Cooperative Research and Development Agreements

Cooperative Research and Development Agreements (CRADAs), are authorized by the Federal Technology Transfer Act of 1986 (Pub. L. 99-502, codified at 15 U.S.C. 3710(a)). A CRADA promotes the transfer of technology to the private sector for commercial use as well as specified research or development efforts that are consistent with the mission of the Federal parties to the CRADA. The Federal party or parties agree with one or more non-Federal parties to share research resources, but the Federal party does not contribute funding. The Department of Homeland Security (DHS), as an executive agency under 5 U.S.C. 105, is a Federal agency

for purposes of 15 U.S.C. 3710(a) and may enter into a CRADA. DHS delegated its authority to the Commandant of the Coast Guard (see DHS Delegation No. 0160.1, para. 2.B(34)), and the Commandant has delegated his authority to the Coast Guard's Research and Development Center (R&DC).

CRADAs are not procurement contracts. Care is taken to ensure that CRADAs are not used to circumvent the contracting process. CRADAs have a specific purpose and should not be confused with other types of agreements such as procurement contracts, grants, and cooperative agreements.

Goal of Proposed CRADA

Under the proposed CRADA, the Coast Guard's R&DC would collaborate with non-Federal participants. Together, the R&DC and the non-Federal participants would test, evaluate, and document the strengths and weaknesses of at least one technical approach for exchanging asset position, status, and brief collaborative messages between the Coast Guard Incident Command Staff (ICS), deployed Coast Guard and non-Coast Guard personnel, and other mobile assets, which are engaged within an ICS-managed, Incident of National Significance (IONS) Response. The CRADA partners will determine the viability of technical approaches for asset tracking and non-verbal communications exchange by conducting a live test in conjunction with a Coast Guard response exercise. The response exercise will utilize emergency personnel, such as Oil Spill Response Organizations (OSROs) and non-Federal CRADA partner-provided handheld devices and interoperable communications technology.

Party Contributions

We anticipate that the Coast Guard's contributions under the proposed CRADA will include the following:

- (1) Provide CRADA partners with access to, and appropriate use of Coast Guard assets, facilities and personnel engaged in a Coast Guard response exercise;
- (2) Provide CRADA partners with all necessary approvals and access for their installation of the asset tracking and non-verbal communications exchange technology on at least one Coast Guard vessel or shore facility; and
- (3) Develop the Technology Demonstration Concept Document, Technology Test Objectives, Test Plan, and Project Report for the CRADA work.

We anticipate that the non-Federal participants' contributions under the proposed CRADA will include the following:

(1) Provide appropriate input to the R&DC for the development of the Technology Demonstration Concept Document, Technology Test Objectives, Test Plan, and Project Report;

(2) Provide, install, operate, maintain, and remove all material (including hardware, software, and test equipment), along with the associated labor, needed for the Technology Demonstration as set forth within the Test Plan; and

(3) Provide the R&DC with a Test Report documenting the results of the Technology Demonstration.

Selection Criteria

The Coast Guard reserves the right to select for CRADA participants all, some, or none of the proposals received in response to this notice. The Coast Guard will provide no funding for reimbursement of proposal development costs. Proposals (or any other material) submitted in response to this notice will not be returned. Proposals submitted are expected to be unclassified and have no more than four single-sided pages (excluding cover page and resumes). The Coast Guard will select proposals at its sole discretion on the basis of:

(1) How well they communicate an understanding of, and ability to meet, the proposed CRADA's goal; and

(2) How well they address the following criteria:

(a) Technical capability to support the non-Federal party contributions described; and

(b) Resources available for supporting the non-Federal party contributions described.

Currently, the Coast Guard is considering General Dynamics for participation in this CRADA. This consideration is based on General Dynamics': (1) Expertise, experience, and interest in asset tracking and non-verbal communications exchange technology; and (2) capability to provide the significant contributions required for the CRADA work. However, we do not wish to exclude other viable participants from this or future similar CRADAs.

This is a technology transfer/development effort. Presently, the Coast Guard has no plan to acquire asset tracking and non-verbal communications exchange technology. Since the goal of this CRADA is to identify and investigate the advantages, disadvantages, performance, costs, and other issues associated with using asset tracking and non-verbal communications exchange technology, and not to set future Coast Guard acquisition requirements for such technology, non-Federal CRADA

partners will not be excluded from any future Coast Guard procurements based solely on their participation within this CRADA.

Special consideration will be given to small business firms/consortia, and preference will be given to business units located in the U.S.

Authority

This notice is issued under the authority of 15 U.S.C. 3710(a), 5 U.S.C. 552(a), and 33 CFR 1.05-1.

Dated: March 19, 2012.

Alan N. Arsenault,

Captain, USCG, Commanding Officer, Research and Development Center.
