Needs and Uses: The Commission is seeking OMB approval for a revision of this information collection in order to obtain the full three year approval from OMB. The Commission is reporting a 9,909 hours program change increase in the Commission's previous burden estimates. The increase in the burden estimates is due to adoption of FCC 12-22, Report and Order, extending the Part 4 outage reporting requirements to interconnected Voice over Internet Providers (VoIP) which are new respondents subject to the requirements of this information collection.

Specifically, the Commission extended mandatory outage reporting rules to facilities-based and non-facilities-based interconnected VoIP service providers and applied the current Part 4 definition of "outage" to outages of interconnected VoIP service, covering the complete loss of service and/or connectivity to customers at least 30 minutes duration that potentially affects at least 900,000 user minutes of interconnected VoIP services and results in complete loss of service; or potentially affects any special offices and facilities such as a 911 facility.

Collecting data on significant outages of interconnected VoIP services will help the Commission to monitor compliance with the statutory 911 obligations of interconnected VoIP service providers, as well as help ensure the Nation's current and future 911 systems are as reliable and resilient as possible both on a day-to-day basis and in times of a major emergency. The Commission recognizes that consumers are increasingly relying on Internet Protocol (IP)-based technologies as
