

Reclamation proposes to plan, design, and construct the Pojoaque Basin Regional Water System in accordance with the Settlement Agreement and the Settlement Act. The Regional Water System shall divert and distribute water in the Pojoaque Basin and shall consist of surface water diversion facilities at San Ildefonso Pueblo on the Rio Grande, and treatment, transmission, storage and distribution facilities and well fields that are necessary to supply 4,000 acre-feet of water within the Pojoaque Basin in accordance with the Settlement Agreement and the Settlement Act.

Possible Alternatives

Alternatives have not been developed at this time. However, the Settlement Act includes provisions for additional construction proposed and paid for by the four Pueblos, the County of Santa Fe, or a Pojoaque Basin Regional Water Authority. Such additional infrastructure would be designed to fully use the water delivered by the Pojoaque Basin Regional Water System or to improve existing, or develop new, water-related infrastructure.

Nature of Decision To Be Made

The decision to be made is which design alternative for the Pojoaque Basin Regional Water System will be constructed. **Note:** The information in the EIS regarding water rights will be presented for background and descriptive purposes only. The terms of the parties' water entitlement and use are established under state and Federal law through the Settlement Agreement and nothing in the EIS is intended to suggest that any of those provisions are

subject to reconsideration, litigation, or alteration through the NEPA process.
