Llano Seco Riparian Sanctuary Unit Restoration and Pumping Plant/Fish Screen Facility Protection Project, CA; Draft Environmental Impact Statement and Environmental Impact Report

AGENCY: Fish and Wildlife Service,
 Interior.

ACTION: Notice of availability; request
 for public comments.

SUMMARY: We, the U.S. Fish and
 Wildlife Service (Service), announce the
 availability of a draft environmental

impact statement and environmental
 impact report (EIS/EIR) for the Llano
 Seco Riparian Sanctuary Unit
 Restoration and Pumping Plant/Fish
 Screen Facility Protection Project in
 Glenn and Butte Counties, California.
 The proposed project includes riparian
 restoration and protection of the
 Princeton-Cordora-Glenn and Provident
 Irrigation Districts (PCGID-PID)
 pumping plant and fish screen facility.
 The draft EIS/EIR, which we prepared
 in cooperation with the California
 Department of Fish and Game (CDFG)
 and now announce in accordance with
 the National Environmental Policy Act
 of 1969 (NEPA), describes the
 alternatives identified to protect the
 pumping plant and fish screen facility
 located at river mile 178.5 on the
 Sacramento River, and to restore the
 Riparian Sanctuary Unit of the
 Sacramento River National Wildlife
 Refuge.

DATES: We must receive written
 comments at the address below on or
 before June 25, 2012.

ADDRESSES: The draft EIS/EIR is
 available at:

- Sacramento National Wildlife
 Refuge Complex, 752 County Road 99
 W, Willows, CA 95988, (530) 934-7814.
- River Partners Office, 580
 Vallombrosa Avenue, Chico, CA 95926,
 (530) 894-5401.
- Orland Free Library, 333 Mill
 Street, Orland, CA 95963.
- Chico Branch Library, 1108
 Sherman Avenue, Chico, CA 95926.
- CDFG Office, 629 Entler Ave, Suite
 12, Chico, CA 95928.
- PCGID-PID Office, 258 South Butte
 Street, Willows, CA 95988, (530) 934-
 4801.
- Internet: [www.fws.gov/
 sacramentovalleyrefuges/](http://www.fws.gov/sacramentovalleyrefuges/) and [http://
 www.riverpartners.org/where-we-work/
 sanctuary/documents.html](http://www.riverpartners.org/where-we-work/sanctuary/documents.html).

Written comments and requests for
 information may be sent to: Daniel W.
 Frisk, Project Leader, Sacramento
 National Wildlife Refuge Complex, U.S.
 Fish and Wildlife Service, 752 County
 Road 99 W, Willows, CA 95988.
 Alternatively you may send written
 comments or requests by fax to (530)
 934-7814, or by email to
dan_frisk@fws.gov. Please indicate that
 your comments refer to the Riparian
 Sanctuary Restoration and Pumping
 Plan/Fish Screen Facility Protection
 Project.

FOR FURTHER INFORMATION CONTACT:
 Kelly Moroney, Refuge Manager,
 Sacramento River National Wildlife
 Refuge, (530) 934-2801 (phone);
kelly_moroneyr@fws.gov (email), or;
 Helen Swagerty, River Partners, (530)

894-5401 (phone);
hswagerty@riverpartners.org (email).

SUPPLEMENTARY INFORMATION:

Background

The Llano Seco Riparian Sanctuary
 Unit was acquired by the Service in
 1991 and added to the Sacramento River
 National Wildlife Refuge. The Service
 acquired the Llano Seco Riparian
 Sanctuary Unit as part of the Joint
 Management Agreement between Parrot
 Investment Co., The Nature
 Conservancy, California Department of
 Fish and Game, and the Service to
 cooperatively manage lands on the
 Llano Seco Ranch. The Llano Seco
 Riparian Sanctuary Unit is one piece of
 the larger Llano Seco Ranch, and was
 cleared of riparian vegetation for
 agricultural production by the previous
 landowner during the 1970s. Although
 the property has been out of agricultural
 production for close to 15 years, the
 habitat remains dominated by nonnative
 and invasive noxious weeds. Currently,
 just over 200 acres is farmed to dryland
 row crops to help control nonnative
 weeds.

Prior to acquisition by the Service,
 rock revetment was placed on the north
 end of the Llano Seco Riparian
 Sanctuary Unit by the Department of
 Water Resources in 1985 and 1986. The
 rock was placed in order to lock the
 Sacramento River in place ensuring that
 flood flows would continue to be
 diverted from the Sacramento River
 through the Goose Lake overflow
 structure and into the Butte Basin.
 When the Service acquired the ranch
 property in 1991, we did so with the
 understanding that our management
 activities would not impact the Goose
 Lake overflow structure that diverts
 flood water into the Butte Basin.

Since the placement of rock revetment
 in 1986, the natural riverbank that is
 south of the revetment has eroded
 approximately 600 feet. The erosion on
 refuge property is directly across from
 the PCGID-PID pumping plant and fish
 screening facility. In 1999, the PCGID-
 PID consolidated three pumping plants
 into one new facility equipped with
 state-of-the-art fish screens. The fish-
 screening efficiency of the new PCGID-
 PID pumping plant is now endangered
 by the bank erosion on the refuge
 property and the migration of the
 Sacramento River. Although the rock
 revetment on the north edge of refuge
 property is decades old and eroding, it
 plays a key role in protecting the
 PCGID-PID pumping plant. As the bank
 erodes, the angle of flow and velocity of
 the water passing the screens will
 change, trapping fish against the screen
 rather than sweeping them past.

Without some type of protection, it is likely the bank will continue to erode and the pumping plant facility will fail to meet guidelines for operation of the pumping-plant fish screens that were published by the National Marine Fisheries Service of National Oceanic and Atmospheric Administration (Department of Commerce).

Alternatives

To address these issues, we identified and analyzed four alternatives in the draft EIS/EIR:

Alternative 1: No-Action Alternative

Under the No-Action Alternative, only the ongoing removal and management of invasive plant species would occur at the Riparian Sanctuary. No active restoration of native plants would occur. Maintenance activities for the PCGID–PID pumping plant and fish screens would continue, but no new actions would be taken to prevent river meander.

Alternative 2: Spur Dikes and Site-Specific Plantings

Under Alternative 2, bank protection measures would consist of installing eight rock spur dikes along the Sacramento River on the northern side of the Riparian Sanctuary. The dike field would extend about 2,000 feet in length. The dikes would be spaced 225 feet apart and each dike would extend 75 feet into the river. Restoration activities on the Riparian Sanctuary would consist of site-specific plantings across 400 acres of the site. Restoration activities would include preparing the site, planting native plants, irrigating plants for the first 3 years, and monitoring and managing the restored area.

Alternative 3: Traditional Riprap and Site-Specific Plantings

Under Alternative 3, bank protection measures would consist of installing riprap with or without a low berm along the Sacramento River on the northern side of the Riparian Sanctuary. Riprap revetment would be installed from the end of the existing riprap upstream for 2,500 to 2,700 feet to a point almost directly across from the pumping plant and fish screen facility, to protect the riverbank from further erosion. In addition to the site-specific plantings described under Alternative 2, revegetation is proposed on both the bank and low berm areas under this alternative.

Alternative 4: Traditional Riprap With Upstream Rock Removal and Site-Specific Plantings

Under Alternative 4, bank protection measures would consist of installing riprap with or without a low berm along the Sacramento River on the north side of the Riparian Sanctuary as described in Alternative 3, including revegetation on both the bank and low berm. Riparian restoration would take place as described in Alternative 2. In addition, under Alternative 4, we proposed to remove approximately 2,300 linear feet of upstream bank revetment on State- and Service-managed lands along the north side of the peninsula upstream of the Riparian Sanctuary. Removal of the revetment would encourage a natural progression of streambank erosion, and the eventual cutoff of an oxbow. This cut off would allow the river to flow parallel to the pumping plant and fish screen facility, which is the desired alignment for the fish screen to properly function. Installing traditional riprap on the northern side of the Riparian Sanctuary would hold the river in place to prevent it from migrating further east, away from the facility.

NEPA Compliance

The EIS/EIR discusses the direct, indirect, and cumulative impacts of the alternatives on biological resources, cultural resources, land use, air quality, water quality, water resources, and other environmental resources. It also identifies appropriate mitigation measures for adverse environmental effects.

Public Review

We are conducting public review of the EIS/EIR in accordance with the requirements of NEPA, as amended (42 U.S.C. 4321 et seq.), its implementing regulations (40 CFR parts 1500–1508), other applicable regulations, and our procedures for compliance with those regulations. The EIS/EIR meets the requirements of both NEPA and the California Environmental Quality Act (CEQA). The California Department of Fish and Game is the CEQA lead agency. We provide this notice under regulations implementing NEPA (40 CFR 1506.6).

Public Meeting

We will hold one public meeting to solicit comments on the draft EIS/EIR. We will send a separate notice to the public that identifies the time, date, and location of the meeting.

Public Comments

We invite the public to comment on the EIS/EIR during the comment period.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. We will use the comments to prepare a final EIS/EIR. A decision will be made no sooner than 30 days after the publication of the final environmental impact statement.

Alexandra Pitts,

Acting Regional Director, Pacific Southwest Region.

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[LLWO35000.L1430000.FR0000]

Renewal of Approved Information Collection

AGENCY: Bureau of Land Management, Interior.

ACTION: 30-Day Notice and Request for Comments.

SUMMARY: The Bureau of Land Management (BLM) has submitted an information collection request to the Office of Management and Budget (OMB) to continue the collection of information from individuals who want to make a desert land entry to reclaim, irrigate, and cultivate arid and semiarid public lands administered by the BLM in the western States. The Office of Management and Budget (OMB) previously approved this information collection activity, and assigned it control number 1004–0004.

DATES: The OMB is required to respond to this information collection request within 60 days but may respond after 30 days. Therefore, written comments should be received on or before June 4, 2012.

ADDRESSES: Please submit comments directly to the Desk Officer for the Department of the Interior (OMB #1004–0004), Office of Management and Budget, Office of Information and Regulatory Affairs, fax 202–395–5806, or by electronic mail at oir_docket@omb.eop.gov. Please provide a copy of your comments to the BLM. You may do so via mail, fax, or electronic mail.
