Title: Sections 101.1011, 101.1325(b), 101.1327(a), 101.527, 101.529 and 101.103—Substantial Service Showing for LMDS, 24 GHz and MAS.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities; Not-for-profit institutions; and State, Local, or Tribal Government.

Number of Respondents: 1,114 respondents; 1,114 responses.

Estimated Time per Response: 2–15 hours.

Frequency of Response: On occasion and once every decade reporting requirement and third party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. Sections 4(i),

303(c), 303(f), 303(g), 303(r) and 309(j) of the Communications Act of 1934, as amended.

Total Annual Burden: 3,541 hours.

Total Annual Cost: \$462,000.

Privacy Impact Assessment: N/A.

Nature and Extent of Confidentiality: There is no need for confidentiality.

Needs and Uses: The Commission is seeking OMB approval for an extension of this information collection in order to obtain the full three year approval from them. There are no changes to the reporting and/or third party disclosure requirements. The Commission is reporting a change to their 2009 burden estimates. The Commission has reduced the total annual burden hours by 720 hours because there are fewer licenses subject to the substantial service requirement; in LMDS there are over 100 licenses that have met substantial service and will not be subject to that requirement again until 2018 and in MAS, the number of responses are reduced due to the cancellation of a large number of licenses. This resulted in an adjustment decrease of 360 responses based on a number of licensees having met their substantial service requirements, and revised burden estimates based on review of the data made over the last three years. The cost adjustment is an increase of \$93,000 reflects the number of estimated responses and updated estimates of the costs involved.

Section 101.1011 requires that Local Multipoint Distribution Service (LMDS) must make a showing of substantial service in their license area within 10 years of being licensed. A licensee must demonstrate that it provided service which is sound, favorable, and substantially above a level of mediocre service which might minimally warrant renewal.

Section 101.1325(b) requires that Multiple Address System (MAS) licensees must make a showing of substantial service in their license area within ten years of being licensed.

Section 101.1327(a) requires that in order to receive a renewal expectancy at renewal time, a MAS licensee must demonstrate that it provided service which is sound, favorable, and substantially above a level of mediocre service which might minimally warrant renewal. MAS licensees must also demonstrate that they have substantially complied with applicable Commission rules, policies, and the Communications Act; provide a record of the licensee’s record of expansion, and provide a description of investments it has made in its system.

Section 101.527 requires that 24 GHz licensees must make a showing of
