SUPPLEMENTARY INFORMATION: EERE through the National Renewable Energy Laboratory is developing voluntary work specifications for the work involved in home energy upgrades. This document builds upon the considerable body of material already in circulation and the cumulative knowledge gathered throughout the 30-year history of the Weatherization Assistance Program and broader home performance industry.

The development of *The Guidelines for Home Energy Professionals: Standard Work Specifications for Single Family Energy Upgrades (SWS)* is supported by the Weatherization Assistance Program (WAP) Training and Technical Assistance Plan (T&TA). The process of developing the SWS has involved a historic collaboration between WAP practitioners and trainers, home performance contractors, building scientists, organized labor, healthy homes and worker safety experts, and other professionals in the building trades and throughout the retrofit industry. On November 9, 2010, EERE issued a notice requesting public comment on a draft version of the SWS. On March 29, 2012, EERE made available a version of the SWS that was revised in response to comments

received, and provided an opportunity for public review and comment until April 11, 2012. 77 FR 19008. For background on the revised version of the SWS, see the March 29, 2012 notice.

Comments provided to date can be viewed at: <http://nrel.pnnl.gov/forumdisplay.php/9-SWS-for-Single-Family-Homes>.

The comment docket now identifies the commenter along with the comment provided.

A number of commenters indicated that because of the extent of changes to the revised SWS as compared to the version previously made publically available, additional time should be provided for review and comment. This notice reopens the comment period on the revised guidelines to provide additional opportunity for public review and comment.
