

Federal projects and private water uses in the Gunnison Basin. The PBO also completes ESA compliance for the Dolores Project.

Consultation was held with the U.S. Fish and Wildlife Service and other cooperating agencies to develop alternatives that better met peak, duration, and base flow recommendations for the endangered fish. In the FEIS, a no action alternative and four action alternatives were analyzed. The preferred alternative provides operational guidance for the Aspinall Unit for specific downstream spring peak and duration flows that are dependent on forecasted inflow to the Aspinall Unit reservoirs. It also provides base flows outside of the spring runoff period.

The Aspinall Unit Draft Environmental Impact Statement (DEIS) was issued to the public on February 13, 2009, and a Notice of Availability of the DEIS was published in the **Federal Register** on February 13, 2009 (74 FR 7260). A 70-day public review and comment period for the DEIS ended on April 24, 2009. During the public comment period, two public hearings were held. The FEIS contains responses to all comments received on the DEIS.
