[Project No. 14361-000]

Spartanburg Water System; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On February 6, 2012, Spartanburg Water System (Spartanburg) filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of a hydropower project located on the South Pacolet River, in Spartanburg County, South Carolina. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of: (1) An existing 673-foot-long concrete dam, owned by Spartanburg; (2) a reservoir with a surface area of 1,534.0 acres and a storage capacity of 32,000 acre-feet; (3) an existing 4.5-foot-diameter, 48-foot-long outlet pipe; (4) a powerhouse containing two generating units with a total capacity of 530.0 kilowatts (kW), discharging directly into the dam's existing tailrace; and (5) a 1,300-foot-long, 12 kilo-volt (KV) transmission line. The project would have an estimated average annual generation of 2,420 megawatt-hours (MWh) and the project power would be sold.
