**SUPPLEMENTARY INFORMATION:**

**I. Abstract**

This request is for extension of a current information collection. This action would continue the reporting measure requiring all Virginia Chesapeake Bay pound net fishermen to report interactions with endangered and threatened sea turtles, found both live and dead, in their pound net operations. When a live or dead sea turtle is discovered during a pound net trip, the Virginia pound net fisherman is

required to report the incidental take to National Marine Fisheries Service (NMFS) and, if necessary, the appropriate rehabilitation and stranding network. This information will be used to monitor the level of incidental take in the state-managed Virginia pound net fishery and ensure that the seasonal pound net leader restrictions (50 CFR 223.206(d)(10)) are adequately protecting listed sea turtles. Based on the number of sea turtle takes anticipated in the Virginia pound net fishery and the available number of Virginia pound net fishermen and pound nets, the number of responses anticipated on an annual basis is 483.

**II. Method of Collection**

Reports may be made either by telephone or fax.

**I. Abstract**

This request is for an extension of a currently approved information collection.

NOAA funds habitat restoration projects including grass-roots, community-based habitat restoration; debris prevention and removal; removal of barriers to migrating fish; and large-scale, targeted restoration through individual projects and restoration partnerships. Awards are made as grants or cooperative agreements under the authority of the Magnuson-Stevens Fishery Conservation and Management Act and the Fish and Wildlife Coordination Act, 16 U.S.C. 661, as amended by the Reorganization Plan No. 4 of 1970.

NOAA requires specific information on habitat restoration projects that we fund, as part of routine progress reporting. Recipients of NOAA funds submit information such as project location, restoration techniques used, species benefited, acres restored, stream miles opened to access for diadromous fish, volunteer participation, and other parameters.
