

part of a private donation to the U.S. Department of Agriculture, Forest Service, Rio Grande National Forest. The remains were in the possession of a private collector 20 years prior to the donation. The original site of discovery is unknown. The remains consist of a nearly complete cranium plus two right parietal fragments that have been glued together. The entire cranium has been shellacked or varnished. The postero-inferior vault is darkly stained, indicative of having been in the ground. The remainder of the skull is bleached indicating exposure to the sun and elements, and weathering cracks are present in exposed areas. Four maxillary teeth are present plus one root fragment. Following examination, the remains were determined to be from an adult male, 30–40 years of age. Cultural affiliation and age of the remains could not be determined. The remains were determined to be Native American based on cranial morphology and the degree of dental attrition.

In 1994, human remains representing, at minimum, one individual (catalogue # NA-94-A) was located by private citizens in Del Norte, in Saguache County, on the Rio Grande National Forest, CO. The private citizens found the remains in a secondary burial in a shallow recent gravesite in the foothills of Del Norte, CO. The discovery was reported to the Saguache County Sheriff's Department and the remains were removed by sheriff's representatives. The condition of the remains strongly suggests that the remains were coated with undetermined materials and used as a display for unknown purposes. The remains included a nearly complete cranium, mandible, and complete left humerus, left and right radii, right femur, left and right tibiae, right fibula, and several thoracic vertebrae. The remains are those of an adult male, over 40 years of age at the time of death. Cultural affiliation and age of the remains could not be determined. Based on cranial and dental morphology the remains were determined to be Native American.

In 1997, human remains representing, at minimum, one individual (catalogue #2130 (07/03/96)) were turned over to the Rio Grande National Forest by the Saguache County Sheriff's Department. No details were provided on date or location of removal, and the remains were found on "a shelf in the East Storage Building" in the town of Saguache. The remains consist of a cranial calotte (or calva) consisting of the cranial vault but missing the facial skeleton and cranial base. No teeth were present. A moderate degree of polish is evident over the entire skull. Partial

closure of sutures and the general small size of the cranial vault indicates the remains are of a sub-adult adolescent. A flattening of the lower occipital is noted, possibly from the use of a cradleboard, indicating Native American ancestry.

#### **Determinations Made by the U.S. Department of Agriculture, Forest Service, Rio Grande National Forest**

Officials of the U.S. Department of Agriculture, Forest Service, Rio Grande National Forest have determined that:

- Based on two analyses of the human remains by the Department of Anthropology, Colorado College, Colorado Springs, CO, in 1986 and 1994, the human remains are determined to be Native American.
- Pursuant to 25 U.S.C. 3001(2) and based on the analyses and as a result of consultation, a relationship of shared group identity cannot be reasonably traced between the Native American human remains and any present-day Indian tribe.
- According to final judgments of the Indian Claims Commission and other lines of evidence, the lands from which the Native American human remains were removed is the aboriginal land of the Jicarilla Apache Nation, New Mexico; Navajo Nation of Arizona, New Mexico and Utah; Ohkay Owingeh, New Mexico (formerly the Pueblo of San Juan); Pueblo of San Ildefonso, New Mexico; Southern Ute Tribe of the Southern Ute Reservation, Colorado; Ute Indian Tribe of the Uintah & Ouray Reservation, Utah; Ute Mountain Tribe of the Ute Mountain Reservation, Colorado, New Mexico & Utah; and the Zuni Tribe of the Zuni Reservation, New Mexico.
- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of four individuals of Native American ancestry.
- Pursuant to 43 CFR 10.11(c)(1), the disposition of the human remains is to Ute Mountain Tribe of the Ute Mountain Reservation, Colorado, New Mexico & Utah.

#### **Additional Requestors and Disposition**

Representatives of any Indian tribe that believes itself to be culturally affiliated with the human remains or any other Indian tribe that believes it satisfies the criteria in 43 CFR 10.11(c)(1) should contact Ms. Angie M. Krall, Heritage Program Manager, U.S. Department of Agriculture, Forest Service, Rio Grande National Forest, 1803 W. Highway 160, Monte Vista, CO 81144, telephone (719) 852-6242 before July 5, 2012. Disposition of the human remains to the Ute Mountain Tribe of

the Ute Mountain Reservation, Colorado, New Mexico & Utah may proceed after that date if no additional requestors come forward.

The U.S. Department of Agriculture, Forest Service, Rio Grande National Forest is responsible for notifying the Jicarilla Apache Nation, New Mexico; Navajo Nation of Arizona, New Mexico and Utah; Pueblo of Santa Ana, New Mexico; Pueblo of Santa Clara, New Mexico; Southern Ute Tribe of the Southern Ute Reservation, Colorado; Ute Indian Tribe of the Uintah & Ouray Reservation, Utah; and the Ute Mountain Tribe of the Ute Mountain Reservation, Colorado, New Mexico & Utah that this notice has been published.
