### National Toxicology Program (NTP) Interagency Center for the Evaluation of Alternative Toxicological Methods: Call for Nominations of High Throughput Screening (HTS) Assays for the Tox21 Initiative

**AGENCY:** Division of the National Toxicology Program (DNTP), National Institute of Environmental Health Sciences (NIEHS), National Institutes of Health (NIH).

**ACTION:** Call for nominations.

**SUMMARY:** The multiagency Tox21 Initiative aims to improve hazard assessment of compounds potentially harmful to humans and the environment. This will be accomplished through the use of integrated high throughput screens that provide information on the ability of a substance to perturb biological pathways related to toxicity. On behalf of the Tox21 Consortium and its Assays and Pathways Working Group, the NTP Interagency Center for the Evaluation of Alternative Toxicological Methods (NICEATM) is accepting nominations for HTS biochemical- or cell-based assays. Assays selected for further evaluation and found to be compatible with the HTS program will support Tox21 by providing data on endpoints that serve as markers for initiating or downstream events in toxicity pathways.

**DATES:** The nomination of HTS assays to Tox21 is an ongoing process and will continue to remain open. Periodic updates to this notice may be posted to reflect new focus areas of the Tox21 HTS program.
