

such as the sale and trafficking of children, debt bondage and serfdom and forced or compulsory labour, including forced or compulsory recruitment of children for use in armed conflict.” Art. 3(a). Accordingly, the worst forms of child labor under Convention 182 necessarily encompass the EO definition of forced or indentured child labor, which includes “all work or service: (1) Extracted from any person under the age of 18 under the menace of any penalty for its non-performance and for which the worker does not offer himself voluntarily; or (2) performed by any person under the age of 18 pursuant to a contract the enforcement of which can be accomplished by process or penalties.” EO 13126, Sec. 6(c). Therefore, the commenter’s suggestion is based on an incorrect understanding of the definition under international law.

G. Comments Related to the Stage of Production at Which Forced or Indentured Child Labor Might Have Been Used

Comments were received suggesting that the EO List be expanded to include “end products” if there is a reasonable basis to believe the component parts of those products might have been mined, produced, or manufactured by forced or indentured child labor, regardless of the stage in the supply chain at which there is reason to believe such child labor might have been used. DOL is considering these comments and will consult and coordinate as appropriate with DOS, DHS and other Federal agencies.

H. Comments Related to the Procurement of Products Named on the List

Comments were received requesting that federal contracting officers use the U.S. Department of Agriculture (USDA) Guidelines for Eliminating Child and Forced Labor in Agricultural Supply Chains (“USDA Guidelines”), set forth at 76 FR 20305, to evaluate whether a contractor has made a good faith effort to verify that forced or indentured child labor was not used to mine, produce, or manufacture any item on the EO List. The USDA Guidelines were published on April 12, 2011 under the Food, Conservation, and Energy Act of 2008, Public Law 110–246, 122 Stat. 1651 (2008), and Section 105 of the TVPRA as a “voluntary initiative to enable entities to reduce the likelihood that agricultural products or commodities imported into the United States are produced by forced labor or child labor.” (76 FR 20305). These guidelines, however, are not intended to be used by

the government for enforcement purposes. Further, the current General Services Administration (GSA) regulations applicable to procurements affected by the EO do not permit good faith to be evaluated in the manner suggested. The GSA regulations state that “[a]bsent any actual knowledge that the [good faith] certification is false, the contracting officer must rely on the offerors’ certifications in making award decisions.” 48 CFR 22.1503(d).

Signed at Washington, DC, this 29th day of March 2012.

The U.S. Nuclear Regulatory Commission (NRC, the Commission) has granted the request of Exelon Generation Company (the licensee) to withdraw its October 26, 2011, application for proposed amendment to Facility Operating License No. NPF-18 for the LaSalle County Station, Unit 2, located in LaSalle County, Illinois.

The proposed amendment would have revised license condition 2.C.(32) to require the installation of NETCO-SNAP-IN® inserts to be completed no later than December 31, 2012. The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on January 10, 2012 (77 FR 1514). However, by letter dated January 6, 2012, the licensee withdrew the proposed change.

License Amendment To Increase the Maximum Reactor Power Level, Florida Power & Light Company, Turkey Point, Units 3 and 4

AGENCY: Nuclear Regulatory Commission.

ACTION: Final environmental assessment and finding of no significant impact.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC or the Commission) is considering issuing an amendment for Renewed Facility Operating License Nos. DPR-31 and DPR-41, issued to Florida Power & Light Company (FPL or the licensee) for operation of the Turkey Point (PTN), Units 3 and 4, to increase the maximum power level from 2300 megawatts thermal (MWT) to 2644 MWT for each unit. The proposed power increase is approximately 15-percent over the current licensed thermal power, including a 13-percent power uprate and a 1.7-percent measurement uncertainty recapture, and approximately a 20-percent increase from the original licensed power level of 2200 MWT. The NRC did not identify any significant environmental impacts associated with the proposed action based on its evaluation of the information provided in the licensee's application and other available information, and has prepared this final Environmental Assessment (EA) and Finding of No Significant Impact (FONSI) for the proposed action.
