

for an occupancy rate of less than 93 percent, 2 points for an occupancy rate of 93 percent but less than 96 percent, and 5 points for an occupancy rate of 96 percent or greater.

II. Action

The PHAS interim rule is the first rule to assess and score PHAs under the asset management model. Because the rule was effective for PHA fiscal years ending the month following the February 2011 publication date in the **Federal Register**, HUD recognizes that PHAs may not have been fully prepared for the changes to the assessments, performance standards, and corresponding changes in scoring, specifically as relates to the sub-indicator that assesses the occupancy rate.

Accordingly, this notice advises that for PHA's with fiscal years ending March 31, 2011, June 30, 2011, September 30, 2011 and December 31, 2011, HUD is awarding all PHAs 5 points for the occupancy rate sub-indicator under the Capital Fund Program Indicator. The score already assigned for occupancy rate sub-indicator of the Capital Fund score is advisory only as of the effective date of this notice, and will remain advisory for a period of one year from the date of publication of this notice.

HUD welcomes public comment on the scoring adjustment HUD intends to take as provided in this notice.

Following expiration of the advisory score period HUD will issue revisions of the Capital Fund indicator scores, which will result in revised PHAS scores for certain PHAs, beginning on the effective date of this notice. HUD will publish a final notice after consideration of the public comments received in response to this notice.

Assistant Secretary for Public and Indian Housing.

Agency Information Collection Activities: Comment Request

AGENCY: U.S. Geological Survey (USGS), Interior.

ACTION: Notice; request for comments for a new information collection.

SUMMARY: We (the U.S. Geological Survey) will ask the Office of Management and Budget (OMB) to approve the information collection (IC) described below. As required by the Paperwork Reduction Act (PRA) of 1995, and as part of our continuing efforts to reduce paperwork and respondent burden, we invite the general public and other Federal agencies to take this opportunity to comment on this IC.

DATE: You must submit comments on or before August 10, 2012.

ADDRESSES: Please submit a copy of your comments to the Information Collection Clearance Officer, U.S. Geological Survey, 12201 Sunrise Valley Drive MS 807, Reston, VA 20192 (mail); (703) 648-7199 (fax); or smbaloch@usgs.gov (email). Use Information Collection Number 1028-NEW, Ash Fall Report in the subject line.

FOR FURTHER INFORMATION CONTACT: To request additional information about this IC, contact Peter Cervelli at 650-329-5188 or pcervelli@usgs.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

The USGS provides warnings and notification to the public of volcanic activity in the U.S. in order to reduce the loss of life, property, and economic and societal impacts. USGS will use reports entered in real time by respondents of ash fall in their local area to correct or refine ash fall forecasts as the ash cloud moves downwind. Retrospectively these reports will enable USGS to improve their ash fall models and further research into eruptive processes.

This project will create a database module and web interface allowing the public and Alaska Volcano Observatory (AVO) staff to enter reports of ash fall in their local area in real time and retrospectively following an eruptive event. Users browsing the AVO Web site during eruptions will be directed towards a web form allowing them to fill in ash fall information and submit the information to AVO.

Compiled ash fall reports will be available in real-time to AVO staff through the AVO internal Web site. A pre-formatted summary report or table that distills information received online will show ash fall reports in chronological order with key fields including (1) date and time of ash fall, (2) location, (3) positive or negative ash fall (4) name of observer, and (5) contact information should be easily viewable on the report so that calls for clarification can be made by AVO staff

quickly and Operations room staff can visualize the information quickly.

Ash fall report data will also be displayed on a dynamic map interface and show positive (yes ash) and negative (no ash) ash fall reports by location. Ash fall reports (icons) will be publically displayed for a period of 24 hours and shaded differently as they age so that the age of reports is obvious.

The ash fall report database will help AVO track eruption clouds and associated fallout downwind. These reports from the public will also give scientists a more complete record of the amount and duration and other conditions of ash fall. Getting first-hand accounts of ash fall will support model ash fall development and interpretation of satellite imagery. AVO scientists will—as time allows—be able to contact the individuals using their entered contact information for clarification and details. Knowing the locations from which ash-fall reports have been filed will improve ash fall warning messages, AVO Volcanic Activity Notifications, and make fieldwork more efficient. AVO staff will be able to condense and summarize the various ash fall reports and forward that information on to emergency management agencies and the wider public. The online form will also free up resources during exceedingly busy times during an eruption, as most individuals currently phone AVO with their reports.
