

Owners or operators of the affected facilities must submit initial notification, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least five years following the date of such measurements, maintenance reports, and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 63, subpart YY, as authorized in section 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined to be private.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 90 hours per response. "Burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Source categories: generic maximum achievable control technology standards for carbon black, ethylene, cyanide and spandex facilities.

Estimated Number of Respondents: 72.

Frequency of Response: Annually, semiannually, and occasionally.

Estimated Total Annual Hour Burden: 13,524.

Estimated Total Annual Cost: \$1,654,836, which includes \$1,295,805 in labor costs, no capital/startup costs,

and \$359,031 in operation and maintenance (O&M) costs.

Changes in the Estimates: The increase in burden from the most recently approved ICR is due to adjustments. The adjustment increase in burden costs for both the respondents and the Agency is due to an update in labor rates. Despite the increase in burden costs, there is a decrease in the respondent labor hours (9 hours) in this ICR compared to the previous ICR due to a mathematical error in determining the person-hours per respondent.
