

Participants to transact additional Customer orders and encourage participants in the Exchange's equity markets to also participate in the Exchange's options market.

The Exchange believes that the increased Customer rebate for market participants that add Customer liquidity of 25,000 or more contracts per day in a month, certify for the ISP and execute at least one order on NASDAQ's equity market is equitable and not unfairly discriminatory, because the increased rebate is intended to encourage increased activity in both NOM and in the ISP of the NASDAQ equity market. The goal of the ISP is to incentivize members¹² to provide liquidity from individual equity investors to the NASDAQ Market Center. The increased rebate would encourage firms that certify pursuant to Rule 7014 to increase the amount of Customer order liquidity to NOM. The addition of such liquidity, either through the ISP or through increased Customer order flow, would benefit all Exchange members that participate in those markets.

The Exchange operates in a highly competitive market comprised of nine U.S. options exchanges in which sophisticated and knowledgeable market participants can and do send order flow to competing exchanges if they deem fee levels at a particular exchange to be excessive or rebate opportunities to be inadequate. The Exchange believes that the proposed fee and rebate scheme are competitive and similar to other fees, rebates and tier opportunities in place on other exchanges. The Exchange believes that this competitive marketplace materially impacts the fees and rebates present on

¹² The Commission has expressed its concern that a significant percentage of the orders of individual investors are executed in the over-the-counter ("OTC") market, that is, not on exchange markets; and that a significant percentage of the orders of institutional investors are executed in dark pools. See Securities Exchange Act Release No. 61358 (January 14, 2010), 75 FR 3594 (January 21, 2010) (Concept Release on Equity Market Structure, "Concept Release"). In the Concept Release, the Commission has recognized the strong policy preference under the Act in favor of price transparency and displayed markets. The Commission published the Concept Release to invite public comment on a wide range of market structure issues, including high frequency trading and un-displayed, or "dark," liquidity. See also Mary L. Schapiro, Strengthening Our Equity Market Structure (Speech at the Economic Club of New York, Sept. 7, 2010) ("Schapiro Speech," available on the Commission Web site) (comments of Commission Chairman on what she viewed as a troubling trend of reduced participation in the equity markets by individual investors, and that nearly 30 percent of volume in U.S.-listed equities is executed in venues that do not display their liquidity or make it generally available to the public).
