**SUPPLEMENTARY INFORMATION:**

*Title:* Importation of Swine and Swine Products from the European Union.

*OMB Number:* 0579-0265.

*Type of Request:* Extension of approval of an information collection.

*Abstract:* The Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), authorizes the Secretary of Agriculture to, among other things, prohibit or restrict the importation and interstate movement of animals and animal products to prevent the introduction into or dissemination within the United States of animal diseases and pests. Regulations governing the importation of animals and animal products into the United States are contained in 9 CFR parts 92 through 98.

The regulations in 9 CFR part 94 prohibit or restrict the importation of certain animals and animal products, including live swine, pork and pork products into the United States to prevent the introduction into U.S. livestock population of certain animal diseases, including classical swine fever (CSF), rinderpest, foot-and-mouth disease, swine vesicular disease, and African swine fever.

Section 94.24 deals specifically with the importation of pork and pork products from regions where CSF exists. The regulations allow, under specified conditions, the importation of pork, pork products, and swine from the APHIS-defined European Union CSF region. These requirements necessitate the use of several information collection activities, including certification statements for the importation of pork, pork products, and swine; and the placing of seals on certain conveyances.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and

- (4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection

technologies; e.g., permitting electronic submission of responses.

*Estimate of burden:* The public reporting burden for this collection of information is estimated to average 1 hour per response.

*Respondents:* Foreign animal health officials.

*Estimated annual number of respondents:* 15.

*Estimated annual number of responses per respondent:* 456.4.

*Estimated annual number of responses:* 6,846.

*Estimated total annual burden on respondents:* 6,846 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 7th day of March 2012.

**SUPPLEMENTARY INFORMATION:**

*Title*: Economic Assessment of Conservation Reserve Program Lands for Hunting.

*OMB Control Number*: 0560-NEW.

*Type of Request*: New.

*Abstract*: As specified in the Food, Conservation, and Energy Act of 2008, (the 2008 Farm Bill, Pub. L. 110-246), FSA administers the CRP to conserve and improve soil, water, and wildlife resources. Federal investments in the CRP on private cropland enhance essential ecosystem services, including wildlife, and provide improved hunting opportunities in rural areas. Hunters from urban areas within the State and non-residents outside the State are drawn to CRP lands or other private lands surrounding CRP lands for hunting.

FSA is required by statute to consider benefits from the enhancement of wildlife habitat when selecting CRP offers. Because hunter spending increases in rural areas as hunting opportunities increase, economic activity and employment within the outdoor recreational sector are enhanced. FSA is responsible for identifying and quantifying the relationship between job creation and investments in CRP lands, as increased outdoor recreation is among the benefits FSA provides in administering the CRP.

There have been no statewide assessments of the CRP program on hunting use, expenditures, and jobs in North and South Dakota (ND and SD, respectively). The only prior studies focused on six small areas in ND and are 10 years old. There have been significant changes to the CRP program since that time. In addition, there is

limited generalizability of the six ND areas to the rest of ND and SD. Without data on hunter use and expenditures, the economic contribution generated by federal investments in CRP cannot be reliably estimated.

FSA plans to conduct statewide mail surveys with ND and SD hunters to elicit information on:

- (a) Their use of CRP lands in terms of days spent hunting there;
- (b) Expenditure pattern information; and
- (c) Net economic values.

The primary objective of the survey is to estimate the employment and income contribution of current CRP lands to the rural areas within the respective States, and possible changes to jobs and income emanating from changes in the CRP program.

We have discussed the survey with the State Fish and Game agencies and tentatively selected mail surveys. Mail surveys appear to be the best unbiased survey approach because the State Fish and Game agencies do not have email addresses for all hunters, and hunters in many rural locations of ND and SD do not have email access at home.

Collection of the data is necessary to evaluate and improve CRP selection criteria and program implementation. Having information on recreation-related jobs permits a comparison of county-level impacts of CRP land temporarily going out of crop production.

*Estimate of burden*: Public reporting burden for this information collection is estimated to average 20 minutes per response.

*Frequency of Collection*: One time only.

*Respondents*: Hunters in ND and SD.  
*Estimated Number of Annual Respondents*: 2,400.

*Estimated Number of Responses per Respondent*: 1.

*Estimated Total Annual Responses*: 2,400.

*Estimated Total Annual Burden on Respondents*: 800 hours.

We are requesting comments on all aspects of this information collection to help us to:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of FSA, including whether the information will have practical utility;
- (2) Evaluate the accuracy of FSA's estimate of burden, including the validity of the methodology and assumptions used;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and
- (4) Minimize the burden of the collection of information on those who

are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All responses to this notice, including names and addresses when provided, will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Signed on March 6, 2012.
