

reverse auction. For Phase I of the Mobility Fund, the Commission provided up to \$300 million in one-time support to immediately accelerate deployment of networks for mobile broadband services in unserved areas. The Commission also established a separate and complementary one-time Tribal Mobility Fund Phase I to award up to \$50 million in additional universal service funding to Tribal Areas, including Alaska, to accelerate mobile broadband availability in these remote and underserved areas. The Commission will use a two-stage application process similar to the one used in spectrum license auctions. Based on the Commission's experience with auctions and consistent with the record, this two-stage collection of information balances the need to collect information essential to conduct a successful auction with administrative efficiency.

Under section 1.21001(c) of the Commission's rules, an applicant may be required, as a prerequisite to participating in competitive bidding, to post a bond or place funds on deposit with the Commission. If a deposit is required, applicants may be required to submit FCC Form 159 and/or an attachment to its newly created FCC Form 180. FCC Form 159 is a remittance advice form that applicants/licensees file when making payment(s) to the Commission, including auction payments. The OMB Control number for the FCC Form 159 is 3060-0589.

OMB Control Number: 3060-XXXX.

On November 18, 2011, the Commission released the *Connect America Fund & Intercarrier Compensation Reform Order*, FCC 11-161, which adopted rules to govern the Connect America Fund Mobility Fund (Mobility Fund). In adopting the rules, the Commission comprehensively reformed and modernized the universal service and intercarrier compensation systems to ensure that all Americans have access to robust, affordable broadband and advanced mobile services. Concluding that mobile voice and broadband services provide unique consumer benefits; and that promoting the universal availability of such services is a vital component of the Commission's universal service mission, the Commission created the Mobility Fund. Mobility Fund Phase I support will be awarded through a nationwide reverse auction. For Phase I of the Mobility Fund, the Commission provided up to \$300 million in one-time support to immediately accelerate deployment of networks for mobile broadband services in unserved areas. The Commission also established a separate and complementary one-time Tribal Mobility Fund Phase I to award up to \$50 million in additional universal service funding to Tribal Areas, including Alaska, to accelerate mobile broadband availability in these remote and underserved areas. The Commission will use a two-stage application process similar to the one used in spectrum license auctions. Based on the Commission's experience with auctions and consistent with the record, this two-stage collection of information balances the need to collect information essential to conduct a successful auction with administrative efficiency.

The Commission needs to use the information collected in determining whether the winning bidders are qualified to receive Mobility Fund support. After the auction has concluded, a winning bidder will be required to file the newly created FCC Form 680 to qualify for and receive support. Those applications will be subject to a review of the applicants' eligibility and qualifications to receive support. Commission staff will review the information collected and will determine whether applicants claiming status to receive support are eligible for the status claimed. Without such information, the Commission could not

determine whether to provide the support to the winning bidder.
