A. Revisions to the Systems of Records

The Commission is deleting five systems of records that do not meet the Privacy Act definition of "systems of records." CPSC-1 Injury Investigation Files does not contain personally identifiable information. CPSC-5 Commissioners' Biographies contain information in the public domain. CPSC-6 Office of the Inspector General Files, CPSC-8 Integrated Field System, and CPSC-14 Corrective Actions and Sample Tracking System are systems where information is not retrieved by personally identifiable information.

The Consumer Product Safety Commission is announcing seven new systems of records as follows:

CPSC-27 Requests for Information. This system will be used to maintain records of consumers who contact the CPSC to request information and publications. Congress and the Office of Management and Budget have been notified of the new system of records.

CPSC-28 Emergency Contact Information System for the Consumer Product Safety Commission. This system will be used to maintain information about employees, former employees, and other individuals who have provided emergency contact information.

CPSC-29 Tracking System for Freedom of Information Act (FOIA) and Privacy Act (PA) Requests. This system will contain information from individuals who have requested CPSC records pursuant to the Freedom of Information and/or Privacy Acts.

CPSC-30 Transit Subsidy Benefit Program. This system will contain information about employees who are applicants and recipients of fare subsidies issued by the U.S. Department of Transportation.

CPSC-31 Contests, Challenges and Awards Program. This program will contain information from individuals who have entered contests or have been nominated for awards.

CPSC-32 Correspondence Tracking System. This system will contain information from the public and the business community who contact the Commission, or members of Congress,

or the President or Vice President of the United States on matters related to various product safety issues.

CPSC-33 International Trade Data System Risk Assessment Methodology System. This system will be used to monitor and request examination for shipments that are potentially in violation of safety standards enforced by the Commission or potentially defective as part of a product group that has been designated by the Commission to have properties that are hazardous. Personally Identifiable Information (PII) could be used for monitoring and requesting exams, but only between government agencies (CPSC and U.S. Customs and Border Protection).

Other changes to existing systems of records include the following:

CPSC-4 Hotline Database. The system location has been updated to reflect the current contractor information.

CPSC-13 Personnel, Payroll, Financial Management, Retirement, Attendance and Leave. Changes have been made to include financial records, retirement, attendance and leave, and award information in the categories of records in the system. The title of this system of records was revised from "Personnel" to "Personnel, Payroll, Financial Management, Retirement, Attendance and Leave." The primary uses of the records are for fiscal operations for payroll, attendance, leave, insurance, tax, retirement, business payments, budget, and cost accounting programs, and to prepare related reports to other federal agencies including the Department of the Treasury and the Office of Personnel Management.

CPSC-15 Employee Relations Files. The description of storage has been updated to include computer-based media storage.
