BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 272

[EPA-R06-RCRA-2011-0484; FRL-9652-8]

Oklahoma: Incorporation by Reference of State Hazardous Waste Management Program

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The EPA proposes to codify in the regulations entitled “Approved State Hazardous Waste Management Programs”, Oklahoma’s authorized hazardous waste program. The EPA will incorporate by reference into the Code of Federal Regulations (CFR) those provisions of the State regulations that are authorized and that the EPA will enforce under the Solid Waste Disposal Act, commonly referred to as the Resource Conservation and Recovery Act (RCRA).

DATES: Send written comments by June 18, 2012.

ADDRESSES: Send written comments to Alima Patterson, Region 6 Regional Authorization Coordinator, or Julia Banks Codification Coordinator, State/Tribal Oversight Section (6PD-O), Multimedia Planning and Permitting Division, EPA Region 6, 1445 Ross Avenue, Dallas, Texas 75202-2733, Phone number: (214) 665-8533 or (214) 665-8178. You may also submit comments electronically or through hand delivery/courier; please follow the detailed instructions in the **ADDRESSES** section of the immediate final rule

which is located in the Rules section of this **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Alima Patterson, (214) 665-8533.

SUPPLEMENTARY INFORMATION: In the “Rules and Regulations” section of this **Federal Register**, the EPA is codifying and incorporating by reference the State’s hazardous waste program as an immediate final rule. The EPA did not make a proposal prior to the immediate final rule because we believe these actions are not controversial and do not expect comments that oppose them. We have explained the reasons for this codification and incorporation by reference in the preamble to the immediate final rule. Unless we get written comments which oppose this incorporation by reference during the comment period, the immediate final rule will become effective on the date it establishes, and we will not take further action on this proposal. If we get comments that oppose these actions, we will withdraw the immediate final rule and it will not take effect. We will then respond to public comments in a later final rule based on this proposal. You may not have another opportunity for comment. If you want to comment on this action, you must do so at this time.

Dated: March 16, 2012.

Al Armendariz,
Regional Administrator, Region 6.

BILLING CODE 6560-50-P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 1

[MD Docket No. 12-116; FCC 12-48]

Assessment and Collection of Regulatory Fees for Fiscal Year 2012

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Commission will revise its Schedule of Regulatory Fees in order to recover an amount of \$339,844,000 that Congress has required the Commission to collect for fiscal year 2012. Section 9 of the Communications Act of 1934, as amended, provides for the annual assessment and collection of regulatory fees under sections 9(b)(2) and 9(b)(3), respectively, for annual “Mandatory Adjustments” and “Permitted Amendments” to the Schedule of Regulatory Fees.

DATES: Submit comments on or before May 31, 2012, and reply comments on or before June 7, 2012.

ADDRESSES: You may submit comments, identified by MD Docket No. 12-116, by any of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

- *Federal Communications Commission’s Web Site:* <http://www.fcc.gov/cgb/ecfs>. Follow the instructions for submitting comments.

- *People with Disabilities:* Contact the FCC to request reasonable accommodations (accessible format documents, sign language interpreters, CART, etc.) by email: FCC504@fcc.gov or phone: 202-418-0530 or TTY: 202-418-0432.

- *Email:* ecfs@fcc.gov. Include MD Docket No. 12-116 in the subject line of the message.

- *Mail:* Commercial overnight mail (other than U.S. Postal Service Express Mail, and Priority Mail, must be sent to 9300 East Hampton Drive, Capitol Heights, MD 20743. U.S. Postal Service first-class, Express, and Priority mail should be addressed to 445 12th Street SW., Washington, DC 20554.

For detailed instructions for submitting comments and additional information on the rulemaking process, see the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Roland Helvajian, Office of Managing Director at (202) 418-0444.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission’s Notice of Proposed Rulemaking (NPRM), FCC 12-48, MD Docket No. 12-116, adopted on May 3, 2012 and released May 4, 2012. The full text of this document is available for inspection and copying during normal business hours in the FCC Reference Center, 445 12th Street SW., Room CY-A257, Portals II, Washington, DC 20554, and may also be purchased from the Commission’s copy contractor, BCPI, Inc., Portals II, 445 12th Street SW., Room CY-B402, Washington, DC 20554. Customers may contact BCPI, Inc. via their Web site, <http://www.bcpi.com>, or call 1-800-378-3160. This document is available in alternative formats (computer diskette, large print, audio record, and braille). Persons with disabilities who need documents in these formats may contact the FCC by email: FCC504@fcc.gov or phone: 202-418-0530 or TTY: 202-418-0432.

I. Procedural Matters

A. Ex Parte Rules-Permit-but Disclose Proceeding

1. This is a “permit-but-disclose” proceeding subject to the requirements

of the Commission's *ex parte* rules.¹ *Ex parte* presentations are permissible if disclosed in accordance with Commission Rules, except during the Sunshine Agenda period when presentations, *ex parte* or otherwise, are generally prohibited. Persons making oral *ex parte* presentations are reminded that a memorandum summarizing a presentation must contain a summary of the substance of the presentation and not merely a listing of the subjects discussed. More than a one- or two-sentence description of the views and arguments presented is generally required.² Additional rules pertaining to oral and written presentations are set forth in Section 1.1206(b) of the Commission's rules.

B. Comment Filing Procedures

2. *Comments and Replies.* Pursuant to Sections 1.415 and 1.419 of the Commission's Rules, 47 CFR 1.415, 1.419, interested parties may file comments and reply comments on or before the dates indicated on the first page of this document. Comments may be filed using: (1) the Commission's Electronic Comment Filing System (ECFS), (2) the Federal Government's eRulemaking Portal, or (3) by filing paper copies. See *Electronic Filing of Documents in Rulemaking Proceedings*, 63 FR 24121 (1998).

- *Electronic Filers:* Comments may be filed electronically using the Internet by accessing the ECFS: <http://fjallfoss.fcc.gov/ecfs2/> or the Federal eRulemaking Portal: <http://www.regulations.gov>.

- *Paper Filers:* Parties who choose to file by paper must file an original and four copies of each filing. If more than one docket or rulemaking number appears in the caption of this proceeding, filers must submit two additional copies for each additional docket or rulemaking number. Filings can be sent by hand or messenger delivery, by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission.

- All hand-delivered or messenger-delivered paper filings for the Commission's Secretary must be delivered to FCC Headquarters at 445 12th St. SW., Room TW-A325, Washington, DC 20554. The filing hours are 8:00 a.m. to 7:00 p.m. All hand deliveries must be held together with rubber bands or fasteners. Any

envelopes must be disposed of *before* entering the building.

- Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9300 East Hampton Drive, Capitol Heights, MD 20743.

- U.S. Postal Service first-class, Express, and Priority mail must be addressed to 445 12th Street SW., Washington, DC 20554.

People with Disabilities: To request materials in accessible formats for people with disabilities (braille, large print, electronic files, audio format), send an email to fcc504@fcc.gov or call the Consumer & Governmental Affairs Bureau at 202-418-0530 (voice), 202-418-0432 (tty).

3. *Availability of Documents.* Comments, reply comments, and *ex parte* submissions will be available for public inspection during regular business hours in the FCC Reference Center, Federal Communications Commission, 445 12th Street SW., CY-A257, Washington, DC 20554. These documents will also be available free online, via ECFS. Documents will be available electronically in ASCII, Word, and/or Adobe Acrobat.

4. *Accessibility Information.* To request information in accessible formats (computer diskettes, large print, audio recording, and Braille), send an email to fcc504@fcc.gov or call the Commission's Consumer and Governmental Affairs Bureau at (202) 418-0530 (voice), (202) 418-0432 (TTY). This document can also be downloaded in Word and Portable Document Format ("PDF") at: <http://www.fcc.gov>.

C. Paperwork Reduction Act

5. This *NPRM* does not contain proposed or modified information collection burden (s) subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104-13. In addition, therefore, it does not contain any new or modified information collection burden for small business concerns with fewer than 25 employees, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107-198, see 44 U.S.C. 3506(c)(4).

D. Initial Regulatory Flexibility Analysis

6. An initial regulatory flexibility analysis ("IRFA") is contained herein. Comments to the IRFA must be identified as responses to the IRFA and filed by the deadlines for comments on the *Notice of Proposed Rulemaking* (NPRM). The Commission will send a copy of this NPRM, including the IRFA, to the Chief Counsel for Advocacy of the Small Business Administration.

II. Notice of Proposed Rulemaking

III. Introduction and Summary

7. In this *Notice of Proposed Rulemaking* ("FY 2012 NPRM"), we propose to collect \$339,844,000 in regulatory fees for Fiscal Year ("FY") 2012, pursuant to Section 9 of the Communications Act of 1934, as amended (the "Act"). Section 9 regulatory fees are mandated by Congress and are collected to recover the regulatory costs associated with the Commission's enforcement, policy and rulemaking, user information, and international activities.³ The annual amount of regulatory fees to be collected is established each year in the Commission's Annual Appropriations Act, which funds the Commission.⁴ In this annual regulatory fee proceeding, we retain many of the current methods, policies, and procedures for collecting Section 9 regulatory fees adopted by the Commission in prior years. Consistent with our established practice, we intend to collect these regulatory fees during a September 2012 filing window in order to collect the required amount by the end of our fiscal year.

8. This *FY 2012 NPRM* is one of three Notices of Proposed Rulemakings on regulatory fees that the Commission expects to release on or before FY 2013. Because of the complexity of the regulatory fee issues involved, the Commission will seek comment in phases.

9. Since 1994 when the first regulatory fees were collected, the communications industry has undergone a rapid transformation. At the same time, the current method for assessing regulatory fees has changed only slightly since its inception in 1994.⁵ In FY 2008, the Commission released a *Further Notice of Proposed Rulemaking* which identified some of the issues raised by commenters with regard to the need for fundamental reform of our regulatory fee assessment methodology.⁶ In our FY 2011 *Regulatory Fees Report & Order*, we stated that we would initiate a further rulemaking to update the record on regulatory fee rebalancing, as well as expand the inquiry to include new issues and services not covered by the

³ 47 U.S.C. 159(a).

⁴ See the *Consolidated Appropriations Act of 2012*, Public Law 112-74 (December 23, 2011).

⁵ 47 U.S.C. 159(a) and 159(b).

⁶ *Assessment and Collection of Regulatory Fees for Fiscal Year 2008*, MD Docket No. 08-65, RM-11312, Report and Order and Further Notice of Proposed Rulemaking, 73 FR 50201 (August 26, 2008) at paras. 38-41.

¹ See 47 CFR 1.200 *et seq.*

² See 47 CFR 1.1206(b)(2).

FY 2008 *Further Notice of Proposed Rulemaking*.⁷

10. In re-examining the regulatory fee program, as enacted by Congress and codified in section 9 of the Communications Act, 47 U.S.C. 159, the Commission will undertake two separate Notices of Proposed Rulemakings (“Reform Proceedings”) which will address the issues in two phases. In Phase I, we will primarily consider the allocation percentages of core bureaus involved in regulatory fee activity and how we calculate these percentages, and in Phase II, we will address other outstanding substantive and procedural issues. Given the breadth and complexity of the issues involved, the issuance of two separate Notices of Proposed Rulemakings will permit more orderly and consistent analysis of the issues and facilitate their timely resolution. We will issue a

⁷ See *Assessment and Collection of Regulatory Fees for Fiscal Year 2011*, Report and Order, 26 FCC Rcd 10812 (2011) at para. 28 (“*FY 2011 Report and Order*”).

Report and Order finalizing our decision on all the issues raised in the Reform Proceedings, including new cost allocations and revised regulatory fees in sufficient time to allow for their implementation in FY 2013.

11. Although the Commission will reexamine its regulatory fee program in two separate Notices of Proposed Rulemakings, the regular collections FY 2012 NPRM and the subsequent FY 2012 *Report & Order* will be adopted in sufficient time to collect regulatory fees in FY 2012. The proposed FY 2012 regulatory fee rates are listed in the table below entitled, “Table—FY 2012 Schedule of Regulatory Fees.” In calculating these FY 2012 fee rates, the Commission proposes to: (1) incorporate the results of the 2010 Census data into our broadcast population data, (2) assess a regulatory fee for each facility operating either in an analog or digital mode (but not both) for Low Power, Class A, and TV Translators/Boosters, (3) maintain the FY 2012 Interstate Telecommunications Service Provider (ITSP) fee rate at the same level as in FY

2011, (4) require regulatees filing a request for a refund, waiver, fee reduction, or deferment of payment of an application or regulatory fee to use an online filing system rather than submitting their requests in hardcopy format, and (5) seek general comment on improving our collection procedures and processes.

IV. Notice of Proposed Rulemaking

12. The Section 9 regulatory fee proceeding is an annual rulemaking process for the Commission to collect the required fee amount each year. In this *FY 2012 NPRM*, we propose to retain the section 9 regulatory fee methodology used in FY 2011 and in prior fiscal years, with some adjustments to maintain the FY 2012 ITSP fee rate at the same level as in FY 2011. These adjustments are reflected in the ITSP fee rate, and in the fee rates of all remaining fee categories listed in the table below, “Table—FY 2012 Schedule of Regulatory Fees.”

BILLING CODE 6712-01-P

TABLE – FY 2012 Schedule of Regulatory Fees

Regulatory fees for the categories shaded in gray are collected by the Commission in advance to cover the term of the license and are submitted at the time the application is filed.

Fee Category	Annual Regulatory Fee (U.S. \$'s)
PLMRS (per license) (Exclusive Use) (47 CFR part 90)	35
Microwave (per license) (47 CFR part 101)	20
218-219 MHz (Formerly Interactive Video Data Service) (per license) (47 CFR part 95)	70
Marine (Ship) (per station) (47 CFR part 80)	10
Marine (Coast) (per license) (47 CFR part 80)	50
General Mobile Radio Service (per license) (47 CFR part 95)	5
Rural Radio (47 CFR part 22) (previously listed under the Land Mobile category)	15
PLMRS (Shared Use) (per license) (47 CFR part 90)	15
Aviation (Aircraft) (per station) (47 CFR part 87)	10
Aviation (Ground) (per license) (47 CFR part 87)	15
Amateur Vanity Call Signs (per call sign) (47 CFR part 97)	1.50
CMRS Mobile/Cellular Services (per unit) (47 CFR parts 20, 22, 24, 27, 80 and 90)	.17
CMRS Messaging Services (per unit) (47 CFR parts 20, 22, 24 and 90)	.08
Broadband Radio Service (formerly MMDS/ MDS) (per license) (47 CFR part 27)	475
Local Multipoint Distribution Service (per call sign) (47 CFR, part 101)	475
AM Radio Construction Permits	550
FM Radio Construction Permits	700
TV (47 CFR part 73) VHF Commercial	
Markets 1-10	87,425
Markets 11-25	72,925
Markets 26-50	41,675
Markets 51-100	20,725
Remaining Markets	5,800
Construction Permits	5,800
TV (47 CFR part 73) UHF Commercial	

Fee Category	Annual Regulatory Fee (U.S. \$'s)
Markets 1-10	34,650
Markets 11-25	31,950
Markets 26-50	21,875
Markets 51-100	12,625
Remaining Markets	3,425
Construction Permits	3,425
Satellite Television Stations (All Markets)	1,350
Construction Permits – Satellite Television Stations	890
Low Power TV, Class A TV, TV/FM Translators & Boosters (47 CFR part 74)	385
Broadcast Auxiliaries (47 CFR part 74)	10
CARS (47 CFR part 78)	475
Cable Television Systems (per subscriber) (47 CFR part 76)	.95
Interstate Telecommunication Service Providers (per revenue dollar)	.00375
Earth Stations (47 CFR part 25)	275
Space Stations (per operational station in geostationary orbit) (47 CFR part 25) also includes DBS Service (per operational station) (47 CFR part 100)	132,350
Space Stations (per operational system in non-geostationary orbit) (47 CFR part 25)	142,600
International Bearer Circuits - Terrestrial/Satellites (per 64KB circuit)	.35
International Bearer Circuits - Submarine Cable	See Table Below

20 Gbps or greater	211,925	FCC, International, P.O. Box 979084, St. Louis, MO 63197–9000.

13. In each fiscal year since FY 1999, the Commission allocated the amount appropriated by Congress (e.g., \$339,844,000 in FY 2012) across the various fee categories, and then divided these allocated amounts by the number of estimated payment units in each fee category to determine the unit fee.⁸ As

⁸ In many instances, the regulatory fee amount is a flat fee per licensee or regulatee. In some instances, the fee amount represents a per-unit fee

in prior years, for cases involving small multiyear fees (e.g., licenses that are renewed over a multiyear term), we divided the allocated amounts by their

(such as for International Bearer Circuits), a per-unit subscriber fee (such as for Cable, Commercial Mobile Radio Service (“CMRS”) Cellular/Mobile and CMRS Messaging), or a fee factor per revenue dollar (Interstate Telecommunications Service Provider (“ITSP”) fee). The payment unit is the measure upon which the fee is based, such as a licensee, regulatee, or subscriber fee.

respective estimated payment units, as well as by the term of the license (5-year or 10-year) to determine the unit fee, which was then rounded to be consistent with the requirements of section 9(b)(2) of the Act. This process is illustrated in the table below, “Table—Calculation of FY 2012 Revenue Requirements and Pro-Rata Fees.”

BILLING CODE 6712-01-P

Fee Category	FY 2012 Payment Units	Years	FY 2011 Revenue Estimate	Pro-Rated FY 2012 Revenue Requirement	Computed New FY 2012 Regulatory Fee	Rounded New FY 2012 Regulatory Fee	Expected FY 2012 Revenue
***** Total Estimated Revenue to be Collected			336,599,047	339,843,566			340,495,730
***** Total Revenue Requirement			335,794,000	339,844,000			339,844,000
Difference			805,048	(434)			651,730

¹ The FM Construction Permit revenues and the VHF and UHF Construction Permit revenues were adjusted to set the regulatory fee to an amount no higher than the lowest licensed fee for that class of service. The reductions in the FM Construction Permit revenues are offset by increases in the revenue totals for FM radio stations. Similarly, reductions in the VHF and UHF Construction Permit revenues are offset by increases in the revenue totals for VHF and UHF television stations, respectively.

² MDS/MMDS category was renamed Broadband Radio Service (BRS). See Amendment of Parts 1, 21, 73, 74 and 101 of the Commission's Rules to Facilitate the Provision of Fixed and Mobile Broadband Access, Educational and Other Advanced Services in the 2150-2162 and 2500-2690 MHz Bands, Report & Order and Further Notice of Proposed Rulemaking, 19 FCC Rcd 14165, 14169, para. 6 (2004).

³ The chart at the end of Appendix C lists the submarine cable bearer circuit regulatory fees (common and non-common carrier basis) that resulted from the adoption of the following proceedings: Assessment and Collection of Regulatory Fees for Fiscal Year 2008, Second Report and Order (MD Docket No. 08-65, RM-11312), released March 24, 2009; and Assessment and Collection of Regulatory Fees for Fiscal Year 2009 and Assessment and Collection of Regulatory Fees for Fiscal Year 2008, Notice of Proposed Rulemaking and Order (MD Docket No. 09-65, MD Docket No. 08-65), released on May 14, 2009.

⁴ The fee amounts listed in the column entitled "Rounded New FY 2012 Regulatory Fee" constitute a weighted average media regulatory fee by class of service. The actual FY 2012 regulatory fees for AM/FM radio station are listed on a grid located at the end of table entitled, "TABLE – FY 2012 Schedule of Regulatory Fees."

BILLING CODE 6712-01-C

14. The list of sources for the estimated FY 2012 payment units appears in the Table below entitled, "Table—Sources of Payment Unit Estimates for FY 2012." We estimated the number of payment units using licensee databases, industry and trade group projections, as well as prior year payment information. In some instances, Commission licensee databases are used; in other instances, actual prior year payment records and/or industry and trade association projections are used in determining the payment units.⁹ Where appropriate, we

adjusted and rounded our final estimates to take into account factors that could affect the number of units for which regulatees submit payment. Such factors include waivers and exemptions filed in FYs 2011 and 2012, and fluctuations in the number of licenses or station operators due to economic,

("IBFS"), Consolidated Database System ("CDBS"), and Cable Operations and Licensing System ("COALS"). We also consulted reports generated within the Commission such as the Wireline Competition Bureau's *Trends in Telephone Service* and the Wireless Telecommunications Bureau's *Numbering Resource Utilization Forecast and Annual CMRS Competition Report*, as well as industry sources including, but not limited to, *Television & Cable Factbook* by Warren Publishing, Inc. and the *Broadcasting and Cable Yearbook* by Reed Elsevier, Inc.

technical, or other reasons. Our estimated FY 2012 payment units, therefore, are based on the variable factors that are relevant to each fee category. The fee rate may also be rounded or adjusted slightly to account for these variables.

In order to calculate individual service fees for FY 2012, we adjusted FY 2011 payment units for each service to more accurately reflect expected FY 2012 payment liabilities. We obtained our updated estimates through a variety of means. For example, we used Commission licensee data bases, actual prior year payment records and industry and trade association projections when available. The databases we consulted include our Universal Licensing System

⁹The databases we consulted are the following: the Commission's Universal Licensing System ("ULS"), International Bureau Filing System

(“ULS”), International Bureau Filing System (“IBFS”), Consolidated Database System (“CDBS”), and Cable Operations and Licensing System (“COALS”), as well as reports generated within the Commission such as the Wireline Competition Bureau’s *Trends in Telephone Service* and the Wireless Telecommunications Bureau’s *Numbering Resource Utilization Forecast*.

We sought verification for these estimates from multiple sources and, in

all cases; we compared FY 2012 estimates with actual FY 2011 payment units to ensure that our revised estimates were reasonable. Where appropriate, we adjusted and/or rounded our final estimates to take into consideration the fact that certain variables that impact on the number of payment units cannot yet be estimated with sufficient accuracy. These include an unknown number of waivers and/or exemptions that may occur in FY 2012 and the fact that, in many services, the

number of actual licensees or station operators fluctuates from time to time due to economic, technical, or other reasons. When we note, for example, that our estimated FY 2012 payment units are based on FY 2011 actual payment units, it does not necessarily mean that our FY 2012 projection is exactly the same number as in FY 2011. We have either rounded the FY 2012 number or adjusted it slightly to account for these variables.

TABLE—SOURCES OF PAYMENT UNIT ESTIMATES FOR FY 2012

Fee category	Sources of payment unit estimates
Land Mobile (All), Microwave, 218–219 MHz, Marine (Ship & Coast), Aviation (Aircraft & Ground), GMRS, Amateur Vanity Call Signs, Domestic Public Fixed.	Based on Wireless Telecommunications Bureau (“WTB”) projections of new applications and renewals taking into consideration existing Commission licensee data bases. Aviation (Aircraft) and Marine (Ship) estimates have been adjusted to take into consideration the licensing of portions of these services on a voluntary basis.
CMRS Cellular/Mobile Services	Based on WTB projection reports, and FY 2011 payment data.
CMRS Messaging Services	Based on WTB reports, and FY 2011 payment data.
AM/FM Radio Stations	Based on CDBS data, adjusted for exemptions, and actual FY 2011 payment units.
UHF/VHF Television Stations	Based on CDBS data, adjusted for exemptions, and actual FY 2011 payment units.
AM/FM/TV Construction Permits	Based on CDBS data, adjusted for exemptions, and actual FY 2011 payment units.
LPTV, Translators and Boosters, Class A Television	Based on CDBS data, adjusted for exemptions, and actual FY 2011 payment units.
Broadcast Auxiliaries	Based on actual FY 2011 payment units.
BRS (formerly MDS/MMDS)	Based on WTB reports and actual FY 2011 payment units.
LMDS	Based on WTB reports and actual FY 2011 payment units.
Cable Television Relay Service (“CARS”) Stations	Based on data from Media Bureau’s COALS database and actual FY 2011 payment units.
Cable Television System Subscribers	Based on publicly available data sources for estimated subscriber counts and actual FY 2011 payment units.
Interstate Telecommunication Service Providers	Based on FCC Form 499–Q data for the four quarters of calendar year 2010, the Wireline Competition Bureau projected the amount of calendar year 2009 revenue that will be reported on 2012 FCC Form 499–A worksheets in April, 2012.
Earth Stations	Based on International Bureau (“IB”) licensing data and actual FY 2011 payment units.
Space Stations (GSOs & NGSOs)	Based on IB data reports and actual FY 2011 payment units.
International Bearer Circuits	Based on IB reports and submissions by licensees.
Submarine Cable Licenses	Based on IB license information.

A. Regulatory Fee Obligations for AM and FM Radio Stations

15. The fee methodology for AM and FM radio stations is based on a number of factors, including facility attributes and the population served by each station. The calculation of the population served is determined by

coupling current United States Census Bureau data with technical and engineering data, as detailed in the table below entitled, “Table—Factors, Measurements, and Calculations That Determine Station Signal Contours and Associated Population Coverages.” In FY 2012, the Commission will be incorporating the results of the 2010

Census data into our broadcast population data. These population counts, along with the station’s class and type of service, are the basis for determining regulatory fees. We invite interested parties to comment on incorporating the 2010 Census data into our broadcast population data.

TABLE—FACTORS, MEASUREMENTS, AND CALCULATIONS THAT DETERMINE STATION SIGNAL CONTOURS AND ASSOCIATED POPULATION COVERAGES

AM Stations

For stations with nondirectional daytime antennas, the theoretical radiation was used at all azimuths. For stations with directional daytime antennas, specific information on each day tower, including field ratio, phasing, spacing and orientation was retrieved, as well as the theoretical pattern root-mean-square of the radiation in all directions in the horizontal plane ("RMS") (figure millivolt per meter (mV/m) @ 1 km) for the antenna system. The standard, or modified standard if pertinent, horizontal plane radiation pattern was calculated using techniques and methods specified in 73.150 and 73.152 of the Commission's rules.¹ Radiation values were calculated for each of 360 radials around the transmitter site. Next, estimated soil conductivity data was retrieved from a database representing the information in FCC Figure R3.² Using the calculated horizontal radiation values, and the retrieved soil conductivity data, the distance to the principal community (5 mV/m) contour was predicted for each of the 360 radials. The resulting distance to principal community contours were used to form a geographical polygon. Population counting was accomplished by determining which 2000 block centroids were contained in the polygon. (A block centroid is the center point of a small area containing population as computed by the U.S. Census Bureau.) The sum of the population figures for all enclosed blocks represents the total population for the predicted principal community coverage area.

FM Stations

The greater of the horizontal or vertical effective radiated power ("ERP") (kW) and respective height above average terrain ("HAAT") (m) combination was used. Where the antenna height above mean sea level ("HAMSL") was available, it was used in lieu of the average HAAT figure to calculate specific HAAT figures for each of 360 radials under study. Any available directional pattern information was applied as well, to produce a radial-specific ERP figure. The HAAT and ERP figures were used in conjunction with the Field Strength (50–50) propagation curves specified in 47 CFR 73.313 of the Commission's Rules to predict the distance to the principal community (70 dBu (decibel above 1 microvolt per meter) or 3.17 mV/m) contour for each of the 360 radials.³ The resulting distance to principal community contours were used to form a geographical polygon. Population counting was accomplished by determining which 2000 block centroids were contained in the polygon. The sum of the population figures for all enclosed blocks represents the total population for the predicted principal community coverage area.

B. Regulatory Fee Obligations for Digital Low Power, Class A, and TV Translators/Boosters

16. The digital transition to full-service television stations was completed on June 12, 2009, but the digital transition for Low Power, Class A, and TV Translators/Boosters still remains voluntary, even though a transition date of September 1, 2015 has been set for the completion of this transition. Historically, we have only considered the digital transition in the context of regulatory fees applicable to full-service television stations, and not to Low Power, Class A, and TV Translators/Boosters. Consequently, the "digital only" exemption that previously prevailed does not apply to Low Power, Class A, and TV Translator/Booster facilities. Because the digital transition in the Low Power, Class A, and TV Translator/Booster facilities is still voluntary, some of these facilities may transition from analog to digital service more rapidly than others. During this period of transition, licensees of Low Power, Class A, and TV Translator/Booster facilities may be operating in analog mode, in digital mode, or in an analog and digital simulcast mode. Therefore, for regulatory fee purposes, we conclude that a fee will be assessed for each facility operating either in an analog or digital mode. In instances in which a licensee is simulcasting in both analog and digital modes, a single regulatory fee will be assessed for the analog facility and its corresponding digital component. We request comment on this proposal. As greater numbers of facilities convert to digital mode, the

Commission will provide revised instructions on how regulatory fees will be assessed.

C. Regulatory Fee Obligations of Interstate Telecommunications Service Providers

17. In our FY 2011 Regulatory Fee Report and Order, we assessed the Interstate Telecommunications Service Provider ("ITSP") industry a regulatory fee of \$.00375 per revenue dollar. This fee reflects the Commission's decision to limit the increase in ITSP regulatory fees given the continuing decrease in the revenue base upon which ITSP regulatory fees are calculated. In FY 2011, we stated that we would rebalance ITSP regulatory fees in the context of more fundamental regulatory fee reform, which we will address in the forthcoming Reform Proceedings. Because we limited the increase in ITSP regulatory fees in FY 2011, and we expect that rebalancing ITSP fees will reduce the regulatory fee allocation for the ITSP industry, we propose, as an interim measure, to assess FY 2012 ITSP regulatory fees at the same fee rate as in FY 2011 (.00375). In addition, consistent with our approach in FY 2011, we propose to allocate the remaining revenue requirement across all other fee categories. We seek comment on these proposals.

D. Improving Public Information on Waiver Requests and Decisions

18. To improve the openness and transparency of our fee waiver decisions, we will shortly announce improvements in the way that we

provide public information about the waiver requests that are filed and the decisions resolving them. To assist in the implementation of these changes, we propose to require regulatees filing a request for a refund, waiver, fee reduction, or deferment of payment of an application or regulatory fee to use an online filing system rather than submitting their requests in hardcopy format. We believe that an online filing system will complement other existing online Commission systems already in place, such as the Broadcast Radio and Television Electronic Filing System (more commonly referred to as CDBS), the Cable Operations and Licensing System (COALS), and Consumer Complaint Forms. The resulting fee waiver filing system will include such documents as the filed request, any relevant supporting documentation, and the resulting decision. We propose to apply the provisions of section 0.459 to requests that electronically filed material be withheld from public inspection.¹⁰ We invite comment from regulatees regarding the electronic filing of refund, waiver, fee reduction, and deferment requests.

E. Administrative and Operational Issues

19. In FY 2009, the Commission implemented several changes in

¹⁰ Specifically, Section 0.457(a)(2) through (g) describe, *inter alia*, how confidential material should be submitted electronically, what showings must be made to justify withholding electronically submitted information from public inspection, and how the Commission will resolve confidentiality requests.

procedures that simplified the payment and reconciliation processes of FY 2009 regulatory fees. In FY 2012, the Commission will continue to promote greater use of technology (and less use of paper) in improving our regulatory fee notification and collection process. We seek general comment on improving our fee collection process.

20. In FY 2009, we instituted a mandatory filing requirement using the Commission's electronic filing and payment system (also known as "Fee Filer").¹¹ Licensees filing their annual regulatory fee payments were required to begin the process by entering the Commission's Fee Filer system with a valid FCC Registration Number ("FRN") and password.¹² This change was beneficial to both licensees and to the Commission. For licensees, the mandatory use of Fee Filer eliminates the need to manually complete and submit a hardcopy Form 159, and for the Commission, the data in electronic format makes it much easier to process payments efficiently and effectively. We seek general comment on how to improve the use of Fee Filer in filing annual regulatory fees. Because licensees have different options when making their regulatory fee payment (by credit card, check, wire transfer, etc.), the mandatory requirement to use Fee Filer is for the *filing* of annual regulatory fees using Fee Filer, not the *payment* of regulatory fees through Fee Filer. In the upcoming Reform Proceeding, we will examine whether to expand the use of Fee Filer for the filing of regulatory fees.

V. Fee Collection Procedures

21. Included below are procedural items as well as our current payment and collection methods which we have revised over the past several years to expedite the processing of regulatory fee payments. We do not propose changes to these procedures. Rather, we include them here as a useful way of reminding regulatory fee payers and the public about these aspects of the annual regulatory fee collection process.

A. Public Notices and Fact Sheets

22. Each year we post public notices and fact sheets pertaining to regulatory fees on our Web site. These documents contain information about the payment due date and relevant regulatory fee payment procedures. We will continue to post this information on <http://>

transition.fcc.gov/fees/regfees.html, rather than mailing it to regulatees.

B. Pre-Bill Notification and Collection of Regulatory Fees

23. In prior years, the Commission mailed pre-bills via surface mail to licensees in select regulatory fee categories: ITSPs, Geostationary ("GSO") and Non-Geostationary ("NGSO") satellite space station licensees,¹³ holders of Cable Television Relay Service ("CARS") licenses, and Earth Station licensees.¹⁴ The remaining regulatees did not receive pre-bills. In our FY 2009 Report and Order, the Commission decided to make the information contained in these pre-bills viewable in Fee Filer, rather than mailing pre-bills to licensees via surface mail.¹⁵ We continued this practice in FY 2010 and FY 2011 by placing the pre-bill information on Fee Filer, where it could be accessed by licensees through the Commission's Web site. Regulatees can also look to the Commission's Web site for information on upcoming events and deadlines relating to regulatory fees.

C. Assessment Notifications

1. Media Services Licensees

24. Beginning in FY 2003, we sent fee assessment notifications via surface mail to media services entities on a per-facility basis.¹⁶ These notifications provided the assessed fee amount for the facility in question, as well as the data attributes that determined the fee amount. We have since refined this initiative to be more electronic and paperless.¹⁷ In our FY 2010 *Notice of*

¹³ Geostationary orbit space station ("GSO") licensees received regulatory fee pre-bills for satellites that (1) were licensed by the Commission and operational on or before October 1 of the respective fiscal year; and (2) were not co-located with and technically identical to another operational satellite on that date (i.e., were not functioning as a spare satellite). Non-geostationary orbit space station ("NGSO") licensees received regulatory fee pre-bills for systems that were licensed by the Commission and operational on or before October 1 of the respective fiscal year.

¹⁴ A pre-bill is considered an account receivable in the Commission's accounting system. Pre-bills reflect the amount owed and have a payment due date of the last day of the regulatory fee payment window. Consequently, if a pre-bill is not paid by the due date, it becomes delinquent and is subject to our debt collection procedures. See also 47 CFR 1.1161(c), 1.1164(f)(5), and 1.1910.

¹⁵ See *FY 2009 Report and Order* at paras. 24, 26.

¹⁶ An assessment is a proposed statement of the amount of regulatory fees owed by an entity to the Commission (or proposed subscriber count to be ascribed for purposes of setting the entity's regulatory fee), but it is not entered into the Commission's accounting system as a current debt.

¹⁷ Those refinements include providing licensees with a Commission-authorized Web site where they can update or correct any information concerning their facilities, and amend their fee-exempt status, if need be. The notifications also provide licensees

Proposed Rulemaking, we proposed to discontinue mailing the media notifications beginning in FY 2011, relying instead on information on the Commission's Web site and the use of the Commission-authorized Web site at www.fccfees.com.¹⁸ In FY 2012, we will continue the practice of not mailing hardcopy notification assessment letters to media licensees.

2. CMRS Cellular and Mobile Services Assessments

25. We will continue to follow our current procedures for conveying CMRS subscriber counts to providers. We will mail an initial assessment letter to Commercial Mobile Radio Service (CMRS) providers using data from the Numbering Resource Utilization Forecast ("NRUF") report that is based on "assigned" number counts that have been adjusted for porting to net Type 0 ports ("in" and "out").¹⁹ The letter will include a listing of the carrier's Operating Company Numbers ("OCNs") upon which the assessment is based.²⁰ The letters will not include OCNs with their respective assigned number counts, but rather, an aggregate total of assigned numbers for each carrier.

26. A carrier wishing to revise its subscriber count can do so by accessing Fee Filer after receiving its initial CMRS assessment letter. Providers should follow the prompts in Fee Filer to record their subscriber revisions, along with any supporting documentation.²¹ The Commission will then review the revised count and supporting documentation and either approve or disapprove the submission in Fee Filer. If the submission is disapproved, the Commission will attempt to contact the provider to afford the provider an opportunity to discuss its revised subscriber count and/or provide additional supporting documentation. If we receive no response or correction to the initial assessment letter, or we do not reverse our initial disapproval of the provider's revised count submission, we expect the fee payment to be based on

with a telephone number to call in the event that they need customer assistance.

¹⁸ See *Assessment and Collection of Regulatory Fees for Fiscal Year 2010*, Report and Order, 25 FCC Rcd 9278 at para. 42 (2010) ("*FY 2010 Report and Order*").

¹⁹ See *Assessment and Collection of Regulatory Fees for Fiscal Year 2005 and Assessment and Collection of Regulatory Fees for Fiscal Year 2004*, MD Docket Nos. 05-59 and 04-73, Report and Order and Order on Reconsideration, 20 FCC Rcd 12259, 12264, paras. 38-44 (2005).

²⁰ *Id.*

²¹ In the supporting documentation, the provider will need to state a reason for the change, such as a purchase or sale of a subsidiary, the date of the transaction, and any other pertinent information that will help to justify a reason for the change.

¹¹ *FY 2009 Report and Order* at paras. 20 and 21.

¹² Therefore, it is important for licensees to have a current and valid FRN address on file in the Commission's Registration System (CORES).

the number of subscribers listed on the initial assessment letter. Once the timeframe for revision has passed, the subscriber counts are final and are the basis upon which CMRS regulatory fees are expected to be paid. Providers can also view their final subscriber counts online in Fee Filer. A final CMRS assessment letter will not be mailed out.

27. Because some carriers do not file the NRUF report, they may not receive an initial assessment letter. In these instances, the carriers should compute their fee payment using the standard methodology²² that is currently in place for CMRS Wireless services (e.g., compute their subscriber counts as of December 31, 2011), and submit their fee payment accordingly. Whether a carrier receives an assessment letter or not, the Commission reserves the right to audit the number of subscribers for which regulatory fees are paid. In the event that the Commission determines that the number of subscribers paid is inaccurate, the Commission will bill the carrier for the difference between what was paid and what should have been paid.

3. Submarine Cable Allocation

28. Because the dollar amount that the Commission is required to collect could differ from year to year, the revenue apportionment between submarine cable providers and terrestrial/satellite facilities needs to be re-calculated each year based on an 87.4/12.6 percent allocation, respectively.²³ Since FY 2009, the Commission has used the 87.4/12.6 percent allocation proposed in the Consensus Proposal as the percentage upon which to determine the regulatory fee revenue amounts for submarine cable providers and terrestrial/satellite facilities, respectively.²⁴ Each year, the Commission reserves the right to revise this 87.4/12.6 allocation. For FY 2012, we do not find any basis to alter this 87.4/12.6 percent revenue allocation.

D. Streamlined Regulatory Fee Payment Process

1. Cable Television Subscribers

29. The Commission will continue to permit cable television operators to base

²² See, e.g., Federal Communications Commission, *Regulatory Fees Fact Sheet: What You Owe—Commercial Wireless Services for FY 2011* at 1 (released September 2011).

²³ See *Assessment and Collection of Regulatory Fees for Fiscal Year 2008*, Second Report and Order, 24 FCC Rcd 4208 at n. 35 (2009) (“*Submarine Cable Order*”).

²⁴ See *Assessment and Collection of Regulatory Fees for Fiscal Year 2009*, Report and Order, 24 FCC Rcd 10301 at para. 8 (2009) (“*FY 2009 Report and Order*”).

their regulatory fee payment on their company’s aggregate year-end subscriber count, rather than requiring them to report cable subscriber counts on a per community unit identifier (“CUID”) basis.

2. CMRS Cellular and Mobile Providers

30. In FY 2006, we streamlined the CMRS payment process by eliminating the requirement for CMRS providers to identify their individual call signs when making their regulatory fee payment, instead allowing CMRS providers to pay their regulatory fees only at the aggregate subscriber level without having to identify their various call signs.²⁵ We will continue this practice in FY 2012. In FY 2007, we consolidated the CMRS cellular and CMRS mobile fee categories into one fee category with a single fee code, thereby eliminating the requirement for CMRS providers to separate their subscriber counts into CMRS cellular and CMRS mobile fee categories during the regulatory fee payment process. This consolidation of fee categories enabled the Commission to process payments more quickly and accurately. For FY 2012, we will continue this practice of combining the CMRS cellular and CMRS mobile fee categories into one regulatory fee category.

3. Interstate Telecommunications Service Providers

31. In FY 2007, we adopted a proposal to round lines 14 (total subject revenues) and 16 (total regulatory fee owed) on FCC Form 159–W worksheet to the nearest dollar. This revision enabled the Commission to process the ITSP regulatory fee payments more quickly because rounding was performed in a consistent manner, thereby eliminating processing issues. For FY 2012, we will continue to round lines 14 and 16 when calculating the FY 2012 ITSP fee obligation. In addition, we will continue the practice of not mailing out Form 159–W via surface mail.

E. Payment of Regulatory Fees

1. Lock Box Bank

32. All lock box payments to the Commission for FY 2012 will be processed by U.S. Bank, St. Louis, Missouri, and payable to the FCC. During the regulatory fee season, for those licensees paying by check, money order, or by credit card using Form 159–E remittance advice, the fee payment

²⁵ See *Assessment and Collection of Regulatory Fees for Fiscal Year 2006*, MD Docket No. 06–68, Report and Order, 21 FCC Rcd 8092, 8105, para. 48 (2006).

and Form 159–E remittance advice should be mailed to the following address: Federal Communications Commission, Regulatory Fees, P.O. Box 979084, St. Louis, MO 63197–9000. Additional payment options and instructions are posted at <http://transition.fcc.gov/fees/regfees.html>.

2. Receiving Bank for Wire Payments

33. The receiving bank for all wire payments is the Federal Reserve Bank, New York, New York (TREAS NYC). When making a wire transfer, regulatees must fax a copy of their Fee Filer generated Form 159–E to U.S. Bank, St. Louis, Missouri at (314) 418–4232 at least one hour before initiating the wire transfer (but on the same business day), so as not to delay crediting their account. Regulatees should discuss arrangements (including bank closing schedules) with their bankers several days before they plan to make the wire transfer to allow sufficient time for the transfer to be initiated and completed before the deadline. Complete instructions for making wire payments are posted at <http://transition.fcc.gov/fees/wiretran.html>.

3. De Minimis Regulatory Fees

34. Regulatees whose total FY 2012 regulatory fee liability, including all categories of fees for which payment is due, is less than \$10 are exempted from payment of FY 2012 regulatory fees.

4. Standard Fee Calculations and Payment Dates

35. The Commission will accept fee payments made in advance of the window for the payment of regulatory fees. The responsibility for payment of fees by service category is as follows:

- *Media Services*: Regulatory fees must be paid for initial construction permits that were granted on or before October 1, 2011 for AM/FM radio stations, VHF/UHF full service television stations, and satellite television stations. Regulatory fees must be paid for all broadcast facility licenses granted on or before October 1, 2011. In instances where a permit or license is transferred or assigned after October 1, 2011, responsibility for payment rests with the holder of the permit or license as of the fee due date.

- *Wireline (Common Carrier) Services*: Regulatory fees must be paid for authorizations that were granted on or before October 1, 2011. In instances where a permit or license is transferred or assigned after October 1, 2011, responsibility for payment rests with the holder of the permit or license as of the fee due date. We note that audio

bridging service providers are included in this category.²⁶

- *Wireless Services*: CMRS cellular, mobile, and messaging services (fees based on number of subscribers or telephone number count): Regulatory fees must be paid for authorizations that were granted on or before October 1, 2011. The number of subscribers, units, or telephone numbers on December 31, 2011 will be used as the basis from which to calculate the fee payment. In instances where a permit or license is transferred or assigned after October 1, 2011, responsibility for payment rests with the holder of the permit or license as of the fee due date.

- The first eleven regulatory fee categories in our Schedule of Regulatory Fees (see Attachment B) pay “small multi-year wireless regulatory fees.” Entities pay these regulatory fees in advance for the entire amount of their five-year or ten-year term of initial license, and only pay regulatory fees again when the license is renewed or a new license is obtained. We include these fee categories in our Schedule of Regulatory Fees to publicize our estimates of the number of “small multi-year wireless” licenses that will be renewed or newly obtained in FY 2012.

- *Multichannel Video Programming Distributor Services (cable television operators and CARS licensees)*: Regulatory fees must be paid for the number of basic cable television subscribers as of December 31, 2011.²⁷ Regulatory fees also must be paid for CARS licenses that were granted on or before October 1, 2011. In instances where a permit or license is transferred or assigned after October 1, 2011,

²⁶ Audio bridging services are toll teleconferencing services, and audio bridging service providers are required to contribute directly to the universal service fund based on revenues from these services. On June 30, 2008, the Commission released the *InterCall Order*, in which the Commission stated that InterCall, Inc. and all similarly situated audio bridging service providers are required to contribute directly to the universal service fund. See *Request for Review by InterCall, Inc. of Decision of Universal Service Administrator*, CC Docket No. 96–45, Order, 23 FCC Rcd 10731 (2008) (“*InterCall Order*”).

²⁷ Cable television system operators should compute their number of basic subscribers as follows: Number of single family dwellings + number of individual households in multiple dwelling unit (apartments, condominiums, mobile home parks, etc.) paying at the basic subscriber rate + bulk rate customers + courtesy and free service. Note: Bulk-Rate Customers = Total annual bulk-rate charge divided by basic annual subscription rate for individual households. Operators may base their count on “a typical day in the last full week” of December 2011, rather than on a count as of December 31, 2011.

responsibility for payment rests with the holder of the permit or license as of the fee due date.

- *International Services*: Regulatory fees must be paid for earth stations, geostationary orbit space stations and non-geostationary orbit satellite systems that were licensed and operational on or before October 1, 2011. In instances where a permit or license is transferred or assigned after October 1, 2011, responsibility for payment rests with the holder of the permit or license as of the fee due date.

- *International Services: Submarine Cable Systems*: Regulatory fees for submarine cable systems are to be paid on a per cable landing license basis based on circuit capacity as of December 31, 2011. In instances where a license is transferred or assigned after October 1, 2011, responsibility for payment rests with the holder of the license as of the fee due date. For regulatory fee purposes, the allocation in FY 2012 will remain at 87.6 percent for submarine cable and 12.4 percent for satellite/terrestrial facilities.

- *International Services: Terrestrial and Satellite Services*: Finally, regulatory fees for International Bearer Circuits are to be paid by facilities-based common carriers that have active (used or leased) international bearer circuits as of December 31, 2011 in any terrestrial or satellite transmission facility for the provision of service to an end user or resale carrier, which includes active circuits to themselves or to their affiliates. In addition, non-common carrier satellite operators must pay a fee for each circuit sold or leased to any customer, including themselves or their affiliates, other than an international common carrier authorized by the Commission to provide U.S. international common carrier services. “Active circuits” for these purposes include backup and redundant circuits as of December 31, 2011. Whether circuits are used specifically for voice or data is not relevant for purposes of determining that they are active circuits. In instances where a permit or license is transferred or assigned after October 1, 2011, responsibility for payment rests with the holder of the permit or license as of the fee due date. For regulatory fee purposes, the allocation in FY 2012 will remain at 87.6 percent for submarine cable and 12.4 percent for satellite/terrestrial facilities.

F. Enforcement

36. To be considered timely, regulatory fee payments must be received and stamped at the lockbox bank by the due date of regulatory fees. Section 9(c) of the Act requires us to impose a late payment penalty of 25 percent of the unpaid amount to be assessed on the first day following the deadline date for filing of these fees.²⁸ Failure to pay regulatory fees and/or any late penalty will subject regulatees to sanctions, including those set forth in section 1.1910 of the Commission’s rules²⁹ and in the Debt Collection Improvement Act of 1996 (“DCIA”).³⁰ We also assess administrative processing charges on delinquent debts to recover additional costs incurred in processing and handling the related debt pursuant to the DCIA and section 1.1940(d) of the Commission’s rules.³¹ These administrative processing charges will be assessed on any delinquent regulatory fee, in addition to the 25 percent late charge penalty. In case of partial payments (underpayments) of regulatory fees, the licensee will be given credit for the amount paid, but if it is later determined that the fee paid is incorrect or not timely paid, then the 25 percent late charge penalty (and other charges and/or sanctions, as appropriate) will be assessed on the portion that is not paid in a timely manner.

37. We will withhold action on any applications or other requests for benefits filed by anyone who is delinquent in any non-tax debts owed to the Commission (including regulatory fees) and will ultimately dismiss those applications or other requests if payment of the delinquent debt or other satisfactory arrangement for payment is not made.³² Failure to pay regulatory fees can also result in the initiation of a proceeding to revoke any and all authorizations held by the entity responsible for paying the delinquent fee(s).

TABLE – Reference to FY 2011 Schedule of Regulatory Fees

Regulatory fees for the categories shaded in gray are collected by the Commission in advance to cover the term of the license and are submitted along with the application at the time the application is filed.

Fee Category	Annual Regulatory Fee (U.S. \$'s)
PLMRS (per license) (Exclusive Use) (47 CFR part 90)	40
Microwave (per license) (47 CFR part 101)	25
218-219 MHz (Formerly Interactive Video Data Service) (per license) (47 CFR part 95)	65
Marine (Ship) (per station) (47 CFR part 80)	10
Marine (Coast) (per license) (47 CFR part 80)	50
General Mobile Radio Service (per license) (47 CFR part 95)	5
Rural Radio (47 CFR part 22) (previously listed under the Land Mobile category)	20
PLMRS (Shared Use) (per license) (47 CFR part 90)	20
Aviation (Aircraft) (per station) (47 CFR part 87)	10
Aviation (Ground) (per license) (47 CFR part 87)	15
Amateur Vanity Call Signs (per call sign) (47 CFR part 97)	1.42
CMRS Mobile/Cellular Services (per unit) (47 CFR parts 20, 22, 24, 27, 80 and 90)	.17
CMRS Messaging Services (per unit) (47 CFR parts 20, 22, 24 and 90)	.08
Broadband Radio Service (formerly MMDS/ MDS) (per license) (47 CFR part 21)	310
Local Multipoint Distribution Service (per call sign) (47 CFR, part 101)	310
AM Radio Construction Permits	490
FM Radio Construction Permits	675
TV (47 CFR part 73) VHF Commercial	
Markets 1-10	84,625
Markets 11-25	68,175
Markets 26-50	40,475
Markets 51-100	22,750
Remaining Markets	6,100

Fee Category	Annual Regulatory Fee (U.S. \$'s)
Construction Permits	6,100
TV (47 CFR part 73) UHF Commercial	
Markets 1-10	34,650
Markets 11-25	32,950
Markets 26-50	20,950
Markets 51-100	12,325
Remaining Markets	3,275
Construction Permits	3,275
Satellite Television Stations (All Markets)	1,250
Construction Permits – Satellite Television Stations	670
Low Power TV, Class A TV, TV/FM Translators & Boosters (47 CFR part 74)	395
Broadcast Auxiliaries (47 CFR part 74)	10
CARS (47 CFR part 78)	370
Cable Television Systems (per subscriber) (47 CFR part 76)	.93
Interstate Telecommunication Service Providers (per revenue dollar)	.00375
Earth Stations (47 CFR part 25)	245
Space Stations (per operational station in geostationary orbit) (47 CFR part 25) also includes DBS Service (per operational station) (47 CFR part 100)	131,375
Space Stations (per operational system in non-geostationary orbit) (47 CFR part 25)	141,750
International Bearer Circuits - Terrestrial/Satellites (per 64KB circuit)	.35
International Bearer Circuits - Submarine Cable	See Table Below

BILLING CODE 6712-01-C

FY 2011 RADIO STATION REGULATORY FEES

Population served	AM Class A	AM Class B	AM Class C	AM Class D	FM Classes A, B1 & C3	FM Classes B, C, C0, C1 & C2

Initial Regulatory Flexibility Analysis

1. As required by the Regulatory Flexibility Act (“RFA”),³³ the Commission prepared this Initial Regulatory Flexibility Analysis (“IRFA”) of the possible significant economic impact on small entities by the policies and rules proposed in this *Notice of Proposed Rulemaking*. Written public comments are requested on this IRFA. Comments must be identified as responses to the IRFA and must be filed on or before the dates indicated on the first page of this *Notice of Proposed Rulemaking*. The Commission will send a copy of the Notice, including the IRFA, to the Chief Counsel for Advocacy of the Small Business Administration.³⁴ In addition, the Notice and IRFA (or summaries thereof) will be published in the **Federal Register**.³⁵

VI. Need for, and Objectives of, the Notice

2. This rulemaking proceeding was initiated for the Commission to obtain comments regarding its proposed amendment to its Schedule of Regulatory Fees in the amount of \$339,844,000, which is the amount that Congress has required the Commission to recover. The Commission seeks to collect the necessary amount through its revised Schedule of Regulatory Fees in the most efficient manner possible and without undue public burden.

VII. Legal Basis

3. This action, including publication of proposed rules, is authorized under sections (4)(i) and (j), 9, and 303(r) of the Communications Act of 1934, as amended.³⁶

³³ 5 U.S.C. 603. The RFA, 5 U.S.C. 601–612 has been amended by the Contract With America Advancement Act of 1996, Public Law 104–121, 110 Stat. 847 (1996) (“CWAAA”). Title II of the CWAAA is the Small Business Regulatory Enforcement Fairness Act of 1996 (“SBREFA”).

³⁴ 5 U.S.C. 603(a).

³⁵ *Id.*

³⁶ 47 U.S.C. 154(i) and (j), 159, and 303(r).

VIII. Description and Estimate of the Number of Small Entities to Which the Rules Will Apply

4. The RFA directs agencies to provide a description of, and where feasible, an estimate of the number of small entities that may be affected by the proposed rules and policies, if adopted.³⁷ The RFA generally defines the term “small entity” as having the same meaning as the terms “small business,” “small organization,” and “small governmental jurisdiction.”³⁸ In addition, the term “small business” has the same meaning as the term “small business concern” under the Small Business Act.³⁹ A “small business concern” is one which: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the SBA.⁴⁰

5. *Small Businesses*. Nationwide, there are a total of approximately 29.6 million small businesses, according to the SBA.⁴¹

6. *Small Organizations*. Nationwide, as of 2002, there are approximately 1.6 million small organizations.⁴² A “small organization” is generally “any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.”⁴³

7. *Small Governmental Jurisdictions*. The term “small governmental jurisdiction” is defined generally as “governments of cities, towns, townships, villages, school districts, or

special districts, with a population of less than fifty thousand.”⁴⁴ Census Bureau data for 2002 indicate that there were 87,525 local governmental jurisdictions in the United States.⁴⁵ We estimate that, of this total, 84,377 entities were “small governmental jurisdictions.”⁴⁶ Thus, we estimate that most governmental jurisdictions are small.

8. We have included small incumbent local exchange carriers in this present RFA analysis. As noted above, a “small business” under the RFA is one that, *inter alia*, meets the pertinent small business size standard (*e.g.*, a telephone communications business having 1,500 or fewer employees), and “is not dominant in its field of operation.”⁴⁷ The SBA’s Office of Advocacy contends that, for RFA purposes, small incumbent local exchange carriers are not dominant in their field of operation because any such dominance is not “national” in scope.⁴⁸ We have therefore included small incumbent local exchange carriers in this RFA analysis, although we emphasize that this RFA action has no effect on Commission analyses and determinations in other, non-RFA contexts.

9. *Incumbent Local Exchange Carriers (“ILECs”)*. Neither the Commission nor the SBA has developed a small business size standard specifically for incumbent local exchange services. The appropriate size standard under SBA rules is for the

⁴⁴ 5 U.S.C. 601(5).

⁴⁵ U.S. Census Bureau, Statistical Abstract of the United States: 2006, Section 8, p. 272, Table 415.

⁴⁶ We assume that the villages, school districts, and special districts are small, and total 48,558. See U.S. Census Bureau, Statistical Abstract of the United States: 2006, section 8, p. 273, Table 417. For 2002, Census Bureau data indicate that the total number of county, municipal, and township governments nationwide was 38,967, of which 35,819 were small. *Id.*

⁴⁷ 15 U.S.C. 632.

⁴⁸ Letter from Jere W. Glover, Chief Counsel for Advocacy, SBA, to William E. Kennard, Chairman, FCC (May 27, 1999). The Small Business Act contains a definition of “small-business concern,” which the RFA incorporates into its own definition of “small business.” See 15 U.S.C. 632(a) (“Small Business Act”); 5 U.S.C. 601(3) (“RFA”). SBA regulations interpret “small business concern” to include the concept of dominance on a national basis. See 13 CFR 121.102(b).

³⁷ 5 U.S.C. 603(b)(3).

³⁸ 5 U.S.C. 601(6).

³⁹ 5 U.S.C. 601(3) (incorporating by reference the definition of “small-business concern” in the Small Business Act, 15 U.S.C. 632). Pursuant to 5 U.S.C. 601(3), the statutory definition of a small business applies “unless an agency, after consultation with the Office of Advocacy of the Small Business Administration and after opportunity for public comment, establishes one or more definitions of such term which are appropriate to the activities of the agency and publishes such definition(s) in the **Federal Register**.”

⁴⁰ 15 U.S.C. 632.

⁴¹ See SBA, Office of Advocacy, “Frequently Asked Questions,” <http://web.sba.gov/faqs> (accessed Jan. 2009).

⁴² Independent Sector, *The New Nonprofit Almanac & Desk Reference* (2002).

⁴³ 5 U.S.C. 601(4).

category Wired Telecommunications Carriers. Under that size standard, such a business is small if it has 1,500 or fewer employees.⁴⁹ According to Commission data,⁵⁰ 1,311 carriers have reported that they are engaged in the provision of incumbent local exchange services. Of these 1,311 carriers, an estimated 1,024 have 1,500 or fewer employees and 287 have more than 1,500 employees. Consequently, the Commission estimates that most providers of incumbent local exchange service are small businesses that may be affected by our action.

10. *Competitive Local Exchange Carriers (“CLECs”), Competitive Access Providers (“CAPs”), “Shared-Tenant Service Providers,” and “Other Local Service Providers.”* Neither the Commission nor the SBA has developed a small business size standard specifically for these service providers. The appropriate size standard under SBA rules is for the category Wired Telecommunications Carriers. Under that size standard, such a business is small if it has 1,500 or fewer employees.⁵¹ According to Commission data,⁵² 1005 carriers have reported that they are engaged in the provision of either competitive access provider services or competitive local exchange carrier services. Of these 1005 carriers, an estimated 918 have 1,500 or fewer employees and 87 have more than 1,500 employees. In addition, 16 carriers have reported that they are “Shared-Tenant Service Providers,” and all 16 are estimated to have 1,500 or fewer employees. In addition, 89 carriers have reported that they are “Other Local Service Providers.” Of the 89, all have 1,500 or fewer employees. Consequently, the Commission estimates that most providers of competitive local exchange service, competitive access providers, “Shared-Tenant Service Providers,” and “Other Local Service Providers” are small entities that may be affected by our action.

11. *Local Resellers.* The SBA has developed a small business size standard for the category of Telecommunications Resellers. Under that size standard, such a business is small if it has 1,500 or fewer employees.⁵³ According to Commission

data,⁵⁴ 151 carriers have reported that they are engaged in the provision of local resale services. Of these, an estimated 149 have 1,500 or fewer employees and two have more than 1,500 employees. Consequently, the Commission estimates that the majority of local resellers are small entities that may be affected by our action.

12. *Toll Resellers.* The SBA has developed a small business size standard for the category of Telecommunications Resellers. Under that size standard, such a business is small if it has 1,500 or fewer employees.⁵⁵ According to Commission data,⁵⁶ 815 carriers have reported that they are engaged in the provision of toll resale services. Of these, an estimated 787 have 1,500 or fewer employees and 28 have more than 1,500 employees. Consequently, the Commission estimates that the majority of toll resellers are small entities that may be affected by our action.

13. *Payphone Service Providers (“PSPs”).* Neither the Commission nor the SBA has developed a small business size standard specifically for payphone services providers. The appropriate size standard under SBA rules is for the category Wired Telecommunications Carriers. Under that size standard, such a business is small if it has 1,500 or fewer employees.⁵⁷ According to Commission data,⁵⁸ 526 carriers have reported that they are engaged in the provision of payphone services. Of these, an estimated 524 have 1,500 or fewer employees and two have more than 1,500 employees. Consequently, the Commission estimates that the majority of payphone service providers are small entities that may be affected by our action.

14. *Interexchange Carriers (“IXCs”).* Neither the Commission nor the SBA has developed a small business size standard specifically for providers of interexchange services. The appropriate size standard under SBA rules is for the category Wired Telecommunications Carriers. Under that size standard, such a business is small if it has 1,500 or fewer employees.⁵⁹ According to Commission data,⁶⁰ 300 carriers have reported that they are engaged in the provision of interexchange service. Of these, an estimated 268 have 1,500 or fewer employees and 32 have more than 1,500 employees. Consequently, the

Commission estimates that the majority of IXCs are small entities that may be affected by our action.

15. *Operator Service Providers (“OSPs”).* Neither the Commission nor the SBA has developed a small business size standard specifically for operator service providers. The appropriate size standard under SBA rules is for the category Wired Telecommunications Carriers. Under that size standard, such a business is small if it has 1,500 or fewer employees.⁶¹ According to Commission data,⁶² 28 carriers have reported that they are engaged in the provision of operator services. Of these, an estimated 27 have 1,500 or fewer employees and one has more than 1,500 employees. Consequently, the Commission estimates that the majority of OSPs are small entities that may be affected by our action.

16. *Prepaid Calling Card Providers.* Neither the Commission nor the SBA has developed a small business size standard specifically for prepaid calling card providers. The appropriate size standard under SBA rules is for the category Telecommunications Resellers. Under that size standard, such a business is small if it has 1,500 or fewer employees.⁶³ According to Commission data,⁶⁴ 88 carriers have reported that they are engaged in the provision of prepaid calling cards. Of these, an estimated 85 have 1,500 or fewer employees and three have more than 1,500 employees. Consequently, the Commission estimates that the majority of prepaid calling card providers are small entities that may be affected by our action.

17. *800 and 800-Like Service Subscribers.*⁶⁵ Neither the Commission nor the SBA has developed a small business size standard specifically for 800 and 800-like service (“toll free”) subscribers. The appropriate size standard under SBA rules is for the category Telecommunications Resellers. Under that size standard, such a business is small if it has 1,500 or fewer employees.⁶⁶ The most reliable source of information regarding the number of these service subscribers appears to be data the Commission receives from Database Service Management on the 800, 866, 877, and 888 numbers in use.⁶⁷ According to our data, at the end of December 2007, the number of 800

⁴⁹ 13 CFR 121.201, North American Industry Classification System (NAICS) code 517110.

⁵⁰ FCC, Wireline Competition Bureau, Industry Analysis and Technology Division, “Trends in Telephone Service” at Table 5.3, Page 5–5 (Aug. 2008) (“Trends in Telephone Service”). This source uses data that are current as of November 1, 2006.

⁵¹ 13 CFR 121.201, NAICS code 517110.

⁵² “Trends in Telephone Service” at Table 5.3.

⁵³ 13 CFR § 121.201, NAICS code 517310.

⁵⁴ “Trends in Telephone Service” at Table 5.3.

⁵⁵ 13 CFR 121.201, NAICS code 517310.

⁵⁶ “Trends in Telephone Service” at Table 5.3.

⁵⁷ 3 CFR 121.201, NAICS code 517110.

⁵⁸ “Trends in Telephone Service” at Table 5.3.

⁵⁹ 13 CFR 121.201, NAICS code 517110.

⁶⁰ “Trends in Telephone Service” at Table 5.3.

⁶¹ 13 CFR 121.201, NAICS code 517110.

⁶² “Trends in Telephone Service” at Table 5.3.

⁶³ 13 CFR 121.201, NAICS code 517310.

⁶⁴ “Trends in Telephone Service” at Table 5.3.

⁶⁵ We include all toll-free number subscribers in this category.

⁶⁶ 13 CFR 121.201, NAICS code 517310.

⁶⁷ “Trends in Telephone Service” at Tables 18.4, 18.5, 18.6, and 18.7.

numbers assigned was 7,860,000; the number of 888 numbers assigned was 5,210,184; the number of 877 numbers assigned was 4,388,682; and the number of 866 numbers assigned was 7,029,116. We do not have data specifying the number of these subscribers that are independently owned and operated or have 1,500 or fewer employees, and thus are unable at this time to estimate with greater precision the number of toll free subscribers that would qualify as small businesses under the SBA size standard. Consequently, we estimate that there are 7,860,000 or fewer small entity 800 subscribers; 5,210,184 or fewer small entity 888 subscribers; 4,388,682 or fewer small entity 877 subscribers, and 7,029,116 or fewer entity 866 subscribers.

18. *Satellite Telecommunications and All Other Telecommunications.* These two economic census categories address the satellite industry. The first category has a small business size standard of \$15 million or less in average annual receipts, under SBA rules.⁶⁸ The second has a size standard of \$25 million or less in annual receipts.⁶⁹ The most current Census Bureau data in this context, however, are from the (last) economic census of 2002, and we will use those figures to gauge the prevalence of small businesses in these categories.⁷⁰

19. The category of Satellite Telecommunications “comprises establishments primarily engaged in providing telecommunications services to other establishments in the telecommunications and broadcasting industries by forwarding and receiving communications signals via a system of satellites or reselling satellite telecommunications.”⁷¹ For this category, Census Bureau data for 2002 show that there were a total of 371 firms that operated for the entire year.⁷² Of this total, 307 firms had annual receipts of under \$10 million, and 26 firms had receipts of \$10 million to \$24,999,999.⁷³ Consequently, we estimate that the majority of Satellite Telecommunications firms are small entities that might be affected by our action.

20. The second category of All Other Telecommunications comprises, inter

alia, “establishments primarily engaged in providing specialized telecommunications services, such as satellite tracking, communications telemetry, and radar station operation. This industry also includes establishments primarily engaged in providing satellite terminal stations and associated facilities connected with one or more terrestrial systems and capable of transmitting telecommunications to, and receiving telecommunications from, satellite systems.”⁷⁴ For this category, Census Bureau data for 2002 show that there were a total of 332 firms that operated for the entire year.⁷⁵ Of this total, 303 firms had annual receipts of under \$10 million and 15 firms had annual receipts of \$10 million to \$24,999,999.⁷⁶ Consequently, we estimate that the majority of All Other Telecommunications firms are small entities that might be affected by our action.

21. *Wireless Telecommunications Carriers (except Satellite).* Since 2007, the Census Bureau has placed wireless firms within this new, broad, economic census category.⁷⁷ Prior to that time, such firms were within the now-superseded categories of “Paging” and “Cellular and Other Wireless Telecommunications.”⁷⁸ Under the present and prior categories, the SBA has deemed a wireless business to be small if it has 1,500 or fewer employees.⁷⁹ For the category of Wireless Telecommunications Carriers (except Satellite), preliminary data for 2007 show that there was 11,927 firms operating that year.⁸⁰ While the Census

Bureau has not released data on the establishments broken down by number of employees, we note that the Census Bureau lists total employment for all firms in that sector at 281,262.⁸¹ Since all firms with fewer than 1,500 employees are considered small, given the total employment in the sector, we estimate that the vast majority of wireless firms are small.

22. *Auctions.* Initially, we note that, as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Also, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated.

23. *Common Carrier Paging.* As noted, the SBA has developed a small business size standard for Wireless Telecommunications Carriers (except Satellite) firms within the broad economic census categories of “Cellular and Other Wireless Telecommunications.”⁸² Since 2007, the Census Bureau has placed wireless firms within this new, broad, economic census category.⁸³ Prior to that time, such firms were within the now-superseded categories of “Paging” and “Cellular and Other Wireless Telecommunications.”⁸⁴ Under the present and prior categories, the SBA has deemed a wireless business to be small if it has 1,500 or fewer employees.⁸⁵ Because Census Bureau data are not yet available for the new category, we will estimate small business prevalence using the prior categories and associated data. For the category of Paging, data for 2002 show that there were 807 firms that operated for the entire year.⁸⁶ Of this total, 804 firms had employment of 999 or fewer employees, and three firms had employment of 1,000 employees or

⁷³ *Id.* An additional 38 firms had annual receipts of \$25 million or more.

more.⁸⁷ For the category of Cellular and Other Wireless Telecommunications, data for 2002 show that there were 1,397 firms that operated for the entire year.⁸⁸ Of this total, 1,378 firms had employment of 999 or fewer employees, and 19 firms had employment of 1,000 employees or more.⁸⁹ Thus, we estimate that the majority of wireless firms are small.

24. In addition, in the *Paging Second Report and Order*, the Commission adopted a size standard for “small businesses” for purposes of determining their eligibility for special provisions such as bidding credits.⁹⁰ A small business is an entity that, together with its affiliates and controlling principals, has average gross revenues not exceeding \$15 million for the preceding three years.⁹¹ The SBA has approved this definition.⁹² An initial auction of Metropolitan Economic Area (“MEA”) licenses was conducted in the year 2000. Of the 2,499 licenses auctioned, 985 were sold.⁹³ Fifty-seven companies claiming small business status won 440 licenses.⁹⁴ A subsequent auction of MEA and Economic Area (“EA”) licenses was held in the year 2001. Of the 15,514 licenses auctioned, 5,323 were sold.⁹⁵ One hundred thirty-two companies claiming small business status purchased 3,724 licenses. A third auction, consisting of 8,874 licenses in each of 175 EAs and 1,328 licenses in all but three of the 51 MEAs, was held

in 2003. Seventy-seven bidders claiming small or very small business status won 2,093 licenses.⁹⁶

25. Currently, there are approximately 74,000 Common Carrier Paging licenses. According to the most recent *Trends in Telephone Service*, 281 carriers reported that they were engaged in the provision of “paging and messaging” services.⁹⁷ Of these, an estimated 279 have 1,500 or fewer employees and two have more than 1,500 employees.⁹⁸ We estimate that the majority of common carrier paging providers would qualify as small entities under the SBA definition.

26. *2.3 GHz Wireless Communications Services*. This service can be used for fixed, mobile, radiolocation, and digital audio broadcasting satellite uses. The Commission defined “small business” for the wireless communications services (“WCS”) auction as an entity with average gross revenues of \$40 million for each of the three preceding years, and a “very small business” as an entity with average gross revenues of \$15 million for each of the three preceding years.⁹⁹ The SBA approved these definitions.¹⁰⁰ The Commission conducted an auction of geographic area licenses in the WCS service in 1997. In the auction, seven bidders that qualified as very small business entities won licenses, and one bidder that qualified as a small business entity won a license.

27. *1670–1675 MHz Services*. This service can be used for fixed and mobile uses, except aeronautical mobile.¹⁰¹ An auction for one license in the 1670–1675 MHz band was conducted in 2003. The winning bidder was not a small entity.

28. *Wireless Telephony*. Wireless telephony includes cellular, personal communications services, and specialized mobile radio telephony carriers. As noted, the SBA has developed a small business size standard for Wireless Telecommunications Carriers (except Satellite).¹⁰² Under the SBA small business size standard, a business is small if it has 1,500 or fewer

employees.¹⁰³ According to *Trends in Telephone Service* data, 413 carriers reported that they were engaged in wireless telephony.¹⁰⁴ Of these, an estimated 261 have 1,500 or fewer employees and 152 have more than 1,500 employees.¹⁰⁵ Therefore, more than half of these entities can be considered small.

29. *Broadband Personal Communications Service*. The broadband personal communications services (“PCS”) spectrum is divided into six frequency blocks designated A through F, and the Commission has held auctions for each block. The Commission initially defined a “small business” for C- and F-Block licenses as an entity that has average gross revenues of \$40 million or less in the three previous years.¹⁰⁶ For Block F licenses, an additional small business size standard for “very small business” was added and is defined as an entity that, together with its affiliates, has average gross revenues of not more than \$15 million for the preceding three years.¹⁰⁷ These small business size standards, in the context of broadband PCS auctions, have been approved by the SBA.¹⁰⁸ No small businesses within the SBA-approved small business size standards bid successfully for licenses in Blocks A and B. There were 90 winning bidders that claimed small business status in the first two C Block auctions.¹⁰⁹ A total of 93 bidders that claimed “small” and “very small” business status won licenses in the first auction of the D, E, and F Blocks.¹¹⁰ In 1999, the Commission completed a subsequent auction of C, D, E, and F Block licenses.¹¹¹ Of the 57 winning bidders

⁸⁷ *Id.* The census data do not provide a more precise estimate of the number of firms that have employment of 1,500 or fewer employees; the largest category provided is for firms with “1000 employees or more.”

⁸⁸ U.S. Census Bureau, 2002 Economic Census, Subject Series: Information, “Establishment and Firm Size (Including Legal Form of Organization,” Table 5, NAICS code 517212 (issued Nov. 2005).

⁸⁹ *Id.* The census data do not provide a more precise estimate of the number of firms that have employment of 1,500 or fewer employees; the largest category provided is for firms with “1000 employees or more.”

Amendment of the Commission’s Rules Regarding Installment Payment Financing for Personal Communications Services (PCS) Licensees, WT Docket No. 97–82, *Fourth Report and Order*, 13 FCC Rcd 15,743, 15,768 para. 46 (1998).

in that auction, 48 claimed small business status and won 277 licenses.¹¹²

30. In 2001, the Commission completed the auction of 422 C and F Block Broadband PCS licenses (Auction 35). Of the 35 winning bidders in that auction, 29 claimed small or very small businesses status.¹¹³ Subsequent events concerning that Auction, including judicial and agency determinations, resulted in only a portion of those C and F Block licenses being available for grant. The Commission completed an auction of 188 C Block licenses and 21 F Block licenses in 2005. Of the 24 winning bidders in that auction, 16 claimed small business status and won 156 licenses.¹¹⁴ In 2007, the Commission completed an auction of licenses in the A, C, and F Blocks.¹¹⁵ Of the 12 winning bidders in that auction, five claimed small business status and won 18 licenses.¹¹⁶ Most recently, in 2008, the Commission completed the auction of C, D, E, and F Block Broadband PCS licenses.¹¹⁷ Of the eight winning bidders for Broadband PCS licenses in that auction, six claimed small business status and won 14 licenses.¹¹⁸

31. *Advanced Wireless Services.* In 2006, the Commission conducted its first auction of Advanced Wireless Services licenses in the 1710–1755 MHz and 2110–2155 MHz bands (“AWS–1”), designated as Auction 66.¹¹⁹ For the AWS–1 bands, the Commission has defined a “small business” as an entity with average annual gross revenues for the preceding three years not exceeding \$40 million, and a “very small business” as an entity with average annual gross revenues for the preceding three years not exceeding \$15 million.¹²⁰ In Auction 66, 31 winning

bidders identified themselves as very small businesses and won 142 licenses.¹²¹ Twenty-six of the winning bidders identified themselves as small businesses and won 73 licenses.¹²² In a subsequent 2008 auction, the Commission offered 35 AWS–1 licenses.¹²³ Four winning bidders identifying themselves as very small businesses won 17 licenses, and three winning bidders identifying themselves as a small business won five AWS–1 licenses.¹²⁴

32. *Narrowband Personal Communications Services.* In 1994, the Commission conducted two auctions of Narrowband PCS licenses. For these auctions, the Commission defined a “small business” as an entity with average annual gross revenues for the preceding three years not exceeding \$40 million.¹²⁵ Through these auctions, the Commission awarded a total of 41 licenses, 11 of which were obtained by four small businesses.¹²⁶ To ensure meaningful participation by small business entities in future auctions, the Commission adopted a two-tiered small business size standard in the *Narrowband PCS Second Report and Order*.¹²⁷ A “small business” is an entity that, together with affiliates and controlling interests, has average gross revenues for the three preceding years of

and Order, 18 FCC Rcd 25,162, App. B (2003), modified by Service Rules for Advanced Wireless Services in the 1.7 GHz and 2.1 GHz Bands, *Order on Reconsideration*, 20 FCC Rcd 14,058, App. C (2005).

¹²⁷ *Amendment of the Commission’s Rules to Establish New Personal Communications Services, Narrowband PCS, Second Report and Order and Second Further Notice of Proposed Rule Making*, 15 FCC Rcd 10456, 10476, para. 40 (2000) (“*Narrowband PCS Second Report and Order*”).

not more than \$40 million.¹²⁸ A “very small business” is an entity that, together with affiliates and controlling interests, has average gross revenues for the three preceding years of not more than \$15 million.¹²⁹ The SBA has approved these small business size standards.¹³⁰ A third auction of Narrowband PCS licenses was conducted in 2001. In that auction, five bidders won 317 (Metropolitan Trading Areas and nationwide) licenses.¹³¹ Three of the winning bidders claimed status as a small or very small entity and won 311 licenses.

33. *Lower 700 MHz Band Licenses.* The Commission previously adopted criteria for defining three groups of small businesses for purposes of determining their eligibility for special provisions such as bidding credits.¹³² The Commission defined a “small business” as an entity that, together with its affiliates and controlling principals, has average gross revenues not exceeding \$40 million for the preceding three years.¹³³ A “very small business” is defined as an entity that, together with its affiliates and controlling principals, has average gross revenues that are not more than \$15 million for the preceding three years.¹³⁴ Additionally, the Lower 700 MHz Service had a third category of small business status for Metropolitan/Rural Service Area (“MSA/RSA”) licenses—“entrepreneur”—which is defined as an entity that, together with its affiliates and controlling principals, has average gross revenues that are not more than \$3 million for the preceding three years.¹³⁵ The SBA approved these small size standards.¹³⁶ An auction of 740 licenses was conducted in 2002 (one license in each of the 734 MSAs/RSAs and one license in each of the six Economic Area Groupings (EAGs)). Of the 740 licenses available for auction, 484 licenses were won by 102 winning bidders. Seventy-two of the winning bidders claimed small business, very small business, or entrepreneur status and won a total of

¹²⁰ See Service Rules for Advanced Wireless Services in the 1.7 GHz and 2.1 GHz Bands, *Report*

329 licenses.¹³⁷ A second auction commenced on May 28, 2003, closed on June 13, 2003, and included 256 licenses.¹³⁸ Seventeen winning bidders claimed small or very small business status and won 60 licenses, and nine winning bidders claimed entrepreneur status and won 154 licenses.¹³⁹ In 2005, the Commission completed an auction of 5 licenses in the lower 700 MHz band (Auction 60). All three winning bidders claimed small business status.

34. In 2007, the Commission reexamined its rules governing the 700 MHz band in the *700 MHz Second Report and Order*.¹⁴⁰ An auction of A, B and E block licenses in the Lower 700 MHz band was held in 2008.¹⁴¹ Twenty winning bidders claimed small business status (those with attributable average annual gross revenues that exceed \$15 million and do not exceed \$40 million for the preceding three years). Thirty three winning bidders claimed very small business status (those with attributable average annual gross revenues that do not exceed \$15 million for the preceding three years).

35. *Upper 700 MHz Band Licenses*. In the *700 MHz Second Report and Order*, the Commission revised its rules regarding Upper 700 MHz band licenses.¹⁴² In 2008, the Commission conducted Auction 73 in which C and D block licenses in the Upper 700 MHz band were available.¹⁴³ Three winning bidders claimed very small business status (those with attributable average annual gross revenues that do not

exceed \$15 million for the preceding three years).

36. *700 MHz Guard Band Licenses*. In 2000, the Commission adopted the *700 MHz Guard Band Report and Order*, in which it established rules for the A and B block licenses in the Upper 700 MHz band, including size standards for “small businesses” and “very small businesses” for purposes of determining their eligibility for special provisions such as bidding credits.¹⁴⁴ A small business in this service is an entity that, together with its affiliates and controlling principals, has average gross revenues not exceeding \$40 million for the preceding three years.¹⁴⁵ Additionally, a very small business is an entity that, together with its affiliates and controlling principals, has average gross revenues that are not more than \$15 million for the preceding three years.¹⁴⁶ SBA approval of these definitions is not required.¹⁴⁷ An auction of these licenses was conducted in 2000.¹⁴⁸ Of the 104 licenses auctioned, 96 licenses were won by nine bidders. Five of these bidders were small businesses that won a total of 26 licenses. A second auction of 700 MHz Guard Band licenses was held in 2001. All eight of the licenses auctioned were sold to three bidders. One of these bidders was a small business.¹⁴⁹

37. *Specialized Mobile Radio*. The Commission adopted small business size standards for the purpose of determining eligibility for bidding credits in auctions of Specialized Mobile Radio (SMR) geographic area licenses in the 800 MHz and 900 MHz bands. The Commission defined a “small business” as an entity that, together with its affiliates and controlling principals, has average gross revenues not exceeding \$15 million for the preceding three years.¹⁵⁰ The Commission defined a “very small business” as an entity that together with its affiliates and controlling principals, has average gross revenues not

exceeding \$3 million for the preceding three years.¹⁵¹ The SBA has approved these small business size standards for both the 800 MHz and 900 MHz SMR Service.¹⁵² The first 900 MHz SMR auction was completed in 1996. Sixty bidders claiming that they qualified as small businesses under the \$15 million size standard won 263 licenses in the 900 MHz SMR band. In 2004, the Commission held a second auction of 900 MHz SMR licenses and three winning bidders identifying themselves as very small businesses won 7 licenses.¹⁵³ The auction of 800 MHz SMR licenses for the upper 200 channels was conducted in 1997. Ten bidders claiming that they qualified as small or very small businesses under the \$15 million size standard won 38 licenses for the upper 200 channels.¹⁵⁴ A second auction of 800 MHz SMR licenses was conducted in 2002 and included 23 BEA licenses. One bidder claiming small business status won five licenses.¹⁵⁵

38. The auction of the 1,053 800 MHz SMR licenses for the General Category channels was conducted in 2000. Eleven bidders who won 108 licenses for the General Category channels in the 800 MHz SMR band qualified as small or very small businesses.¹⁵⁶ In an auction completed in 2000, a total of 2,800 Economic Area licenses in the lower 80 channels of the 800 MHz SMR service were awarded.¹⁵⁷ Of the 22 winning bidders, 19 claimed small or very small business status and won 129 licenses. Thus, combining all three auctions, 41 winning bidders for geographic licenses in the 800 MHz SMR band claimed to be small businesses.

39. In addition, there are numerous incumbent site-by-site SMR licensees and licensees with extended implementation authorizations in the 800 and 900 MHz bands. We do not know how many firms provide 800 MHz

¹⁵⁷ See, “800 MHz SMR Service Lower 80 Channels Auction Closes: Winning Bidders Announced,” *Public Notice*, 16 FCC Rcd 1736 (2000).

or 900 MHz geographic area SMR pursuant to extended implementation authorizations, nor how many of these providers have annual revenues not exceeding \$15 million. One firm has over \$15 million in revenues. In addition, we do not know how many of these firms have 1500 or fewer employees.¹⁵⁸ We assume, for purposes of this analysis, that all of the remaining existing extended implementation authorizations are held by small entities, as that small business size standard is approved by the SBA.

40. *220 MHz Radio Service—Phase I Licensees.* The 220 MHz service has both Phase I and Phase II licenses. Phase I licensing was conducted by lotteries in 1992 and 1993. There are approximately 1,515 such non-nationwide licensees and four nationwide licensees currently authorized to operate in the 220 MHz band. The Commission has not developed a definition of small entities specifically applicable to such incumbent 220 MHz Phase I licensees. To estimate the number of such licensees that are small businesses, we apply the small business size standard under the SBA rules applicable to Wireless Telecommunications Carriers (except Satellite).¹⁵⁹ This category provides that a small business is a wireless company employing no more than 1,500 persons.¹⁶⁰ The Commission estimates that most such licensees are small businesses under the SBA's small business standard.

41. *220 MHz Radio Service—Phase II Licensees.* The 220 MHz service has both Phase I and Phase II licenses. The Phase II 220 MHz service licenses are assigned by auction, where mutually exclusive applications are accepted. In the *220 MHz Third Report and Order*, the Commission adopted small business size standards for defining "small" and "very small" businesses for the purpose of determining their eligibility for special provisions such as bidding credits, which are discounts on a winning bids.¹⁶¹ that the Commission defined a "small business" as an entity that, together with its affiliates and controlling principals, has average gross revenues not exceeding \$15 million for the preceding three years.¹⁶² The Commission defined a "very small business" as an entity that, together

with its affiliates and controlling principals, has average gross revenues that do not exceed \$3 million for the preceding three years.¹⁶³ The SBA has approved these small size standards.¹⁶⁴ The first auction of Phase II licenses was conducted in 1998.¹⁶⁵ In that auction, 908 licenses were offered in three different-sized geographic areas: three nationwide licenses, 30 Regional Economic Area Group ("EAG") Licenses, and 875 Economic Area (EA) Licenses. Of the 908 licenses auctioned, 693 were sold.¹⁶⁶ Thirty-nine small or very small businesses won 373 licenses in the first 220 MHz auction. A second auction in 1999 offered 225 licenses: 216 EA licenses and 9 EAG licenses. Fourteen companies claiming very small business status won 158 licenses.¹⁶⁷ A third auction included four licenses: 2 BEA licenses and 2 EAG licenses in the 220 MHz Service. No small or very small business won any of these licenses.¹⁶⁸ In 2007, the Commission conducted a fourth auction of the 220 MHz licenses, designated as Auction 72.¹⁶⁹ Auction 72 offered 94 Phase II 220 MHz Service licenses.¹⁷⁰ In this auction, five winning bidders won a total of 76 licenses.¹⁷¹ Two winning bidders that identified themselves as very small businesses won 56 of the 76 licenses. One winning bidder that identified itself as a small business won 5 licenses.

42. *Private Land Mobile Radio ("PLMR").* PLMR systems serve an essential role in a range of industrial, business, land transportation, and public safety activities. These radios are used by companies of all sizes operating in all U.S. business categories, and are often used in support of the licensee's primary (non-telecommunications)

business operations. For the purpose of determining whether a licensee of a PLMR system is a small business as defined by the SBA, we use the broad census category, Wireless Telecommunications Carriers (except Satellite). This definition provides that a small entity is any such entity employing no more than 1,500 persons.¹⁷² The Commission does not require PLMR licensees to disclose information about number of employees, so the Commission does not have information that could be used to determine how many PLMR licensees constitute small entities under this definition. We note that PLMR licensees generally use the licensed facilities in support of other business activities, and therefore, it would also be helpful to assess PLMR licensees under the standards applied to the particular industry subsector to which the licensee belongs.¹⁷³

43. As of March 2010, there were 424,162 PLMR licensees operating 921,909 transmitters in the PLMR bands below 512 MHz. We note that any entity engaged in a commercial activity is eligible to hold a PLMR license, and that any revised rules in this context could therefore potentially impact small entities covering a great variety of industries.

44. *Fixed Microwave Services.* Fixed microwave services include common carrier,¹⁷⁴ private operational-fixed,¹⁷⁵ and broadcast auxiliary radio services.¹⁷⁶ At present, there are approximately 22,015 common carrier fixed licensees and 61,670 private operational-fixed licensees and broadcast auxiliary radio licensees in the microwave services. The Commission has not created a size standard for a small business specifically with respect to fixed

¹⁶¹ *Amendment of Part 90 of the Commission's Rules to Provide For the Use of the 220–222 MHz Band by the Private Land Mobile Radio Service*, Third Report and Order, 12 FCC Rcd 10943, 11068–70, paras. 291–295 (1997).

¹⁶² *Id.* at 11068, para. 291.

¹⁷² See 13 CFR 121.201, NAICS code 517210.

¹⁷³ See generally 13 CFR 121.201.

¹⁷⁴ See 47 CFR 101 *et seq.* for common carrier fixed microwave services (except Multipoint Distribution Service).

¹⁷⁵ Persons eligible under parts 80 and 90 of the Commission's Rules can use Private Operational-Fixed Microwave services. See 47 CFR Parts 80 and 90. Stations in this service are called operational-fixed to distinguish them from common carrier and public fixed stations. Only the licensee may use the operational-fixed station, and only for communications related to the licensee's commercial, industrial, or safety operations.

¹⁷⁶ Auxiliary Microwave Service is governed by Part 74 of Title 47 of the Commission's rules. See 47 CFR Part 74. This service is available to licensees of broadcast stations and to broadcast and cable network entities. Broadcast auxiliary microwave stations are used for relaying broadcast television signals from the studio to the transmitter, or between two points such as a main studio and an auxiliary studio. The service also includes mobile television pickups, which relay signals from a remote location back to the studio.

microwave services. For purposes of this analysis, the Commission uses the SBA small business size standard for the category Wireless Telecommunications Carriers (except Satellite), which is 1,500 or fewer employees.¹⁷⁷ The Commission does not have data specifying the number of these licensees that have no more than 1,500 employees, and thus are unable at this time to estimate with greater precision the number of fixed microwave service licensees that would qualify as small business concerns under the SBA's small business size standard. Consequently, the Commission estimates that there are 22,015 or fewer common carrier fixed licensees and 61,670 or fewer private operational-fixed licensees and broadcast auxiliary radio licensees in the microwave services that may be small and may be affected by the rules and policies proposed herein. We note, however, that the common carrier microwave fixed licensee category includes some large entities.

45. *39 GHz Service.* The Commission adopted small business size standards for 39 GHz licenses. A "small business" is defined as an entity that, together with its affiliates and controlling principals, has average gross revenues not exceeding \$40 million in the preceding three years.¹⁷⁸ A "very small business" is defined as an entity that, together with its affiliates and controlling principals, has average gross revenues of not more than \$15 million for the preceding three years.¹⁷⁹ The SBA has approved these small business size standards.¹⁸⁰ In 2000, the Commission conducted an auction of 2,173, 39 GHz licenses. A total of 18 bidders who claimed small or very small business status won 849 licenses.

46. *Local Multipoint Distribution Service.* Local Multipoint Distribution Service ("LMDS") is a fixed broadband point-to-multipoint microwave service that provides for two-way video telecommunications.¹⁸¹ The

Commission established small business size standards for LMDS licenses. It defined a "small business" as an entity that has average gross revenues of not more than \$40 million in the three preceding years and defined a "very small business" as an entity that, together with its affiliates, has average gross revenues of not more than \$15 million for the three preceding years.¹⁸² The SBA approved these small business size standards for auctions of LMDS licenses.¹⁸³ In 1998, an auction of 986 LMDS licenses was conducted. A total of 93 winning bidders that qualified as small or very small businesses won approximately 664 licenses. In 1999, the Commission conducted an auction of 161 LMDS licenses, and in this auction, 32 small and very small businesses won 119 licenses.

47. *218–219 MHz Service.* The first auction of 218–219 MHz Service (previously referred to as the Interactive and Video Data Service or IVDS) licenses resulted in 178 entities winning licenses for 594 Metropolitan Statistical Areas ("MSAs").¹⁸⁴ Of the 594 licenses, 567 were won by 167 entities qualifying as a small business. For that auction, the Commission defined a small business as an entity that, together with its affiliates, has no more than a \$6 million net worth and, after federal income taxes (excluding any carry over losses), has no more than \$2 million in annual profits each year for the previous two years.¹⁸⁵ In the *218–219 MHz Report and Order and Memorandum Opinion and Order*, the Commission revised its small business size standards for the 218–219 MHz Service and defined a small business as an entity that, together with its affiliates and persons or entities that hold interests in such an entity and their affiliates, has average annual gross revenues not exceeding \$15 million for the preceding three years.¹⁸⁶ The Commission defined a very small business as an entity that, together with its affiliates and persons or entities that hold interests in such an entity and its affiliates, has average annual gross

revenues not exceeding \$3 million for the preceding three years.¹⁸⁷ The SBA has approved these definitions.¹⁸⁸

48. *Location and Monitoring Service ("LMS").* Multilateration LMS systems use non-voice radio techniques to determine the location and status of mobile radio units. For auctions of LMS licenses, the Commission has defined a "small business" as an entity that, together with controlling interests and affiliates, has average annual gross revenues for the preceding three years not exceeding \$15 million.¹⁸⁹ A "very small business" is defined as an entity that, together with controlling interests and affiliates, has average annual gross revenues for the preceding three years not exceeding \$3 million.¹⁹⁰ These definitions have been approved by the SBA.¹⁹¹ An auction of LMS licenses was conducted in 1999. Of the 528 licenses auctioned, 289 licenses were sold to four small businesses.

49. *Rural Radiotelephone Service.* The Commission has not adopted a size standard for small businesses specific to the Rural Radiotelephone Service.¹⁹² A significant subset of the Rural Radiotelephone Service is the Basic Exchange Telephone Radio System ("BETRS").¹⁹³ In the present context, we will use the SBA's small business size standard applicable to Wireless Telecommunications Carriers (except Satellite), *i.e.*, an entity employing no more than 1,500 persons.¹⁹⁴ There are approximately 1,000 licensees in the Rural Radiotelephone Service, and the Commission estimates that there are 1,000 or fewer small entity licensees in the Rural Radiotelephone Service that may be affected by our action.

50. *Air-Ground Radiotelephone Service.*¹⁹⁵ The Commission has previously used the SBA's small business definition applicable to Wireless Telecommunications Carriers (except Satellite), *i.e.*, an entity employing no more than 1,500 persons.¹⁹⁶ There are approximately 100

licensees in the Air-Ground Radiotelephone Service, and under that definition, we estimate that almost all of them qualify as small entities under the SBA definition. For purposes of assigning Air-Ground Radiotelephone Service licenses through competitive bidding, the Commission has defined “small business” as an entity that, together with controlling interests and affiliates, has average annual gross revenues for the preceding three years not exceeding \$40 million.¹⁹⁷ A “very small business” is defined as an entity that, together with controlling interests and affiliates, has average annual gross revenues for the preceding three years not exceeding \$15 million.¹⁹⁸ These definitions were approved by the SBA.¹⁹⁹ In 2006, the Commission completed an auction of nationwide commercial Air-Ground Radiotelephone Service licenses in the 800 MHz band (Auction 65). The auction closed with two winning bidders winning two Air-Ground Radiotelephone Services licenses. Neither of the winning bidders claimed small business status.

51. *Aviation and Marine Radio Services.* There are approximately 26,162 aviation, 34,555 marine (ship), and 3,296 marine (coast) licensees.²⁰⁰ The Commission has not developed a small business size standard specifically applicable to all licensees. For purposes of this analysis, we will use the SBA small business size standard for the category Wireless Telecommunications Carriers (except Satellite), which is 1,500 or fewer employees.²⁰¹ We are unable to determine how many of those licensed fall under this standard. For purposes of our evaluations in this analysis, we estimate that there are up to approximately 62,969 licensees that are small businesses under the SBA

standard.²⁰² In 1998, the Commission held an auction of 42 VHF Public Coast licenses in the 157.1875–157.4500 MHz (ship transmit) and 161.775–162.0125 MHz (coast transmit) bands. For VHF Public Coast licenses, the Commission defined a “small” business as an entity that, together with controlling interests and affiliates, has average gross revenues for the preceding three years not exceeding \$15 million dollars. In addition, it defined a “very small” business as one that, together with controlling interests and affiliates, has average gross revenues for the preceding three years not exceeding \$3 million dollars.²⁰³ The Commission also made available Automated Maritime Telecommunications System (“AMTS”) licenses in Auctions 57 and 61.²⁰⁴ Winning bidders could claim status as a very small business or a very small business. For AMTS, the Commission defined a very small business as an entity with attributed average annual gross revenues that do not exceed \$3 million for the preceding three years, and defined a small business as an entity with attributed average annual gross revenues not exceeding \$15 million for the preceding three years.²⁰⁵ Three of the winning bidders in Auction 57 qualified as small or very small businesses, and three winning bidders in Auction 61 qualified as very small businesses.

52. *Offshore Radiotelephone Service.* This service operates on several ultra high frequencies (“UHF”) television broadcast channels that are not used for television broadcasting in the coastal areas of states bordering the Gulf of Mexico.²⁰⁶ There is presently 1 licensee in this service. We do not have information whether that licensee would qualify as small under the SBA’s small business size standard for Wireless Telecommunications Carriers

(except Satellite) services.²⁰⁷ Under that SBA small business size standard, a business is small if it has 1,500 or fewer employees.²⁰⁸

53. *Multiple Address Systems (“MAS”).* Entities using MAS spectrum, in general, fall into two categories: (1) those using the spectrum for profit-based uses, and (2) those using the spectrum for private internal uses. The Commission defines a small business for MAS licenses as an entity that has average gross revenues of less than \$15 million in the preceding three calendar years.²⁰⁹ A very small business is defined as an entity that, together with its affiliates, has average gross revenues of not more than \$3 million for the preceding three calendar years.²¹⁰ The SBA has approved these definitions.²¹¹ The majority of these entities will most likely be licensed in bands where the Commission has implemented a geographic area licensing approach that would require the use of competitive bidding procedures to resolve mutually exclusive applications. The Commission’s licensing database indicates that, as of March 5, 2010, there were over 11,500 MAS station authorizations. In 2001, an auction of 5,104 MAS licenses in 176 EAs was conducted in 2001.²¹² Seven winning bidders claimed status as small or very small businesses and won 611 licenses. In 2005, the Commission completed an auction (Auction 59) of 4,226 MAS licenses in the Fixed Microwave Services from the 928/959 and 932/941 MHz bands. Twenty-six winning bidders won a total of 2,323 licenses. Of the 26 winning bidders in this auction, five claimed small business status and won 1,891 licenses.

54. With respect to entities that use, or seek to use, MAS spectrum to accommodate internal communications needs, we note that MAS serves an essential role in a range of industrial, safety, business, and land transportation activities. MAS radios are used by companies of all sizes, operating in virtually all U.S. business categories, and by all types of public safety entities. For the majority of private internal users, the small business size standard developed by the SBA would be more appropriate. The applicable size standard in this instance appears to be

¹⁹⁷ *Amendment of Part 22 of the Commission’s Rules to Benefit the Consumers of Air-Ground Telecommunications Services, Biennial Regulatory Review—Amendment of Parts 1, 22, and 90 of the Commission’s Rules, Amendment of Parts 1 and 22 of the Commission’s Rules to Adopt Competitive Bidding Rules for Commercial and General Aviation Air-Ground Radiotelephone Service*, WT Docket Nos. 03–103 and 05–42, Order on Reconsideration and Report and Order, 20 FCC Rcd 19663, paras. 28 through 42 (2005).

²¹² See “Multiple Address Systems Spectrum Auction Closes,” Public Notice, 16 FCC Rcd 21011 (2001).

that of Wireless Telecommunications Carriers (except Satellite). This definition provides that a small entity is any such entity employing no more than 1,500 persons.²¹³ The Commission's licensing database indicates that, as of January 20, 1999, of the 8,670 total MAS station authorizations, 8,410 authorizations were for private radio service, and of these, 1,433 were for private land mobile radio service.

55. *1.4 GHz Band Licensees.* The Commission conducted an auction of 64 1.4 GHz band licenses in the paired 1392–1395 MHz and 1432–1435 MHz bands, and in the unpaired 1390–1392 MHz band in 2007.²¹⁴ For these licenses, the Commission defined “small business” as an entity that, together with its affiliates and controlling interests, had average gross revenues not exceeding \$40 million for the preceding three years, and a “very small business” as an entity that, together with its affiliates and controlling interests, has had average annual gross revenues not exceeding \$15 million for the preceding three years.²¹⁵ Neither of the two winning bidders claimed small business status.²¹⁶

56. *Incumbent 24 GHz Licensees.* This analysis may affect incumbent licensees who were relocated to the 24 GHz band from the 18 GHz band, and applicants who wish to provide services in the 24 GHz band. The applicable SBA small business size standard is that of Wireless Telecommunications Carriers (except Satellite). This category provides that such a company is small if it employs no more than 1,500 persons.²¹⁷ The broader census data notwithstanding, we believe that there are only two licensees in the 24 GHz band that were relocated from the 18 GHz band, Teligent²¹⁸ and TRW, Inc. It is our understanding that Teligent and its related companies have fewer than 1,500 employees, though this may change in the future. TRW is not a small entity.

57. *Future 24 GHz Licensees.* With respect to new applicants for licenses in the 24 GHz band, for the purpose of determining eligibility for bidding

credits, the Commission established three small business definitions. An “entrepreneur” is defined as an entity that, together with controlling interests and affiliates, has average annual gross revenues for the three preceding years not exceeding \$40 million.²¹⁹ A “small business” is defined as an entity that, together with controlling interests and affiliates, has average annual gross revenues for the three preceding years not exceeding \$15 million.²²⁰ A “very small business” in the 24 GHz band is defined as an entity that, together with controlling interests and affiliates, has average gross revenues not exceeding \$3 million for the preceding three years.²²¹ The SBA has approved these definitions.²²² In a 2004 auction of 24 GHz licenses, three winning bidders won seven licenses. Two of the winning bidders were very small businesses that won five licenses.

58. *Broadband Radio Service and Educational Broadband Service.* Broadband Radio Service systems, previously referred to as Multipoint Distribution Service (“MDS”) and Multichannel Multipoint Distribution Service (“MMDS”) systems, provide two-way high speed data operations using the microwave frequencies of the Broadband Radio Service (“BRS”) and Educational Broadband Service (“EBS”) (previously referred to as the Instructional Television Fixed Service (“ITFS”)).²²³ Some BRS systems, known as “wireless cable”, transmit video programming to subscribers. In connection with the 1996 BRS auction, the Commission established a size standard that defined a “small business” as an entity that had annual average gross revenues of no more than \$40 million in the preceding three years.²²⁴ The BRS auctions resulted in 67 successful bidders obtaining licensing opportunities for 493 Basic Trading Areas (“BTAs”). Of the 67

winning bidders, 61 met the definition of a small business. At this time, we estimate that of the 61 small businesses that won BRS licenses in the 1996 auction, 48 remain small business licensees. BRS also includes licensees of stations authorized prior to the 1996 auction. In addition to the 48 small businesses that hold BTA authorizations, there are approximately 392 incumbent BRS licensees that are considered small entities.²²⁵ In 2008, the Commission adopted three small business definitions for BRS, for the purpose of determining eligibility for bidding credits. A “small business” is defined as an entity with attributed average annual gross revenues that do not exceed \$40 million for the preceding three years. A “very small business” is defined as an entity with attributed average annual gross revenues that do not exceed \$15 million for the preceding three years. An “entrepreneur” is defined as an entity with attributed average annual gross revenues that do not exceed \$3 million for the preceding three years.²²⁶ In 2009, the Commission conducted Auction 86, which offered 78 BRS licenses.²²⁷ Auction 86 concluded with the sale of 61 licenses.²²⁸ Of the ten winning bidders, three bidders that claimed small business status won 7 licenses, and two bidders that claimed entrepreneur status won six licenses. After adding the number of small businesses that won licenses in the Commission's BRS auctions to the approximately 392 incumbent BRS licensees who are considered small entities, we estimate that there are currently approximately 445 BRS licensees that are defined as small businesses under either the SBA or the Commission's rules.

59. *Television Broadcasting.* This Economic Census category “comprises

²²⁵ 47 U.S.C. 309(j). Hundreds of stations were licensed to incumbent MDS licensees prior to implementation of Section 309(j) of the Communications Act of 1934, 47 U.S.C. 309(j). For these pre-auction licenses, the applicable standard is SBA's small business size standard.

²²⁶ Amendment of Parts 1, 21, 73, 74 and 101 of the Commission's Rules to Facilitate the Provision of Fixed and Mobile Broadband Access, Educational and Other Advanced Services in the 2150–2162 and 2500–2690 MHz Bands, WT Docket No. 03–66, Fourth Memorandum Opinion and Order and Second Further Notice of Proposed Rulemaking, 23 FCC Rcd 5992, 6007 para. 28 (2008) (“BRS/EBS 4th MO&O & 2nd FNPRM”).

²¹⁸ Teligent acquired the DEMS licenses of FirstMark, the only licensee other than TRW in the 24 GHz band whose license has been modified to require relocation to the 24 GHz band.

establishments primarily engaged in broadcasting images together with sound. These establishments operate television broadcasting studios and facilities for the programming and transmission of programs to the public.”²²⁹ The SBA has created the following small business size standard for Television Broadcasting firms: those having \$14 million or less in annual receipts.²³⁰ The Commission has estimated the number of licensed commercial television stations to be 1,387.²³¹ In addition, according to Commission staff review of the BIA Advisory Services, LLC’s *Media Access Pro Television Database* on March 28, 2012, about 950 of an estimated 1,300 commercial television stations (or approximately 73 percent) had revenues of \$14 million or less.²³² We therefore estimate that the majority of commercial television broadcasters are small entities.

60. We note, however, that in assessing whether a business concern qualifies as small under the above definition, business (control) affiliations²³³ must be included. Our estimate, therefore, likely overstates the number of small entities that might be affected by our action, because the revenue figure on which it is based does not include or aggregate revenues from affiliated companies. In addition, an element of the definition of “small business” is that the entity not be dominant in its field of operation. We are unable at this time to define or quantify the criteria that would establish whether a specific television station is dominant in its field of operation. Accordingly, the estimate of small businesses to which rules may apply does not exclude any television station from the definition of a small business on this basis and is therefore possibly over-inclusive to that extent.

61. In addition, the Commission has estimated the number of licensed noncommercial educational (NCE) television stations to be 396.²³⁴ These

stations are non-profit, and therefore considered to be small entities.²³⁵

62. In addition, there are also 2,528 low power television stations, including Class A stations (LPTV).²³⁶ Given the nature of these services, we will presume that all LPTV licensees qualify as small entities under the above SBA small business size standard.

63. *Radio Broadcasting.* This Economic Census category “comprises establishments primarily engaged in broadcasting aural programs by radio to the public. Programming may originate in their own studio, from an affiliated network, or from external sources.”²³⁷ The SBA has established a small business size standard for this category, which is: Such firms having \$7 million or less in annual receipts.²³⁸ According to Commission staff review of BIA Advisory Services, LLC’s *Media Access Pro Radio Database* on March 28, 2012, about 10,759 (97%) of 11,102 commercial radio stations had revenues of \$7 million or less. Therefore, the majority of such entities are small entities.

64. We note, however, that in assessing whether a business concern qualifies as small under the above size standard, business affiliations must be included.²³⁹ In addition, to be determined to be a “small business,” the entity may not be dominant in its field of operation.²⁴⁰ We note that it is difficult at times to assess these criteria in the context of media entities, and our estimate of small businesses may therefore be over-inclusive.

65. *Auxiliary, Special Broadcast and Other Program Distribution Services.* This service involves a variety of transmitters, generally used to relay broadcast programming to the public (through translator and booster stations) or within the program distribution chain (from a remote news gathering unit back to the station). The Commission has not developed a definition of small entities applicable to broadcast auxiliary

licensees. The applicable definitions of small entities are those, noted previously, under the SBA rules applicable to radio broadcasting stations and television broadcasting stations.²⁴¹

66. The Commission estimates that there are approximately 6,099 FM translators and boosters.²⁴² The Commission does not collect financial information on any broadcast facility, and the Department of Commerce does not collect financial information on these auxiliary broadcast facilities. We believe that most, if not all, of these auxiliary facilities could be classified as small businesses by themselves. We also recognize that most commercial translators and boosters are owned by a parent station which, in some cases, would be covered by the revenue definition of small business entity discussed above. These stations would likely have annual revenues that exceed the SBA maximum to be designated as a small business (\$7.0 million for a radio station or \$14.0 million for a TV station). Furthermore, they do not meet the Small Business Act’s definition of a “small business concern” because they are not independently owned and operated.²⁴³

67. *Cable Television Distribution Services.* Since 2007, these services have been defined within the broad economic census category of Wired Telecommunications Carriers; that category is defined as follows: “This industry comprises establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired telecommunications networks. Transmission facilities may be based on a single technology or a combination of technologies.”²⁴⁴ The SBA has developed a small business size standard for this category, which is: All such firms having 1,500 or fewer employees. To gauge small business prevalence for these cable services we must, however, use current census data that are based on the previous category of Cable and Other Program Distribution and its associated size standard; that size standard was: All such firms having \$13.5 million or less in annual receipts.²⁴⁵ According to Census Bureau

²⁴⁵ 13 CFR 121.201, NAICS code 517110.

data for 2002, there were a total of 1,191 firms in this previous category that operated for the entire year.²⁴⁶ Of this total, 1,087 firms had annual receipts of under \$10 million, and 43 firms had receipts of \$10 million or more but less than \$25 million.²⁴⁷ Thus, the majority of these firms can be considered small.

68. *Cable Companies and Systems.* The Commission has also developed its own small business size standards, for the purpose of cable rate regulation. Under the Commission's rules, a "small cable company" is one serving 400,000 or fewer subscribers, nationwide.²⁴⁸ Industry data indicate that, of 1,076 cable operators nationwide, all but eleven are small under this size standard.²⁴⁹ In addition, under the Commission's rules, a "small system" is a cable system serving 15,000 or fewer subscribers.²⁵⁰ Industry data indicate that, of 6,635 systems nationwide, 5,802 systems have under 10,000 subscribers, and an additional 302 systems have 10,000–19,999 subscribers.²⁵¹ Thus, under this second size standard, most cable systems are small.

69. *Cable System Operators.* The Communications Act of 1934, as amended, also contains a size standard for small cable system operators, which is "a cable operator that, directly or through an affiliate, serves in the aggregate fewer than 1 percent of all subscribers in the United States and is not affiliated with any entity or entities whose gross annual revenues in the aggregate exceed \$250,000,000."²⁵² The Commission has determined that an operator serving fewer than 677,000 subscribers shall be deemed a small operator, if its annual revenues, when combined with the total annual revenues of all its affiliates, do not

exceed \$250 million in the aggregate.²⁵³ Industry data indicate that, of 1,076 cable operators nationwide, all but ten are small under this size standard.²⁵⁴ We note that the Commission neither requests nor collects information on whether cable system operators are affiliated with entities whose gross annual revenues exceed \$250 million,²⁵⁵ and therefore we are unable to estimate more accurately the number of cable system operators that would qualify as small under this size standard.

70. *Open Video Systems.* The open video system ("OVS") framework was established in 1996, and is one of four statutorily recognized options for the provision of video programming services by local exchange carriers.²⁵⁶ The OVS framework provides opportunities for the distribution of video programming other than through cable systems. Because OVS operators provide subscription services,²⁵⁷ OVS falls within the SBA small business size standard covering cable services, which is "Wired Telecommunications Carriers."²⁵⁸ The SBA has developed a small business size standard for this category, which is: All such firms having 1,500 or fewer employees. To gauge small business prevalence for such services we must, however, use current census data that are based on the previous category of Cable and Other Program Distribution and its associated size standard; that size standard was: All such firms having \$13.5 million or less in annual receipts.²⁵⁹ According to Census Bureau data for 2002, there were a total of 1,191 firms in this previous category that

operated for the entire year.²⁶⁰ Of this total, 1,087 firms had annual receipts of under \$10 million, and 43 firms had receipts of \$10 million or more but less than \$25 million.²⁶¹ Thus, the majority of cable firms can be considered small. In addition, we note that the Commission has certified some OVS operators, with some now providing service.²⁶² Broadband service providers ("BSPs") are currently the only significant holders of OVS certifications or local OVS franchises.²⁶³ The Commission does not have financial or employment information regarding the entities authorized to provide OVS, some of which may not yet be operational. Thus, again, at least some of the OVS operators may qualify as small entities.

71. *Cable Television Relay Service.* This service includes transmitters generally used to relay cable programming within cable television system distribution systems. This cable service is defined within the broad economic census category of Wired Telecommunications Carriers; that category is defined as follows: "This industry comprises establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired telecommunications networks. Transmission facilities may be based on a single technology or a combination of technologies."²⁶⁴ The SBA has developed a small business size standard for this category, which is: All such firms having 1,500 or fewer employees. To gauge small business prevalence for cable services we must, however, use current census data that are based on the previous category of Cable and Other Program Distribution and its associated size standard; that size standard was: All such firms having \$13.5 million or less in annual receipts.²⁶⁵ According to Census Bureau data for 2002, there were a total of 1,191 firms in this previous category that

operated for the entire year.²⁶⁶ Of this total, 1,087 firms had annual receipts of under \$10 million, and 43 firms had receipts of \$10 million or more but less than \$25 million.²⁶⁷ Thus, the majority of these firms can be considered small.

72. *Multichannel Video Distribution and Data Service*. MVDDS is a terrestrial fixed microwave service operating in the 12.2–12.7 GHz band. The Commission adopted criteria for defining three groups of small businesses for purposes of determining their eligibility for special provisions such as bidding credits. It defines a very small business as an entity with average annual gross revenues not exceeding \$3 million for the preceding three years; a small business as an entity with average annual gross revenues not exceeding \$15 million for the preceding three years; and an entrepreneur as an entity with average annual gross revenues not exceeding \$40 million for the preceding three years.²⁶⁸ These definitions were approved by the SBA.²⁶⁹ On January 27, 2004, the Commission completed an auction of 214 MVDDS licenses (Auction No. 53). In this auction, ten winning bidders won a total of 192 MVDDS licenses.²⁷⁰ Eight of the ten winning bidders claimed small business status and won 144 of the licenses. The Commission also held an auction of MVDDS licenses on December 7, 2005 (Auction 63). Of the three winning bidders who won 22 licenses, two winning bidders, winning 21 of the licenses, claimed small business status.²⁷¹

73. *Amateur Radio Service*. These licensees are held by individuals in a

²⁶⁶ U.S. Census Bureau, 2002 Economic Census, Subject Series: Information, Table 4, Receipts Size of Firms for the United States: 2002, NAICS code 517510 (issued November 2005).

²⁶⁷ *Id.* An additional 61 firms had annual receipts of \$25 million or more.

²⁶⁸ *Amendment of Parts 2 and 25 of the Commission's Rules to Permit Operation of NGSO FSS Systems Co-Frequency with GSO and Terrestrial Systems in the Ku-Band Frequency Range; Amendment of the Commission's Rules to Authorize Subsidiary Terrestrial Use of the 12.2–12.7 GHz Band by Direct Broadcast Satellite Licenses and their Affiliates; and Applications of Broadband USA, PDC Broadband Corporation, and Satellite Receivers, Ltd. to provide A Fixed Service in the 12.2–12.7 GHz Band*, ET Docket No. 98–206, Memorandum Opinion and Order and Second Report and Order, 17 FCC Rcd 9614, 9711, para. 252 (2002).

²⁶⁹ See Letter from Hector V. Barreto, Administrator, U.S. Small Business Administration, to Margaret W. Wiener, Chief, Auctions and Industry Analysis Division, WTB, FCC (Feb. 13, 2002).

²⁷⁰ See “*Multichannel Video Distribution and Data Service Auction Closes*,” Public Notice, 19 FCC Rcd 1834 (2004).

²⁷¹ See “*Auction of Multichannel Video Distribution and Data Service Licenses Closes; Winning Bidders Announced for Auction No. 63*,” Public Notice, 20 FCC Rcd 19807 (2005).

noncommercial capacity; these licensees are not small entities.

74. *Aviation and Marine Services*. Small businesses in the aviation and marine radio services use a very high frequency (“VHF”) marine or aircraft radio and, as appropriate, an emergency position-indicating radio beacon (and/or radar) or an emergency locator transmitter. The Commission has not developed a small business size standard specifically applicable to these small businesses. For purposes of this analysis, the Commission uses the SBA small business size standard for the category Wireless Telecommunications Carriers (except Satellite), which is 1,500 or fewer employees.²⁷² Most applicants for recreational licenses are individuals. Approximately 581,000 ship station licensees and 131,000 aircraft station licensees operate domestically and are not subject to the radio carriage requirements of any statute or treaty. For purposes of our evaluations in this analysis, we estimate that there are up to approximately 712,000 licensees that are small businesses (or individuals) under the SBA standard. In addition, between December 3, 1998 and December 14, 1998, the Commission held an auction of 42 VHF Public Coast licenses in the 157.1875–157.4500 MHz (ship transmit) and 161.775–162.0125 MHz (coast transmit) bands. For VHF Public Coast licenses, the Commission defines a “small” business as an entity that, together with controlling interests and affiliates, has average gross revenues for the preceding three years not to exceed \$15 million. In addition, a “very small” business is defined as an entity that, together with controlling interests and affiliates, has average gross revenues for the preceding three years not to exceed \$3 million.²⁷³ There are approximately 10,672 licensees in the Marine Coast Service, and the Commission estimates that almost all of them qualify as “small” businesses under the above special small business size standards.

75. *Personal Radio Services*. Personal radio services provide short-range, low power radio for personal communications, radio signaling, and business communications not provided for in other services. The Personal Radio Services include spectrum licensed under Part 95 of our rules.²⁷⁴ These services include Citizen Band Radio Service (“CB”), General Mobile Radio Service (“GMRS”), Radio Control Radio

²⁷² 13 CFR 121.201, NAICS code 517210.

²⁷³ *Amendment of the Commission's Rules Concerning Maritime Communications*, Third Report and Order and Memorandum Opinion and Order, 13 FCC Rcd 19853 (1998).

²⁷⁴ 47 CFR Part 90.

Service (“R/C”), Family Radio Service (“FRS”), Wireless Medical Telemetry Service (“WMTS”), Medical Implant Communications Service (“MICS”), Low Power Radio Service (“LPRS”), and Multi-Use Radio Service (“MURS”).²⁷⁵ There are a variety of methods used to license the spectrum in these rule parts, from licensing by rule, to conditioning operation on successful completion of a required test, to site-based licensing, to geographic area licensing. Under the RFA, the Commission is required to make a determination of which small entities are directly affected by the rules being proposed. Since all such entities are wireless, we apply the definition of Wireless Telecommunications Carriers (except Satellite), pursuant to which a small entity is defined as employing 1,500 or fewer persons.²⁷⁶ Many of the licensees in these services are individuals, and thus are not small entities. In addition, due to the mostly unlicensed and shared nature of the spectrum utilized in many of these services, the Commission lacks direct information upon which to base an estimation of the number of small entities under an SBA definition that might be directly affected by our action.

76. *Public Safety Radio Services*. Public Safety radio services include police, fire, local government, forestry conservation, highway maintenance, and emergency medical services.²⁷⁷

²⁷⁵ The Citizens Band Radio Service, General Mobile Radio Service, Radio Control Radio Service, Family Radio Service, Wireless Medical Telemetry Service, Medical Implant Communications Service, Low Power Radio Service, and Multi-Use Radio Service are governed by Subpart D, Subpart A, Subpart C, Subpart B, Subpart H, Subpart I, Subpart G, and Subpart J, respectively, of Part 95 of the Commission's rules. See generally 47 CFR Part 95.

²⁷⁶ 13 CFR 121.201, NAICS Code 517210.

²⁷⁷ With the exception of the special emergency service, these services are governed by Subpart B of part 90 of the Commission's rules, 47 CFR 90.15–90.27. The police service includes approximately 27,000 licensees that serve state, county, and municipal enforcement through telephony (voice), telegraphy (code) and teletype and facsimile (printed material). The fire radio service includes approximately 23,000 licensees comprised of private volunteer or professional fire companies as well as units under governmental control. The local government service that is presently comprised of approximately 41,000 licensees that are state, county, or municipal entities that use the radio for official purposes not covered by other public safety services. There are approximately 7,000 licensees within the forestry service which is comprised of licensees from state departments of conservation and private forest organizations who set up communications networks among fire lookout towers and ground crews. The approximately 9,000 state and local governments are licensed to highway maintenance service provide emergency and routine communications to aid other public safety services to keep main roads safe for vehicular traffic. The approximately 1,000 licensees in the Emergency Medical Radio Service (“EMRS”) use the 39 channels allocated to this service for

There are a total of approximately 127,540 licensees in these services. Governmental entities²⁷⁸ as well as private businesses comprise the licensees for these services. All governmental entities with populations of less than 50,000 fall within the definition of a small entity.²⁷⁹

77. *Internet Service Providers.* The 2007 Economic Census places these firms, whose services might include voice over Internet protocol (VoIP), in either of two categories, depending on whether the service is provided over the provider's own telecommunications connections (e.g. cable and DSL, ISPs), or over client-supplied telecommunications connections (e.g. dial-up ISPs). The former are within the category of Wired Telecommunications Carriers,²⁸⁰ which has an SBA small business size standard of 1,500 or fewer employees.²⁸¹ The latter are within the category of All Other Telecommunications,²⁸² which has a size standard of annual receipts of \$25 million or less.²⁸³ The most current Census Bureau data for all such firms, however, are the 2002 data for the previous census category called Internet Service Providers.²⁸⁴ That category had a small business size standard of \$21 million or less in annual receipts, which was revised in late 2005 to \$23 million. The 2002 data show that there were 2,529 such firms that operated for the entire year.²⁸⁵ Of those, 2,437 firms had annual receipts of under \$10 million, and an additional 47 firms had receipts of between \$10 million and

\$24,999,999.²⁸⁶ Consequently, we estimate that the majority of ISP firms are small entities.

78. The ISP industry has changed dramatically since 2002. The 2002 data cited above may therefore include entities that no longer provide Internet access service and may exclude entities that now provide such service. To ensure that this (IRFA/FRFA) describes the universe of small entities that our action might affect, we discuss in turn several different types of entities that might be providing Internet access service.

79. We note that, although we have no specific information on the number of small entities that provide Internet access service over unlicensed spectrum, we include these entities in our IRFA/FRFA.

IX. Description of Projected Reporting, Recordkeeping and Other Compliance Requirements

80. With certain exceptions, the Commission's Schedule of Regulatory Fees applies to all Commission licensees and regulatees. Most licensees will be required to count the number of licenses or call signs authorized, and pay a regulatory fee based on the number of licenses or call signs.²⁸⁷ In some instances, licensees may decide to submit an FCC Form 159 Remittance Advice. Interstate telephone service providers must compute their annual regulatory fee based on their interstate and international end-user revenue using information they already supply

to the Commission in compliance with the Form 499-A, Telecommunications Reporting Worksheet. Compliance with the fee schedule will require some licensees to tabulate the number of units (e.g., cellular telephones, pagers, cable TV subscribers) they have in service. Licensees ordinarily will keep a list of the number of units they have in service as part of their normal business practices. No additional outside professional skills are required to submit a regulatory fee payment, and it can be completed by the employees responsible for an entity's business records.

81. As discussed previously in this *Notice of Proposed Rulemaking*, the Commission concluded in its FY 2009 regulatory fee cycle that licensees filing their annual regulatory fee payments must begin the process by entering the Commission's Fee Filer system with a valid FRN and password. In some instances, it will be necessary to use a specific FRN and password that is linked to a particular regulatory fee bill. Going forward, the submission of hardcopy Form 159 documents will not be permitted for making a regulatory fee payment during the regulatory fee cycle. By requiring licensees to use Fee Filer to begin the regulatory fee payment process, errors resulting from illegible handwriting on hardcopy Form 159's will be reduced, and the Commission will be able to create an electronic record of licensee payment attributes that are more easily traceable than payments that were previously mailed in with a hardcopy Form 159.

82. Licensees and regulatees are advised that failure to submit the required regulatory fee in a timely manner will subject the licensee or regulatee to a late payment penalty of 25 percent in addition to the required fee.²⁸⁸ If payment is not received, new or pending applications may be dismissed, and existing authorizations may be subject to rescission.²⁸⁹ Further, in accordance with the DCIA, federal agencies may bar a person or entity from obtaining a federal loan or loan insurance guarantee if that person or entity fails to pay a delinquent debt owed to any federal agency.²⁹⁰ Nonpayment of regulatory fees is a debt owed to the United States pursuant to 31 U.S.C. 3711 *et seq.*, and the DCIA. Appropriate enforcement measures, as well as administrative and judicial remedies, may be exercised by the Commission. Debts owed to the Commission may result in a person or

emergency medical service communications related to the delivery of emergency medical treatment. 47 CFR 90.15 through 90.27. The approximately 20,000 licensees in the special emergency service include medical services, rescue organizations, veterinarians, handicapped persons, disaster relief organizations, school buses, beach patrols, establishments in isolated areas, communications standby facilities, and emergency repair of public communications facilities. 47 CFR 90.33 through 90.55.

²⁷⁸ 47 CFR 1.1162.

²⁸⁵ U.S. Census Bureau, 2002 Economic Census, Subject Series: Information, "Establishment and Firm Size (Including Legal Form of Organization)," Table 4, NAICS code 518111 (issued Nov. 2005).

²⁸⁶ An additional 45 firms had receipts of \$25 million or more.

²⁸⁷ See 47 CFR 1.1162 for the general exemptions from regulatory fees. E.g., Amateur radio licensees (except applicants for vanity call signs) and operators in other non-licensed services (e.g., Personal Radio, part 15, ship and aircraft). Governments and non-profit (exempt under section 501(c) of the Internal Revenue Code) entities are exempt from payment of regulatory fees and need not submit payment. Non-commercial educational broadcast licensees are exempt from regulatory fees as are licensees of auxiliary broadcast services such as low power auxiliary stations, television auxiliary service stations, remote pickup stations and aural broadcast auxiliary stations where such licenses are used in conjunction with commonly owned non-commercial educational stations. Emergency Alert System licenses for auxiliary service facilities are also exempt as are instructional television fixed service licensees. Regulatory fees are automatically waived for the licensee of any translator station that: (1) Is not licensed to, in whole or in part, and does not have common ownership with, the licensee of a commercial broadcast station; (2) does not derive income from advertising; and (3) is dependent on subscriptions or contributions from members of the community served for support. Receive only earth station permittees are exempt from payment of regulatory fees. A regulatee will be relieved of its fee payment requirement if its total fee due, including all categories of fees for which payment is due by the entity, amounts to less than \$10.

²⁹⁰ Public Law 104-134, 110 Stat. 1321 (1996).

entity being denied a federal loan or loan guarantee pending before another federal agency until such obligations are paid.²⁹¹

83. The Commission's rules currently provide for relief in exceptional circumstances. Persons or entities may request a waiver, reduction or deferment of payment of the regulatory fee.²⁹² However, timely submission of the required regulatory fee must accompany requests for waivers or reductions. This will avoid any late payment penalty if the request is denied. The fee will be refunded if the request is granted. In exceptional and compelling instances (e.g. where payment of the regulatory fee along with the waiver or reduction request could result in reduction of service to a community or other financial hardship to the licensee), the Commission will defer payment in response to a request filed with the appropriate supporting documentation.

X. Steps Taken To Minimize Significant Economic Impact on Small Entities, and Significant Alternatives Considered

84. The RFA requires an agency to describe any significant alternatives that it has considered in reaching its approach, which may include the following four alternatives, among others: (1) the establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for small entities.²⁹³ In this *NPRM*, we seek comment on alternatives that might simplify our fee procedures or otherwise benefit filers, including small entities, while remaining consistent with our statutory responsibilities in this proceeding.

85. Several categories of licensees and regulatees are exempt from payment of regulatory fees. Also, waiver procedures provide regulatees, including small entity regulatees, relief in exceptional circumstances. We note that small entities should be assisted by our implementation of the Fee Filer program, and that we have continued our practice of exempting fees whose total sum owed is less than \$10.00.

XI. Federal Rules That May Duplicate, Overlap, or Conflict With the Proposed Rules

None.

XII. Ordering Clauses

38. Accordingly, *it is ordered* that, pursuant to Sections 4(i) and (j), 9, and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 154(j), 159, and 303(r), this *Notice of Proposed Rulemaking is hereby adopted*.

39. *It is further ordered* that the Commission's Consumer and Governmental Affairs Bureau, Reference Information Center, shall send a copy of this *Notice of Proposed Rulemaking*, including the Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the U.S. Small Business Administration.

Federal Communications Commission.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Part 31

[FAR Case 2011-019; Docket 2011-0019; Sequence 1]

RIN 9000-AM23

Federal Acquisition Regulation; Updated Postretirement Benefit (PRB) References

AGENCY: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Proposed rule.

SUMMARY: DoD, GSA, and NASA are proposing to amend the Federal Acquisition Regulation (FAR) to remove references to specific paragraphs in an accounting standard that were deleted in the Financial Accounting Standards Board's (FASB's) Accounting Standards Codification (ASC) of Generally Accepted Accounting Principles (GAAP). The immediate and delayed recognition procedures for the initial application transition obligation in paragraphs 111, 112, and 113, respectively, of superseded Financial Accounting Standard (FAS) 106, are

obsolete and no longer exist in the authoritative GAAP (the ASC). DoD, GSA, and NASA, therefore, propose replacing the current references with replacement criteria for determining the allowability of the transition obligation, when converting from pay-as-you-go accounting for postretirement benefits (PRBs) to an accrual method of accounting for the purposes of government contract cost accounting.

DATES: Interested parties should submit written comments to the Regulatory Secretariat at one of the addressees shown below on or before July 16, 2012 to be considered in the formation of the final rule.

ADDRESSES: Submit comments in response to FAR Case 2011-019 by any of the following methods:

- *Regulations.gov:* <http://www.regulations.gov>. Submit comments via the Federal eRulemaking portal by searching "FAR Case 2011-019". Select the link "Submit a Comment" that corresponds with "FAR Case 2011-019." Follow the instructions provided at the "Submit a Comment" screen. Please include your name, company name (if any), and "FAR Case 2011-019" on your attached document.

- *Fax:* 202-501-4067.

- *Mail:* General Services Administration, Regulatory Secretariat (MVCB), ATTN: Hada Flowers, 1275 First Street NE., 7th Floor, Washington, DC 20417.

Instructions: Please submit comments only and cite FAR Case 2011-019, in all correspondence related to this case. All comments received will be posted without change to <http://www.regulations.gov>, including any personal and/or business confidential information provided.

FOR FURTHER INFORMATION CONTACT: Mr. Edward N. Chambers, Procurement Analyst, at 202-501-3221 for clarification of content. For information pertaining to status or publication schedules, contact the Regulatory Secretariat at 202-501-4755. Please cite FAR Case 2011-019.

SUPPLEMENTARY INFORMATION:

I. Background

In June of 2009, the FASB announced, in its Statement Number 168, that effective for financial statements issued for interim and annual periods ending after September 15, 2009, the FASB ASC would become the source of authoritative U.S. GAAP recognized by the FASB to be applied by nongovernmental entities. The FASB stated that this codification in the ASC supersedes existing references in U.S. GAAP.
